

Contents

Chapter I

Finite Sets	1
IA Conventions and Basic Notation	1
IB Selections and Partitions	4
IC Fundamentals of Enumeration	9
ID Systems	16
IE Parameters of Systems	19

Chapter II

Algebraic Structures on Finite Sets	28
IIA Vector Spaces of Finite Sets	28
IIB Ordering	33
IIC Connectedness and Components	43
IID The Spaces of a System	49
IIE The Automorphism Groups of Systems	52

Chapter III

Multigraphs	57
IIIA The Spaces of a Multigraph	58
IIIB Biconnectedness	63
IIIC Forests	66
IIID Graphic Spaces	70
IIIE Planar Multigraphs	75
IIIF Euler's Formula	85
IIIG Kuratowski's Theorem	92

Chapter IV

Networks	98
IVA Algebraic Preliminaries	98
IVB The Flow Space	104
IVC Max-Flow–Min-Cut	108
IVD The Flow Algorithm	112
IVE The Classical Form of Max-Flow–Min-Cut	116
IVF The Vertex Form of Max-Flow–Min-Cut	117
IVG Doubly-Capacitated Networks and Dilworth’s Theorem	121

Chapter V

Matchings and Related Structures	126
VA Matchings in Bipartite Graphs	126
VB 1-Factors	133
VC Coverings and Independent Sets in Graphs	138
VD Systems with Representatives	141
VE $\{0, 1\}$ -Matrices	145
VF Enumerative Considerations	148

Chapter VI

Separation and Connectivity in Multigraphs	153
VIA The Menger Theorem	153
VIB Generalizations of the Menger Theorem	156
VIC Connectivity	160
VID Fragments	167
VIE Tutte Connectivity and Connectivity of Subspaces	171

Chapter VII

Chromatic Theory of Graphs	178
VIIA Basic Concepts and Critical Graphs	178
VII B Chromatic Theory of Planar Graphs	187
VII C The Imbedding Index	197
VII D The Euler Characteristic and Genus of a Graph	201
VII E The Edmonds Imbedding Technique	208

Chapter VIII

Two Famous Problems	213
VIIIA Cliques and Scatterings	213
VII B Ramsey’s Theorem	214
VII C The Ramsey Theorem for Graphs	217
VII D Perfect Graphs	224

Chapter IX	
Designs	230
IXA Parameters of Designs	230
IXB Design-Types	235
IXC t -Designs	240
IXD Finite Projective Planes	249
IXE Partially-Balanced Incomplete Block Designs	253
IXF Partial Geometries	261
Chapter X	
Matroid Theory	265
XA Exchange Systems	265
XB Matroids	270
XC Rank and Closure	278
XD Orthogonality and Minors	288
XE Transversal Matroids	295
XF Representability	302
Chapter XI	
Enumeration Theory	310
XIA Formal Power Series	310
XIB Generating Functions	314
XIC Pólya Theory	322
XID Möbius Functions	328
Bibliography	337
Subject Index	345
Index of Symbols	350
