New Worlds, New Horizons in Astronomy and Astrophysics

Committee for a Decadal Survey of Astronomy and Astrophysics

Board on Physics and Astronomy

Space Studies Board

Division on Engineering and Physical Sciences

NATIONAL RESEARCH COUNCIL
OF THE NATIONAL ACADEMIES
Contents

EXECUTIVE SUMMARY

1  2020 VISION
   Science Objectives, 10
     Cosmic Dawn: Searching for the First Stars, Galaxies, and
     Black Holes, 10
   New Worlds: Seeking Nearby, Habitable Planets, 11
   Physics of the Universe: Understanding Scientific Principles, 12
   Optimizing the Science Program, 14
   Proposed Program of Activities, 16
     Space Projects—Large—in Rank Order, 16
     Space Projects—Medium—in Rank Order, 20
     Small Additions and Augmentations to Space Research Program
       (Unranked), 21
     Ground Projects—Large—in Rank Order, 22
     Ground Project—Medium, 25
     Small Additions and Augmentations to Ground Research Program
       (Unranked), 25
   Other Conclusions and Recommendations, 26
     Partnership in Astronomy and Astrophysics Research, 27
     Society, Astronomy, and Astronomers, 28
     Sustaining Core Capabilities, 30
     Preparing for Tomorrow, 32
ON THE THRESHOLD

Discovery, 36
  The Discovery of Habitable Planets, 37
  A Bold New Frontier: Gravitational Radiation, 39
  Opening the Time Domain: Making Cosmic Movies, 43
  Giving Meaning to the Data: Cyber-Discovery, 45
  Discovery Through the Power of Mathematics, Physics, and the Imagination, 46
Origins, 46
  The Origin of the Universe: The Earliest Moments, 47
  The First Sources of Light and the End of the Cosmic Dark Ages, 48
  The Origin of Galaxies and Large-Scale Structure, 51
  The Origin of Black Holes, 52
  The Origin of Stars and Planets, 53
Understanding the Cosmic Order, 57
  Galaxies and Black Holes, 57
  Stars, 59
  Planetary Systems, 66
  Life, 67
Frontiers of Knowledge, 68
  The Nature of Inflation, 69
  The Accelerating Universe, 70
  The Nature of Dark Matter, 71
  The Nature of Neutrinos, 72
  The Nature of Compact Objects and Probes of Relativity, 74
  The Chemistry of the Universe, 76

PARTNERSHIP IN ASTRONOMY AND ASTROPHYSICS: COLLABORATION, COOPERATION, COORDINATION

International Partnerships, 81
  The Globalization of Astronomy, 81
  Managing International Collaboration, 82
  International Strategic Planning, 86
Public-Private Partnerships, 87
  Ground-Based Optical and Infrared Astronomy, 87
  Ground-Based Radio, Millimeter, and Submillimeter Astronomy, 92
Partnership Opportunities, 93
  OIR and RMS on the Ground, 94
  Particle Astrophysics and Gravitation, 97
  Space Observatories, 97
Agency Partnerships and Interfaces, 98
4 ASTRONOMY IN SOCIETY

Benefits of Astronomy to the Nation, 104
Astronomy Engages the Public in Science, 104
Engagement with Astronomy Improves Science Literacy and Proficiency, 110
Astronomy Inspires in the Classroom and Beyond, 111
Astronomy Serves as a Gateway to New Technology, 112
Astronomy and the America COMPETES Act, 113
Astronomy Addresses the Challenges of the 21st Century, 114
Astronomers and Public Policy, 115

Astronomers, 116
Demography, 116
Implications for Employment and Training, 124
Underrepresented Minorities in Astronomy, 125
Women in Astronomy, 128

5 SUSTAINING THE CORE RESEARCH PROGRAM

Individual Investigator Programs, 132
Theory, 135
Emerging Trends in Theoretical Research, 135
Theoretical Challenges for the Next Decade, 137
Individual Investigator Programs in Theory and Computation, 140
The Rapid Rise of Astrophysical Computing, 140
Research Networks in Theoretical and Computational Astrophysics, 142

Data and Software, 142
Data Archives, 143
Data Reduction and Analysis Software, 148

Medium-Scale Activities, 148
Technical Workforce Development, 148
NASA Explorer and Suborbital Programs, 149
NSF Mid-Scale Innovation Program, 151

Technology Development, 154
NASA-Funded Space-Based Astrophysics Technology Development, 154
NSF-Funded Ground-Based Astrophysics Technology Development, 157
DOE-Funded Technology Development, 158

Laboratory Astrophysics, 159
The Scope and Needs of Laboratory Astrophysics, 159
The Funding Challenge, 161
6 PREPARING FOR TOMORROW
Operating and Upcoming Projects, Missions, and Facilities, 163
  Department of Energy, 163
  National Aeronautics and Space Administration, 165
  National Science Foundation, 168
Toward Future Projects, Missions, and Facilities, 173
  Department of Energy, 173
  National Aeronautics and Space Administration, 174
  National Science Foundation, 175

7 REALIZING THE OPPORTUNITIES
Process, 183
  Prioritization Criteria, 183
  Program Prioritization, 184
  Cost, Risk, and Technical Readiness Evaluation, 186
  Budgets, 187
Science Objectives for the Decade, 189
  Cosmic Dawn: Searching for the First Stars, Galaxies, and
    Black Holes, 189
  New Worlds: Seeking Nearby, Habitable Planets, 191
  The Physics of the Universe: Understanding Scientific Principles, 195
The Larger Science Program, 199
  Discovery, 200
  Origins, 201
  Understanding the Cosmic Order, 203
  Frontiers of Knowledge, 204
Recommended Program of Activities, 204
  Recommendations for New Space Activities—Large Projects, 205
  Recommendations for New Space Activities—Medium Projects, 215
  Recommendations for New Space Activities—Small Projects, 218
  Small Additions and Augmentations to NASA’s Core Research
    Programs, 219
  Recommendations for New Ground-Based Activities—Large
    Projects, 223
  Recommendation for New Ground-Based Activities—Medium
    Project, 234
  Small Additions and Augmentations to NSF’s Core Research
    Program, 235
