

GEOLOGICAL SOCIETY MEMOIRS NO. 31

# Sumatra: Geology, Resources and Tectonic Evolution

EDITED BY

A. J. BARBER

Royal Holloway University of London, UK

M. J. CROW

Lately of the British Geological Survey, UK

and

J. S. MILSOM

Gladestry Associates, UK

2005  
Published by  
The Geological Society  
London

# Contents

Preface	vii	Geochemistry of the Silungkang and Palepat Formations	67
Contributors	ix	Metavolcanics and serpentinites in the Medial Sumatra Tectonic Zone	68
<b>Chapter 1. Introduction and previous research</b>	<b>1</b>	Bentong–Billiton Accretionary Complex	68
A. J. BARBER, M. J. CROW & J. S. MILSOM		West Sumatra Triassic Plutonic–Volcanic Arc	71
History of geological research in Sumatra before WWII	1	Pahang Volcanic Belt	71
Post-WWII research	3	Jurassic–Cretaceous Plutonic–Volcanic Arcs	71
SEATAR Programme	3	Volcanics in the Woyla Accretionary Complex	72
Indonesian Petroleum Association	4	Oceanic volcanic arc fragments	77
British and Indonesian Geological Surveys	4	Origins of the volcanic units and their environments of formation	79
University of London Southeast Asian Research Group, BGS and LEMIGAS	5	<b>Chapter 7. Tertiary stratigraphy</b>	<b>86</b>
Southern Sumatra Project	6	M. E. M. DE SMET & A. J. BARBER	
<b>Chapter 2. Seismology and neotectonics</b>	<b>8</b>	Stratigraphic review	86
J. S. MILSOM		Pre-Rift stage (Eocene)	87
Shallow seismicity	9	Horst and graben stage (latest Eocene–Oligocene)	88
The Wadati–Benioff Zone (WBZ)	9	Transgressive stage (Late Oligocene–Mid-Miocene)	91
Toba seismicity	10	Maximum transgression (Mid-Miocene)	94
Relative horizontal movements	11	Regressive stage (Mid-Miocene–Present)	95
GPS data, the Enggano and Simeulue earthquakes and Mentawai Fault	13	Summary	95
Vertical movements	15	<b>Chapter 8. Tertiary volcanicity</b>	<b>98</b>
<b>Chapter 3. The gravity field</b>	<b>16</b>	M. J. CROW	
J. S. MILSOM & A. S. D. WALKER		Radiometric dating of volcanism and plutonism in Sumatra	98
Data sources	16	Tertiary volcanic stratigraphy	98
Regional gravity patterns	16	Major and trace element geochemistry of the Tertiary volcanic rocks	109
Toba–Tawar gravity low	19	Volcanism, plutonism and subduction beneath Sumatra during the Tertiary: summary of Tertiary volcanism and tectonic overview	110
Eastern Sumatra	19	<b>Chapter 9. Quaternary volcanicity</b>	<b>120</b>
Gravity effects of sedimentary basins	19	M. GASPARON	
The forearc basin	20	Quaternary volcanic arc and its relationship with main tectonic features of Sumatra	120
Seismic tomography and the long-wavelength gravity field	22	Pyroclastic deposits	123
<b>Chapter 4. Pre-Tertiary stratigraphy</b>	<b>24</b>	Quaternary arc volcanoes	124
A. J. BARBER & M. J. CROW		Quaternary backarc volcanics	125
Pre-Carboniferous basement	24	Volcanic hazard	130
Tapanuli Group (Carboniferous–?Early Permian)	25	<b>Chapter 10. Fuel resources: oil and gas</b>	<b>131</b>
Peusangan Group (Permo-Triassic)	35	J. CLURE	
Woyla Group (Jurassic–Cretaceous)	40	North Sumatra Basin	131
<b>Chapter 5. Granites</b>	<b>54</b>	Central Sumatra Basin	135
E. J. COBBING		South Sumatra Basin	137
Isotopic ages of Sumatran granites	54	Other Sumatran basins	140
The granite suites	56	<b>Chapter 11. Fuel resources: coal</b>	<b>142</b>
Conclusions	61	L. P. THOMAS	
<b>Chapter 6. Pre-Tertiary volcanic rocks</b>	<b>63</b>	Geology and coal deposits in Sumatra	142
M. J. CROW		Coal quality	145
Carboniferous volcanism	63	Coal resources and production	145
East Sumatra Plutonic–Volcanic Belt (Permian volcanism)	63		
West Sumatra Permian Plutonic–Volcanic Belt (Early–Mid-Permian volcanism)	64		

<b>Chapter 12. Metallic mineral resources</b>	<b>147</b>	Tertiary basins in the backarc area	<b>2</b>
M. J. CROW & T. M. VAN LEEUWEN			
Sources of data	147	<b>Chapter 14. Tectonic evolution</b>	<b>2</b>
Timing of metallic mineralization events in Sumatra	147	A. J. BARBER, M. J. CROW &	
Palaeozoic sedimentary basins (Pb–Zn)	148	M. E. M. DE SMET	
Late Triassic–Early Jurassic magmatic arc and the Tin Granites (Sn, Wo)	149	Pulunggono & Cameron (1984) model	2
Jurassic to Early Cretaceous magmatic arcs (Cu, Au)	158	Fontaine & Gafoer (1989) model	2
Woyla Group and Accretion Complex (Au–Ag, Pb–Zn)	159	Metcalf (1996) model	2
Late Cretaceous magmatic arc (Sn, Au–Ag)	159	Hutchison (1994) model	2
Palaeocene magmatic arc (Cu, Au–Ag)	159	Revised tectonic model for Sumatra	2
Late Eocene–Early Miocene magmatic arc	159	Permo-Triassic palaeogeographic reconstructions	2
Miocene–Pliocene magmatic arc (porphyry Cu, Mo)	159	The Woyla Nappe and the Mesozoic evolution of the Sundaland margin	2
Neogene magmatic arc (Au–Ag)	165	Tertiary palaeogeography of Sumatra	2
Conclusions	174	Recommendations for future work on Sumatran geology	2
<b>Chapter 13. Structure and structural history</b>	<b>175</b>	<b>Appendix Radiometric age data for Sumatra</b>	<b>2</b>
A. J. BARBER & M. J. CROW		<b>References</b>	<b>2</b>
The Sunda forearc	175	<b>Index</b>	<b>2</b>
The Barisan Mountains	187
