

## TABLE OF CONTENTS

INTRODUCTION	1
CHAPTER ONE / BACKGROUND	
1. Propositional Formulas	11
2. Models	14
3. A Unifying Notation	22
4. Classical Semantic Tableaus	29
CHAPTER TWO / ANALYTIC MODAL TABLEAUS AND CONSISTENCY PROPERTIES	
1. Tableau Rules for K, K4, T, S4, D and D4	33
2. Uniform Modal Notation	41
3. Correctness	43
4. A Note on Completeness Proofs	46
5. Consistency Properties for K, K4, T, S4, D and D4	48
6. Tableau Completeness	60
CHAPTER THREE / LOGICAL CONSEQUENCE, COMPACTNESS, INTERPOLATION, AND OTHER TOPICS	
1. Introduction	64
2. Logical Consequence	65
3. Strong Tableau Completeness	70
4. Compactness Theorems	74
5. The Deduction Theorem	77
6. Gentzen Systems	81
7. Symmetric Gentzen Systems	88
8. The Craig Interpolation Lemma	93
9. Other Interpolation Theorems	99
10. The Beth Definability Theorem	105
11. Further Consequences of Interpolation Theorems	110
12. Decidability	115

CHAPTER FOUR / AXIOM SYSTEMS AND NATURAL  
DEDUCTION

1. Introduction	118
2. A Classical Propositional Axiom System	118
3. An Underlying Modal Logic	123
4. Results about the Logic U	127
5. The Logic K Axiomatized	130
6. Correctness and Completeness of the K Axiomatization	134
7. The Logics K4, T, S4, D and D4 Axiomatization	137
8. Finite Axiomatizability, Part I	141
9. Finite Axiomatizability, Part II	148
10. A Classical Natural Deduction System	153
11. Some Results about Natural Deduction	162
12. A Note on Modal Natural Deduction Rules	170
13. I-style Natural Deduction Rules	171
14. I-style Completeness and Correctness	176
15. A-style Natural Deduction Rules	184
16. A-style Completeness and Correctness	187

CHAPTER FIVE / NON-ANALYTIC LOGICS

1. Introduction	191
2. Synthetic KB, DB, B and S5 Tableaus	193
3. Semi-analytic KB, DB, B and S5 Tableaus	201
4. Consistency Properties for KB, DB, B and S5	205
5. Immediate Consequences	209
6. KB, DB, B and S5 Axiomatized	210
7. Natural Deduction for KB, DB, B and S5	213
8. Symmetric Gentzen Systems and Interpolation	214
9. Peculiar Non-peculiarities of S5	221
10. An Embedding of S5 into S4	222
11. Another S5 Tableau System	225
12. Finite Axiomatizability	229
13. S5 Interpolation Theorems	234
14. The Significance of G	241
15. Tableau Rules for G	245
16. G Tableau Correctness	249
17. G Consistency Properties	251
18. Consequences	255

## CHAPTER SIX / NON-NORMAL LOGICS

1. Introduction	262
2. Augmented Kripke Models	265
3. Semantic Tableaus	270
4. Consistency Properties	281
5. Deduction Theorems	286
6. Interpolation Theorems	292
7. Decidability	299
8. Axiom Systems	300
9. Natural Deduction Systems	306
10. Regular and Quasi-regular Logics	313
11. Logics between Regular and Normal	316
12. The Intermediate Logics Axiomatized	321
13. The Logic U	329

## CHAPTER SEVEN / QUANTIFIERS

1. Introduction	332
2. First-order Languages	333
3. First-order Models	339
4. Interpretations	343
5. Uniform Notation	344
6. Tableau Rules	345
7. Tableau Correctness	350
8. Analytic Consistency Properties	353
9. Analytic Tableau Completeness	366
10. Natural Deduction and Axiom Systems	367
11. Compactness and Skolem–Lowenheim Theorems	372
12. Deduction Theorems	373
13. Interpolation Theorems	375
14. Dropping Monotonicity	380
15. Constant Domain Models	382

## CHAPTER EIGHT / PREFIXED TABLEAU SYSTEMS

1. Introduction	386
2. Prefixed Propositional Tableaus	388
3. Correctness	398
4. A Systematic Tableau Procedure	401
5. Konig's Lemma	404

6.	Completeness	407
7.	Decidability	410
8.	Logical Consequence	416
9.	The Fundamental Theorem	418
10.	Quantifiers - Constant Domains	424
11.	Correctness and Completeness	425
12.	Constant Domain Logics Axiomatically	428
13.	Quantifiers - Varying Domains	433
14.	Concluding Remarks	436

#### CHAPTER NINE / INTUITIONISTIC LOGIC

1.	Introduction	437
2.	Propositional Intuitionistic Models	439
3.	Independence of the Intuitionistic Connectives	444
4.	Uniform Notation	450
5.	Tableau Systems	453
6.	Local and Global Satisfiability	462
7.	Intuitionistic Consistency Properties	464
8.	Decidability	468
9.	First-order Intuitionistic Models	469
10.	Uniform Notation, again	474
11.	First-order Tableau Systems	476
12.	First-order Intuitionistic Consistency Properties	481
13.	Consequences	485
14.	An Axiom System	487
15.	Axiomatic Correctness and Completeness	491
16.	A Natural Deduction System	495
17.	Direct Consequences	500
18.	Completeness of the Natural Deduction System	504
19.	Gentzen Systems and Interpolation	508
20.	Concluding Comments	518
