

# Sediment Dynamics and the Hydromorphology of Fluvial Systems

Edited by

JOHN S. ROWAN, ROBERT W. DUCK  
& ALAN WERRITTY

*Environmental Systems Research Group, School of Social Sciences  
University of Dundee, DD1 4HN, UK*

# Contents

**Preface** by *John S. Rowan, Robert W. Duck & Alan Werritty*

v

## **1 Fluvial Sediment Dynamics and the Importance of Extreme Events**

Suspended sediment yield from continents into the World Ocean: spatial and temporal variability <i>A. P. Dedkov &amp; A. V. Gusarov</i>	3
Sediment yields in the Exe Basin: a longer-term perspective <i>Anna Harlow, Bruce Webb &amp; Des Walling</i>	12
Estimates and analysis of suspended sediment from a glacierized basin in the Himalayas <i>Pratap Singh</i>	21
Influence of different factors on the sediment yield of the Oka Basin rivers (central Russia) <i>Valentin Golosov</i>	28
Sediment transport during a flushing flow in the lower Ebro River <i>Ramon J. Batalla, Damià Vericat &amp; Antoni Palau</i>	37
Glacial erosion and sediment transport in the Mittivakkat Glacier catchment, Ammassalik Island, southeast Greenland, 2005 <i>Bent Hasholt &amp; Sebastian H. Mernild</i>	45
Flood and sediment transport response to hydrometeorological events of diverse magnitude in the Vallcebre basin, Eastern Pyrenees <i>Montserrat Soler, David Regüés, Jérôme Latron &amp; Francesc Gallart</i>	56
Episodic discharge of coarse sediment in a mountain torrent <i>Richard Johnson &amp; Jeff Warburton</i>	64
The life-span of a small high mountain lake, the Vordere Blaue Gumpe in the Bavarian Alps <i>David Morche, Christian Katterfeld, Sebastian Fuchs &amp; Karl-Heinz Schmidt</i>	72
Output of bed load sediment from a small upland drainage basin in Hong Kong <i>M. R. Peart &amp; L. Fok</i>	82
A volumetric approach to estimate bed load transport in a mountain stream (Central Spanish Pyrenees) <i>N. Lana-Renault, D. Regüés, J. Latron, E. Nadal, P. Serrano &amp; C. Martí-Bono</i>	89
Suspended sediment dynamics for June storm events in the urbanized River Tame, UK <i>D. M. Lawler, I. D. L. Foster, G. E. Petts, S. Harper &amp; I. P. Morrissey</i>	96
Estimating soil erosion and sediment transport in the drainage basin of the proposed Selova Reservoir, Serbia <i>Stanimir Kostadinov, Nada Dragović &amp; Mirjana Todosijević</i>	104
The effect of the “Great Flood of 1993” on subsequent suspended sediment concentrations and fluxes in the Mississippi River Basin, USA <i>Arthur J. Horowitz</i>	110
An underutilized resource: historical flood chronologies, a valuable resource in determining periods of hydro-geomorphic change <i>N. Macdonald</i>	120
Hydromorphological adjustment in meandering river systems and the role of flood events <i>Janet Hooke</i>	127
Sediment erosion, transport and deposition during the July 2001 Mawddach extreme flood event <i>Graham Hall &amp; Roger Cratchley</i>	136

Sediment transport rates of major floods in glacial and non-glacial rivers in Norway in the present and future climate <i>Jim Bogen</i>	148
Evaluating the impacts of impoundment on sediment transport using short-lived fallout radionuclides <i>Francis J. Magilligan, Nira L. Salant, Carl E. Renshaw, Keith H. Nilsow, Arjun Heimsath &amp; James M. Kaste</i>	159
<b>2 The Structure, Functioning and Management of Fluvial Sediment Systems</b>	
Variety is the spice of river life: recognizing hydraulic diversity as a tool for managing flows in regulated rivers <i>M. C. Thoms, M. Reid, K. Christianson &amp; F. Munro</i>	169
Multi-scale analysis of island formation and development in the Middle Loire River, France <i>Emmanuèle Gautier &amp; Stéphane Grivel</i>	179
Geometric properties of the River Euphrates, Iraq: the nature of its slope variation <i>Moutaz Al-Dabbas &amp; Mukdad Al-Jabbari</i>	188
Changing use and hydromorphological adjustment in a coastal lagoon–estuarine system, the Ria de Aveiro, Portugal <i>José Figueiredo Da Silva &amp; Robert W. Duck</i>	197
Modelling flow, erosion and long-term evolution of incising channels: managing hydrology and geomorphology for ecology <i>Timothy Norton, Julian Leyland &amp; Stephen Darby</i>	205
The role of sediments in the dynamics and preservation of the aquatic forest in the Nestos Delta (northern Greece) <i>D. Emmanouloudis, D. Myronidis, S. Panilas &amp; G. Efthimiou</i>	214
The use of buffer features for sediment and phosphorus retention in the landscape: implications for sediment delivery and water quality in river basins <i>P. N. Owens, J. H. Duzant, L. K. Deeks, G. A. Wood, R. P. C. Morgan &amp; A. J. Collins</i>	223
Sediment monitoring and sediment management in the Rhine River <i>Stefan Vollmer &amp; Emil Goelz</i>	231
Are flood plain–wetland plant communities determined by seed bank composition or inundation periods? <i>Munique Webb, Michael Reid, Samantha Capon, Martin Thoms, Scott Rayburg &amp; Cassandra James</i>	241
A practical method for the management of road runoff <i>Ingrid Takken, Jacky Croke &amp; Simon Mockler</i>	249
Morphometric analysis of UK lake systems as a compliance tool for the European Water Framework Directive <i>John S. Rowan, Iain Soutar &amp; Geoff E. Phillips</i>	257
Flows that form: the hydromorphology of concave-bank bench formation in the Ovens River, Australia <i>G. J. Vietz, M. J. Stewardson &amp; B. L. Finlayson</i>	267
The diversity of inundated areas in semiarid flood plain ecosystems <i>Orla Murray, Martin Thoms &amp; Scott Rayburg</i>	277
Strategies for reducing sediment connectivity and land degradation in desertified areas using vegetation: the RECONDES project <i>Peter Sandercock &amp; Janet Hooke</i>	287
Evaluating the effectiveness of the Illinois River Conservation Reserve Enhancement Program in reducing sediment delivery <i>Misganaw Demissie, Laura Keefer, Jim Slowikowski, &amp; Kip Stevenson</i>	295
Unravelling the physical template of a terminal flood plain–wetland sediment storage system <i>Scott Rayburg, Martin Thoms &amp; Erin Lenon</i>	304
River sediment/pathogen interactions: importance for policy development on safe water practices <i>Ian G. Droppo, Steven N. Liss, Declan Williams &amp; Gary G. Leppard</i>	314

Linking pattern and process: the effects of hydraulic conditions on cobble biofilm metabolism in an Australian upland stream <i>Michael Reid &amp; Martin Thoms</i>	322
Combining biology and hydrology—questions from an integrated study of chalk streams <i>Roger S. Wotton &amp; Geraldene Wharton</i>	331

### 3 Unlocking the Stratigraphic Record

Reservoir sedimentation trends in Ohio, USA: sediment delivery and response to land-use change <i>William H. Renwick &amp; Zachary D. Andereck</i>	341
Dating of reservoir and pond deposits by the $^{137}\text{Cs}$ technique to assess sediment production in small catchments of the Hilly Sichuan Basin and the Three Gorges Region, China <i>Zhang Xinbao, Qi Yongqing, He Xiubin, Wen Anbang &amp; Fu Jiexiong</i>	348
The role of organic matter on the adsorption of mercury in sediments from Amazon lakes, Brazil <i>Daniel Marcos Bonotto, Marcelo Vergott &amp; Ene Glória Da Silveira</i>	355
Using geochemical stratigraphy to indicate post-fire sediment and nutrient fluxes into a water supply reservoir, Sydney, Australia <i>William H. Blake, Peter J. Wallbrink, Stefan H. Doerr, Richard A. Shakesby, Geoffrey S. Humphreys, Pauline English &amp; Scott Wilkinson</i>	363
Variation of suspended sediment transport in the Timah Tasoh reservoir catchment, Perlis, Malaysia: human impacts and the role of tropical storms <i>A. Rahaman Zullyadini &amp; Ismail Wan Ruslan</i>	371
The use of $^{137}\text{Cs}$ and $^{210}\text{Pb}$ to investigate sediment sources and overbank sedimentation rates in the Teesta River basin, Sikkim Himalaya, India <i>W. Froehlich &amp; D. E. Walling</i>	380
The infilling of a terminal flood plain–wetland complex <i>Robert Cossart, Martin Thoms &amp; Scott Rayburg</i>	389
Sediment budgets and sinks in the Brahmaputra Basin and their agricultural and ecological impacts <i>U. C. Sharma &amp; Vikas Sharma</i>	399
Holocene sediment budgets of the Rhine Delta (The Netherlands): a record of changing sediment delivery <i>Gilles Erkens, Kim M. Cohen, Marc J. P. Gouw, Hans Middelkoop &amp; Wim Z. Hoek</i>	406
Changing fluxes of sediments and salts as recorded in lower River Murray wetlands, Australia <i>Peter Gell, Jennie Fluin, John Tibby, Deborah Haynes, Syeda Ifteara Khanum, Brendan Walsh, Gary Hancock, Jennifer Harrison, Atum Zawadzki &amp; Fiona Little</i>	416
Unravelling flood history using matrices in fluvial gravel deposits <i>Lynne E. Frostick, Brendan Murphy &amp; Richard Middleton</i>	425
The importance of temporal changes in gravel-stored fine sediment on habitat conditions in a salmon spawning stream <i>Ellen L. Petticrew &amp; John F. Rex</i>	434
Pacific salmon and sediment flocculation: nutrient cycling and intergravel habitat quality <i>John F. Rex &amp; Ellen L. Petticrew</i>	442
Sediment storage and transfer in the Mekong: generalizations on a large river <i>Avijit Gupta, S. C. Liew &amp; Alice W. C. Heng</i>	450
River flood plains as carbon sinks <i>D. E. Walling, D. Fang, A. P. Nicholas &amp; R. J. Sweet</i>	460
Investigating the remobilization of fine sediment stored on the channel bed of lowland permeable catchments in the UK <i>Adrian L. Collins &amp; Desmond E. Walling</i>	471

The impact of changes in climate, upstream land use and flood plain topography on overbank deposition <i>Ivo Thonon, Hans Middelkoop &amp; Marcel Van Der Perk</i>	480
A gradient or mosaic of patches? The textural character of inset-flood plain surfaces along a dryland river system <i>Mark Southwell &amp; Martin Thoms</i>	487
The deposition and storage of sediment-associated phosphorus on the flood plains of two lowland groundwater fed catchments <i>Deborah Ballantine, Desmond E. Walling &amp; Graham J. L. Leeks</i>	496
 <b>4 Experiment-based and Modelling Approaches to Sediment Research</b>	
Sediment phosphorus dynamics in tile-fed drainage ditches <i>D. R. Smith, E. A. Warnemuende, B. E. Haggard &amp; C. Huang</i>	507
A framework for predicting delivery of phosphorus from agricultural land using a decision-tree approach <i>Richard Brazier, Michael Schärer, Louise Heathwaite, Keith Beven, Paul Scholefield, Phil Haygarth, Robin Hodgkinson, Des Walling &amp; Paul Withers</i>	514
Nutrient and contaminant enrichment in rural areas of southwest Germany <i>Martin Schwarz &amp; Stephan Fuchs</i>	524
Salinity and erosion: a preliminary investigation of soil erosion on a salinized hillslope <i>Mel Neave &amp; Scott Rayburg</i>	531
Analysis of local scour downstream of bed sills: preliminary results of experimental work <i>Donatella Termini</i>	540
Comparison of numerical and experimental study of dam-break induced mudflow <i>Szu-Hsien Peng &amp; Su-Chin Chen</i>	548
MOSESS: a model for soil erosion prediction at small scales <i>Eduardo E. de Figueiredo &amp; Hérbete H. R. C. Davi</i>	556
Predicting erosion patterns using a spatially distributed erosion model with spatially variable and uniform parameters <i>Dirk H. De Boer</i>	564
Importance of watershed lag times in IUSG development <i>Kazimierz Banasik, Mariusz Barszcz &amp; Leszek Hejduk</i>	574
Impacts of land-use changes on sediment yields and water quality within the Nairobi River sub-basins, Kenya <i>Shadrack Mulei Kithiia &amp; Francis M. Mutua</i>	582
Model investigations of the effects of land-use changes and forest damage on erosion in mountainous environments <i>Peter Molnar, Paolo Burlando, Jörg Kirsch &amp; Elke Hinz</i>	589
SWAT model for Integrated River Basin Management with application to the Mekong Basin <i>Riyadh Al-Soufi</i>	601
Modelling the impacts of climate variability on sediment transport <i>Eileen Cashman &amp; Kenneth Potter</i>	611
Effects of rainfall variability and land-use change on sediment yield simulated by SHETRAN <i>Eduardo E. De Figueiredo &amp; James C. Bathurst</i>	620
