Preface to the Second Edition	xiii
Preface to the First Edition	xv
1 Introduction	1
1.1 Terms and Definitions	1
1.1.1 Volcanic Terms	1
1.1.2 Tectonic Terms	5
1.1.3 Seismological Terms	6
1.2 Subject of the Book	6
Acknowledgments	7
2 Seismicity at Volcanoes	9
2.1 History of Seismic Monitoring of Volcanic Activity	9
2.2 Classification of Volcanic Earthquakes	14
2.3 Sequences of Volcanic Earthquakes	20
2.3.1 Sequences of Volcano-Tectonic Earthquakes	20
2.3.2 Sequences of Eruption Earthquakes	27
3 Fundamentals of Volcanic Seismology	29
3.1 Magma Flow within the Volcanic Conduit	29
3.1.1 Magma Flow Regimes	30
3.1.2 Modeling of Magma Flow Regimes	31
3.2 Experimental Studies of the Volcanic Processes and Their Applications for the Seismic Sources	32
3.2.1 Experimental Grounds of the Brittle Fracturing in the Rocks at High Temperatures and High Pressure	32
3.2.2 Experimental Grounds of the Origin of Seismic Signals During the Magma Ascending Within the Volcanic Conduit	35
3.3 General Description of the Source of Seismic Signals at Volcanoes	41
3.3.1 Equivalent Force System Acting in the Earthquake Source	41
3.3.2 Green's Functions	41
3.3.3 Single Force	41
3.3.4 Seismic Moment Tensor	42
3.3.5 Waveform Inversion	43
4 Origin of Volcano-Tectonic Earthquakes	49
4.1 Migration of Magma and Its Seismic Potential	49
4.2 Volcanism and Tectonics	53
4.3 Source Nature of Volcano-Tectonic Earthquakes	59

4.3.1	Waveform and Spectra	59
4.3.2	Tensor Representation of the Source of Volcano-Tectonic Earthquake	61
4.4	Models of Volcano-Tectonic Earthquake Sequences	63
5	Volcano-Tectonic Earthquakes at Basaltic Volcanoes:	
	Case Studies	67
5.1	Volcano-Tectonic Earthquakes Associated with Shield Volcanoes	67
5.1.1	Kilauea Volcano, Hawaii	67
5.2	Volcano-Tectonic Earthquakes Associated with Stratovolcanoes	71
5.2.1	Mount Etna, Sicily	71
5.2.2	Oshima Volcano, Izu Islands	78
5.2.3	Klyuchevskoy Volcano, Kamchatka	79
5.3	Volcano-Tectonic Earthquakes Associated with Fissure Eruptions	82
5.3.1	New Tolbachik Volcanoes, Kamchatka	83
5.3.2	The 2005–2009 Ethiopia Rifting Episode	86
5.4	Volcano-Tectonic Earthquakes Associated with Caldera Collapse	90
5.4.1	Fernandina Volcano, Galápagos Islands	90
5.5	Volcano-Tectonic Earthquakes Associated with Submarine Eruptions	92
5.5.1	Teishi Knoll Volcano, Izu Islands	92
5.5.2	Miyakejima Volcano, Izu Islands	94
6	Volcano-Tectonic Earthquakes at Andesitic Volcanoes:	
	Case Studies	99
6.1	Volcano-Tectonic Earthquakes Associated with Volcanic “Directed Blasts”	99
6.1.1	Bezymianny Volcano, Kamchatka	100
6.1.2	Sheveluch Volcano, Kamchatka	101
6.2	Volcano-Tectonic Earthquakes Associated with Phreatic and Phreato-Magmatic Explosions	105
6.2.1	El Chichón Volcano, Mexico	105
6.2.2	Volcán de Colima, México	105
6.2.3	Popocatepetl Volcano, México	107
6.2.4	Soufrière Hills Volcano, Montserrat	111
6.3	Volcano-Tectonic Earthquakes Associated with Lava Extrusions	115
6.3.1	Volcán de Colima, México	115
6.4	Volcano-Tectonic Earthquakes Associated with Flank Eruptions	119
6.4.1	Sakurajima Volcano, Japan	119
7	Volcano-Tectonic Earthquakes at Dacitic Volcanoes: Case Studies	121
7.1	Volcano-Tectonic Earthquakes Associated with Summit Eruptions	121
7.1.1	Mount St. Helens, Cascades	121
7.1.2	Usu Volcano, Hokkaido	127
7.1.3	Unzen Volcano, Kyushu	129

7.1.4	Pinatubo Volcano, Luzon	132
7.2	Volcano-Tectonic Earthquakes Associated with Flank Eruptions	136
7.2.1	Usu Volcano, Hokkaido	137
8	General Properties of Volcano-Tectonic Earthquake Swarms	145
8.1	Properties of Volcano-Tectonic Earthquake Swarms Inferred from the Data of Chapters 5–7	145
8.1.1	Temporal Variations	145
8.1.2	Spatial Distributions	148
8.1.3	Posteruptive Seismic Activity	149
8.1.4	Duration of Seismic Swarms Prior to Eruption	150
8.1.5	Position of a Volcanic Event According to the Stage of Volcano-Tectonic Earthquake Swarm	150
8.2	Additional Data About Volcano-Tectonic Earthquake Swarm Properties	150
8.2.1	Size of Volcano-Tectonic Earthquake Swarm Area	150
8.2.2	Earthquake Swarm Duration	151
8.2.3	Magnitude–Frequency Relations of Events in Volcano-Tectonic Earthquake Swarms	153
8.3	Some Regularities in the Volcano-Tectonic Earthquake Swarms Proclaiming Reawakening of Andesitic and Dacitic Volcanoes	156
8.3.1	Relationship Between the Duration of Stage 1 and the VEI of Forthcoming Explosion	158
8.3.2	Relationship Between the Duration of Stage 2 and Postexplosion Dome Building	159
8.3.3	The Conceptual Model of Reawakening Process	159
9	Source Properties of Volcano-Tectonic Earthquakes	161
9.1	Focal Mechanisms of Volcano-Tectonic Earthquakes: Double-Couple and Non-Double-Couple Models	161
9.1.1	Double-Couple Model	161
9.1.2	Non-Double-Couple Model	165
9.2	Source Spectral Characteristics of Volcano-Tectonic Earthquakes	168
9.2.1	Spectra of Total Records of Volcano-Tectonic Earthquakes	170
9.2.2	Spectral Source Characteristics of Volcano-Tectonic Earthquakes	171
9.3	Temporal Variations of the Source Spectral Characteristics and Focal Mechanisms of Volcano-Tectonic Earthquakes in the Course of Volcanic Activity	177
9.3.1	Corner Frequencies Variations	177
9.3.2	Stress-Drop Variations	180
9.3.3	Stress Field Rotations	182
9.4	Seismo-Tectonic Deformations in the Volcanic Region	182

10	Significant Volcano-Tectonic Earthquakes and Their Role in Volcanic Processes	189
10.1	Selection of Significant Volcano-Tectonic Earthquakes that Occurred in the Twentieth Century	191
10.2	Focal Rupturing of Significant Volcano-Tectonic Earthquakes and Its Role in Volcanic Processes	191
10.2.1	Rupturing of the Magnitude Mw 5.2 Earthquake Preceding the 1989 Teishi Knoll Submarine Eruption	193
10.2.2	Rupturing of the Magnitude Mw 7.1 Earthquake Preceding the 1996 Akademia Nauk Volcano Subaqual Eruption	195
10.2.3	Rupturing of the Magnitude Mw 5.6 Earthquake Preceding the 1996 Grimsvøtn Volcano Subglacial Eruption	196
10.3	The Magnitude 7 Volcano-Tectonic Earthquakes in Volcanic Processes	199
10.3.1	Event No. 2, Katmai, Alaska	200
10.3.2	Event No. 3, Sakurajima, Japan	201
10.4	Seismic Hazard of Significant Volcano-Tectonic Earthquakes	203
10.4.1	Maximum Magnitude M_{\max}	204
10.4.2	Attenuation of Earthquake Intensity with Distance for Volcanic Earthquakes	211
10.4.3	Recurrence Time	213
10.4.4	Estimation of the Seismic Hazard of Volcanic Activity of Volcán de Colima, Mexico	215
11	Origin of Eruption Earthquakes	217
11.1	Volcanic Processes Generating Seismic Signals of Eruption Earthquakes	217
11.1.1	Processes Within the Volcanic Conduit	217
11.1.2	Volcanic Flows	217
11.2	Source Mechanisms of Eruption Earthquakes	219
11.2.1	A Force System Equivalent to a Volcanic Eruption	219
11.2.2	Seismic Moment Tensors of Some Non-Double-Couple Sources of Eruption Earthquakes	222
11.3	Models of the Eruption Earthquake Sources	224
11.3.1	Models Based on the Vibration of Magma-Filled Structures	224
11.3.2	Models Based on Degassing Process of Magma	228
11.3.3	Modeling of Seismic Signals Generated by Pyroclastic Flows and Rockfalls	235
12	Volcanic Tremor	237
12.1	Seismograms and Spectra	237
12.2	Location of Volcanic Tremor	237

12.2.1	Oshima Volcano, Izu Islands	237
12.2.2	Etna Volcano, Sicily	238
12.3	Volcanic Tremors in Eruptive Process	238
12.3.1	Etna Volcano, Sicily	239
12.3.2	Pavlof Volcano, Alaska	240
12.3.3	Kilauea Volcano, Hawaii	241
12.3.4	Klyuchevskoy Volcano, Kamchatka	242
12.4	Relationship Between the Intensity of Volcanic Tremor and Volcanic Events	244
12.5	Special Cases of Volcanic Tremors	246
12.5.1	Isolated Tremors	246
12.5.2	Banded Tremor	252
12.5.3	Long-Period Tremor	256
12.5.4	Deep Tremor	258
13	Seismic Signals Associated with Pyroclastic Flows, Rockfalls, and Lahars	261
13.1	Occurrence of Pyroclastic Flows, Rockfalls, and Lahars During Volcanic Eruptions	261
13.2	Seismic Signals Associated with Pyroclastic Flows and Rockfalls: Waveforms and Spectra	261
13.2.1	Seismic Signals of Pyroclastic Flows Produced by the Partial Collapse of Lava Dome	263
13.2.2	Seismic Signals of Pyroclastic Flows Produced by the Collapse of Eruption Column	265
13.2.3	Seismic Signals of Pyroclastic Flows Produced by the Explosive Destruction of Growing Lava Dome	267
13.2.4	Seismic Signals Produced by Rockfall	270
13.2.5	Spectral Characteristics	272
13.3	Occurrences of Earthquakes Associated with Pyroclastic Flows and Rockfalls	273
13.4	Relationship Between the Pyroclastic Flow and Rockfall Earthquakes and Seismo-Volcanic Activity During Lava Emission	273
13.5	Quantification of Pyroclastic Flow and Rockfall Earthquakes	276
13.5.1	Quantification of Pyroclastic Flow and Rockfall Earthquakes Occurring Due to Partial Collapse of the Lava Dome and Recorded by Short-Period Instruments at Volcán de Colima, México	278
13.5.2	Relationship Between the Magnitude of Pyroclastic Flow and Rockfall Earthquakes and the Volume of Pyroclastic Flows	280
13.5.3	Relationship Between the Amplitude of Long-Period Records of Pyroclastic Flow and Rockfall Earthquakes and the Volume of Pyroclastic Flows	281

13.6	Location Pyroclastic Flows Using the Amplitude Signals of Earthquakes	282
13.7	Seismic Signals Associated with Lahars: Waveforms and Spectra	282
13.8	Seismic Signals as a Source of Information About the Lahar Structure	287
13.9	Seismic Tracking of Lahars	290
13.10	Comparison of the Seismic Characteristics of Pyroclastic Flows and Lahars	292
14	Seismic Signals Associated with Volcanic Explosions	295
14.1	Waveforms and Spectra	296
14.1.1	Strombolian Explosions	296
14.1.2	Vulcanian Explosions	297
14.1.3	Phreato-Magmatic Explosions	297
14.2	Nature of the Seismic Signals of Explosive Earthquakes	299
14.2.1	Comparison of the Contemporary Video and Seismic Records During an Explosion	299
14.2.2	Type of Waves Composing the Seismic Signal of an Explosion	302
14.3	Sources of Explosion Earthquakes and Their Quantification	305
14.3.1	Multiple Source of Explosions	307
14.3.2	Two-Stage Model of Explosive Process	311
14.3.3	Relationship Between the Seismic Moment of Preliminary LP Phase and the Energy of Explosions for Sakurajima Volcano	314
14.3.4	Volcanic Explosive Process as a Source of Hybrid Earthquakes	318
14.4	Location of Explosion Earthquakes	318
14.4.1	Location of the Initial Sub-Events from Waveform Inversion	318
14.5	Explosion Sequences	319
14.6	Explosion Earthquakes in Eruptive Process	322
15	Long-Period and Very Long-Period Seismic Signals at Volcanoes	327
15.1	Waveforms and Spectra	327
15.1.1	Long-Period Seismic Signals	327
15.1.2	Very Long-Period Seismic Signals	328
15.1.3	Occurrences of LP and VLP Events	331
15.1.4	Nature of LP and VLP Seismic Signals	334
15.2	Geometry of the Sources of LP and VLP Seismic Signals	337
15.3	Type of Fluid Within the Fluid-Filled Cracks	339
15.3.1	Crack Model	340
15.3.2	Complex Frequencies of the LP Seismic Signal for Different Fluids	341

15.3.3	Identification of the Type of Fluid from LP Seismic Signals	341
15.4	Location of the Sources of LP and VLP Events	347
15.5	Conceptual Models of the Relationship Between the Sources of the LP and VLP Seismic Signals and Their Role in Eruptive Process	351
16	Swarms of Microearthquakes Associated with Effusive and Explosive Activity at Volcanoes	355
16.1	Waveforms and Spectra	355
16.2	Structure of Microearthquake Swarms	357
16.3	Microearthquake Swarms in Eruption Process	362
16.3.1	Kizimen volcano, Kamchatka	362
16.3.2	Stromboli volcano, Aeolian Islands	364
16.3.3	Mount St. Helens, Cascades	366
16.3.4	Ubinas volcano, Perú	367
16.3.5	Volcán de Colima, Mexico	368
16.4	Nature of Microearthquakes	371
16.4.1	Similarity Between the Microearthquake Waveforms and the Seismic Signals Well-Associated with the Volcanic Events	371
16.4.2	Quantification of Microearthquakes	375
16.4.3	Nature of Microearthquakes Resolved from Waveform Inversion	380
17	Acoustic Waves Generated by Volcanic Eruptions	381
17.1	Infrasonic Acoustic Waves from Small Volcanic Explosions (VEI 1 and 2)	381
17.1.1	Waveforms and Spectra	382
17.1.2	Families of Infrasonic Signals	383
17.1.3	Source Location of the Infrasonic Events	383
17.1.4	Relationship Between the Amplitudes of the Seismic and Infrasonic Signals	386
17.2	Long-Period Acoustic and Acoustic-Gravity Waves from Large Volcanic Explosions (VEI 4–6)	390
17.2.1	Near-Field Waveforms of the Long-Period Acoustic Waves	390
17.2.2	Far-Field Registrations of the Long-Period Acoustic Waves	391
17.3	Acoustic Waves Produced by the Lava Dome Collapse and the Propagation of Pyroclastic Flow and Rockfalls	393
17.3.1	Dome Collapse	393
17.3.2	Pyroclastic Flow Propagation	395
17.3.3	Large Rockfall Propagation	398

17.4	Acoustic Waves Produced During Volcanic Microearthquake Swarms ("Drumbeats")	399
17.5	Utility of the Acoustic Signals for Volcano Activity Monitoring	401
17.5.1	Estimation of the Energy of Eruptive Events	401
17.5.2	Reconstruction of the Process of Dome Collapses and Pyroclastic Flow Movement	403
17.5.3	Monitoring of Phreatic and Strombolian Explosions	405
18	Seismic Monitoring of Volcanic Activity and Forecasting of Volcanic Eruptions	407
18.1	Methodology of Seismic Monitoring of Volcanic Activity	407
18.1.1	Seismic Networks Around Volcanoes	407
18.1.2	Initial Processing of Seismic Data	410
18.1.3	Automatic Classification of the Seismic Signals	412
18.1.4	Location of Seismic Events	416
18.2	Applications of Volcanic Seismicity to the Forecasting of Volcanic Eruptions and Predicting of Volcanic Hazards	416
18.2.1	Methods Based on the Statistical Variations in the Parameters of Volcano-Tectonic Earthquakes	417
18.2.2	Chronicle of Some Forecasting of Volcanic Eruptions Based on Seismic Monitoring	424
19	Seismic Activity at Dormant Volcanic Structures: A Problem of Failed Eruption	433
19.1	Failed Eruptions: Case Studies	433
19.1.1	Failed Eruptions at Large Calderas	433
19.1.2	Failed Eruptions at Strato-Volcanoes	437
19.1.3	Failed Eruptions in Rift Settings	440
19.2	Modeling of Magma Ascent Resisting	445
19.2.1	Experimental Study of the Ascent of a Fixed Magma Volume	446
19.2.2	Arrest of Propagating Dyke Due to Mechanical Barriers and Density Stratification in an Upper Crustal Horizon	447
19.3	Monitoring of the Seismic Activity at Dormant Volcanoes	451
19.3.1	Monitoring of Andesitic and Dacitic Dormant Volcanoes	452
19.3.2	Monitoring of Basaltic Dormant Volcanoes	453
	References	457
