INTRODUCTION	1
MAN-MADE MINERAL FIBRES	5
2.1 General	5
2.2 Characteristics	6
2.3 Manufacturing methods	7
2.3.1 General	7
2.3.2 Glassfibres	8
2.3.3 Rockwool and slagwool	8
2.3.4 Refractory fibres	9
2.4 Occupational exposure	9
2.4.1 General	9
2.4.2 Continuous filament glassfibres	9
2.4.3 Insulation wools	10
2.4.4 Refractory fibres	11
2.4.5 Special purpose glassfibres	11
2.5 Non-occupational exposure	12
2.6 Health effects	12
2.6.1 General	12
2.6.2 Irritant effects	12
2.6.3 Non-malignant respiratory disease including fibrosis	13
2.6.4 Malignant respiratory disease	14

	<u>Page</u>
2.6.5 Other relevant factors	17
2.6.6 IARC evaluation	18
2.7 Evaluation of human health risks	20
2.7.1 Occupational exposure	20
2.7.2 Non-occupational exposure	20
3. NATURAL MINERAL FIBRES (OTHER THAN ASBESTOS)	23
3.1 General	23
3.2 Characteristics	24
3.2.1 Erionite	24
3.2.2 Attapulgite	24
3.2.3 Wollastonite	25
3.3 Occupational exposure	25
3.3.1 Erionite	25
3.3.2 Attapulgite	26
3.3.3 Wollastonite	26
3.4 Non-occupational exposure	28
3.4.1 Erionite	28
3.4.2 Attapulgite	29
3.4.3 Wollastonite	29
3.5 Health effects	29
3.5.1 Erionite	29
3.5.2 Attapulgite	30
3.5.3 Wollastonite	31
3.5.4 Summary of health effects	31

	<u>Page</u>
4. SYNTHETIC ORGANIC FIBRES	33
4.1 General	33
4.2 Characteristics	35
4.2.1 Aramid fibres	35
4.2.2 Carbon and graphite fibres	35
4.2.3 Polyolefin fibres	36
4.3 Occupational exposure	36
4.3.1 Aramid fibres	36
4.3.2 Carbon and graphite fibres	37
4.3.3 Polyolefin fibres	38
4.4 Non-occupational exposure	38
4.5 Health effects	38
4.5.1 Aramid fibres	38
4.5.2 Carbon and graphite fibres	39
4.5.3 Polyolefin fibres	39
4.5.4 Summary of health effects	40
5. MONITORING OF AIRBORNE DUST IN THE WORKING ENVIRONMENT	43
5.1 General	43
5.2 Gravimetric determination of airborne dusts	43
5.3 Determination of airborne respirable fibre concentrations	43
5.4 Determination of airborne synthetic organic fibres	45
6. PREVENTIVE AND CONTROL MEASURES	47
6.1 General approach of the ILO	47

6.1.1	ILO international instruments relating to occupational safety and health	47
6.1.2	Other ILO guidance	49
6.2	General considerations concerning exposure to mineral and synthetic fibres	50
6.3	Specific considerations concerning exposure to mineral and synthetic fibres	52
6.3.1	Exposure limits	52
6.3.2	Labelling	52
6.3.3	Work practices	53
6.3.4	Engineering control measures	53
6.3.5	Housekeeping and welfare	54
6.3.6	Monitoring of the working environment and the exposure of workers	54
6.3.7	Personal protective equipment	55
6.3.8	Instruction, training and information ..	56
6.3.9	Health surveillance	56
	LAW AND PRACTICE IN SELECTED COUNTRIES	59
7.1	Production and use of MMMF	59
7.2	Regulations	61
7.2.1	General and specific regulations	61
7.2.2	Labelling	61
7.2.3	Exposure limits	61
7.2.4	Monitoring of exposure to dust at the workplace	64
7.2.5	Health examination of workers	64
7.3	Additional information	64

Annex 1: Resolution concerning the development of preventive and protective measures related to the health risks associated with occupational exposure to fibres, whether natural or artificial (adopted by the International Labour Conference at its 72nd Session, 1986)	67
Annex 2: Report of the Meeting of Experts on Safety in the Use of Mineral and Synthetic Fibres, Geneva, 17-25 April 1989	69
