
CONTENTS

Chapter 1	Scientific Prediction	1
1.1	Introduction,	1
1.2	Styles of Prediction,	7
1.3	Prediction for Nominal Variables: Statistical Independence and “Unrelatedness”,	12
1.4	Prediction for Ordinal Variables: Relative Comparisons of Observations,	17
1.5	Prediction for Quantitative Variables: Linear Models,	18
1.6	Critical Methodological Issues in Prediction Analysis,	25
1.7	A Prediction Logic,	27
Chapter 2	Prediction and Association	36
2.1	Criteria for Measuring Prediction Success,	36
2.2	Measures of “Association”: An Overview,	43
2.3	Testing for Nonrelation and Goodness of Fit	44
2.4	The Cross-Product Ratio and Its Progeny,	49
2.5	Proportionate Reduction in Error Measures for Degree-1 Predictions,	52
2.6	Measures of Association for Degree-2 Predictions,	59
2.7	Conclusion: Measures of Association,	64
Chapter 3	Prediction Analysis for Bivariate Propositions: Population Measures	65
3.1	Measuring Prediction Success in the 2×2 Table,	66
3.2	Measuring Prediction Success in the $R \times C$ Table,	79
3.3	∇_{φ} as a Solution to the Design Objectives,	102

Chapter 4	Bivariate Prediction Analysis: Applications	105
4.1	Differential Weighting of Prediction Errors,	105
4.2	Prediction Analysis of Actuarial Propositions,	112
4.3	Prediction Analysis of Unconditional and Conditional Probability Structures,	124
4.4	<i>Ex post</i> Selection of an Optimal Proposition,	132
4.5	Prediction Analysis When Certain Events Are Excluded,	146
	Appendix 4.1 ∇ -Equivalent Pure and Mixed Strategies,	157
Chapter 5	Bivariate Prediction Analysis for Pairs of Events	159
5.1	Degree-2 Prediction Analysis of Event Pairs in Extensive Form,	160
5.2	Degree-2 Prediction Analysis of Event Pairs in Condensed Form,	165
5.3	Measures of Ordinal Association,	169
5.4	A Comment on Modes of Prediction Analysis for Qualitative Data: Single Observations versus Observation Pairs,	176
5.5	Comparative Prediction Analysis of Degree-1 versus Degree-2 Propositions,	179
5.6	Application: Defection from Father's Political Party,	181
	Appendix 5.1 Logical Equivalence of Degree-1 and Degree-2 Propositions,	184
Chapter 6	Bivariate Statistical Inference	186
6.1	Three Sampling Models,	192
6.2	Estimates of ∇_{φ} in the Three Sampling Conditions,	194
6.3	Confidence Intervals and Significance Tests for ∇_{φ} ,	202
6.4	Adequacy of the Normal Approximation,	211
6.5	Sampling Distributions When Certain Events Are Excluded,	216
6.6	Sampling Distributions for Degree-2 Analysis,	218
6.7	Inference for <i>Ex post</i> Predictions,	221
6.8	Effect of Classification Error,	230
	Appendix 6.1 Properties of Estimators,	232
	Appendix 6.2 Sampling Variances,	233
	Appendix 6.3 Computational Formula for the Asymptotic Variance,	236

Appendix 6.4	Comparison of Two Estimated Del Values for the Same Data,	237
Appendix 6.5	Variances for Degree-2 Predictions and for Predictions with Irrelevant Events,	238
Appendix 6.6	Variances under Independence,	242
Appendix 6.7	Proof of Chi-Square Bound for Standardized Squared Del Value,	243
Appendix 6.8	Chi-Square Results for a Restricted Number of Predictions,	246
Appendix 6.9	Probabilities under Misclassification,	248
Chapter 7	Multivariate Methods	251
7.1	Stating Multivariate Predictions,	252
7.2	Measuring Multivariate Prediction Success,	258
7.3	Measuring Partial Prediction Success,	263
7.4	Error Accounting and Prediction Shifts,	269
7.5	Error Accounting: Examples,	276
7.6	Relations with Multiple Regression and Correlation Methods,	281
7.7	Statistical Inference in Multivariate Analysis,	284
7.8	<i>Ex post</i> Multivariate Analysis,	289
Appendix 7.1	Derivation of Asymptotic Variances,	291
	References	294
