Chapter 1 Introduction 3

Why Study Research Methods?	4
Consuming Research Evidence	4
Producing Research Evidence	5
Topics for Research	6
Methodological Approaches to the Social World	7
Some Preliminary Research Questions	8
An Experimental Answer	10
An Answer from Survey Research	11
An Answer from Field Research	12
An Answer from Available Data	13
Conclusions	14

I SCIENTIFIC AND LOGICAL FOUNDATIONS OF SOCIAL RESEARCH 15

Chapter 2 The Nature of Science 17

The Aim of Science	18
Science as Product	18
Scientific versus Nonscientific Questions	19
Knowledge as Description	20
Knowledge as Explanation and Prediction	21
Knowledge as Understanding	24
Tentative Knowledge	26
Science as Process	27
Empiricism	30
Objectivity	31
Control	33
Science: Ideal versus Reality	35
Summary	37

Chapter 3 The Logic of Scientific Reasoning 40

Logic and Reasoning	40
Elements of Logical Analysis	41
Terms	41
Propositions	42
Arguments	42

Validity and Truth: Logic and Science	44
Deduction and Induction	44
Deductive Reasoning in Science	45
Argument Forms	46
The Deductive Pattern of Scientific Explanation	49
Inductive Reasoning in Science	51
Inductive Generalization	51
Testing Hypotheses: The Hypothetico-Deductive Method	54
Summary	59

II RESEARCH DESIGN 65

Chapter 4 Elements of Research Design 67

Selecting Topics for Research	67
Units of Analysis	69
Variables	72
Types of Variables	72
Relationships	75
Relationships Among Qualitative Variables	77
Relationships Among Quantitative Variables	78
Relationships Between a Qualitative and a Quantitative Variable	80
The Nature of Causal Relationships	81
Stating Problems and Hypotheses	87
Research Purposes and Research Design	91
Stages of Social Research	94
Stage 1: Selection and Formulation of the Research Problem	94
Stage 2: Preparation of the Research Design	94
Stage 3: Measurement	94
Stage 4: Sampling	95
Stage 5: Data Collection	95
Stage 6: Data Processing	95
Stage 7: Data Analysis and Interpretation	95
Summary	95

Chapter 5 Measurement 100

The Measurement Process	100
Conceptualization	101
Specification of Variables and Indicators	102
Operationalization	103
Operational Definitions in Social Research	105
Verbal Reports	106
Observation	108
Archival Records	108
Selection of Operational Definitions	109

Levels of Measurement	110
Nominal Measurement	110
Ordinal Measurement	111
Interval Measurement	112
Ratio Measurement	113
Reliability and Validity	114
Sources of Error	115
Reliability Assessment	118
Test-Retest Reliability	118
Parallel Forms, Split-Half, and Internal Consistency Reliability	119
Intercoder Reliability	120
Improving Reliability	121
Validity Assessment	122
Subjective Validation	122
Criterion-related Validation	123
Construct Validation	124
A Final Note on Reliability and Validity	130
Summary	130

Chapter 6 Sampling 136

Why Sample?	137
Population Definition	140
Sampling Designs	143
Probability Sampling	143
Random Selection	143
Simple Random Sampling	146
Stratified Random Sampling	151
Cluster Sampling	154
Systematic Sampling	157
Nonprobability Sampling	159
Convenience Sampling	159
Purposive Sampling	160
Quota Sampling	161
Other Sampling Designs	162
Combined Probability and Nonprobability Sampling	163
Referral Sampling	164
Factors Affecting Choice of Sampling Design	165
Stage of Research and Data Use	165
Available Resources	166
Method of Data Collection	166
Factors Determining Sample Size	167
Population Heterogeneity	167
Desired Precision	168
Sampling Design	170
Available Resources	170
Number of Breakdowns Planned	171
Other Considerations	171
Summary	172

III METHODS OF DATA COLLECTION 179

Chapter 7 Experimentation 181

The Logic of Experimentation	181
Testing Causal Relations	182
Matching and Random Assignment	184
Internal and External Validity	185
Sampling in Experiments	186
Staging Experiments	188
An Example: Who Will Intervene?	189
Subject Recruitment and Acquisition of Informed Consent	190
Introduction to the Experiment	192
The Experimental Manipulation	193
Manipulation Checks	193
Measurement of the Dependent Variable	194
Debriefing	194
Pretesting	195
Experimental and Mundane Realism	196
The Experiment as a Social Occasion	197
Demand Characteristics	197
Evaluation Apprehension	199
Other Motives of Experimental Subjects	199
Experimenter Effects	200
Minimizing Bias Due to the Social Nature of Experimentation	201
Experimentation Outside the Laboratory	203
Field Experiments	204
Experimental Designs in Survey Research	207
Units of Analysis Other than Individuals	208
Summary	209

Chapter 8 Experimental Designs 213

Threats to Internal Validity	214
Preexperimental Designs	218
Design 1: The One-Shot Case Study	218
Design 2: The One-Group Pretest-Posttest Design	219
Design 3: The Static-Group Comparison	220
True Experimental Designs	221
Design 4: The Pretest-Posttest Control Group Design	221
Design 5: The Posttest-Only Control Group Design	222
Design 6: The Solomon Four-Group Design	223
Overview of True Experimental Designs	223
Factorial Experimental Designs	225
Interaction Effects	227
Quasi-Experimental Designs	230
An Example: Interracial Attitudes and Behavior at a Summer Camp	232

Evaluation Research	238
Internal Validity	238
External Validity	239
Summary	241

Chapter 9 Survey Research 246

General Features of Survey Research	246
Large-Scale Probability Sampling	246
Systematic Procedures: Interviews and Questionnaires	248
Quantitative Data Analysis	250
Secondary Analysis of Surveys	251
The Uses and Limitations of Surveys	252
Survey Research Designs	254
Cross-sectional Designs	254
Longitudinal Designs	255
Steps in Survey Research: Planning	257
Constructing the Instrument	258
Developing the Sampling Plan	260
Face-to-Face and Telephone Interviewing	260
Face-to-Face Interviewing	261
Telephone Interviewing	262
Self-Administered Questionnaires	264
A Final Note on Planning	265
Field Administration	266
Interviewer Selection	269
Interviewer Training	269
Pretesting	270
Gaining Access	270
Interviewing	271
Supervision and Quality Control	275
Follow-up Efforts	276
Summary	277

Chapter 10 Survey Instrumentation 282

Materials Available to the Survey Designer	283
Open-ended and Closed-ended Questions	283
Direct and Indirect Questions	286
Response Formats	289
Visual Aids	292
Existing Questions	292
“Sketches” or Preliminaries	293
The Opening	293
The Placement of Sensitive and Routine Questions	294
Order, Flow, and Transition	294
Filling in the Sketch: Writing the Items	296
Using Language Effectively	297

The "Frame of Reference" Problem	300
Reason Analysis	301
Memory Problems	304
Response Bias Problems	305
Format Considerations	307
The Final Product	309
Pretesting	309
Summary	310

Chapter 11 Field Research 316

The Potentials and Limitations of Field Research	318
Field Observation	320
Nonparticipant Observation	322
Participant Observation	324
Research Design and Sampling	327
Sampling in Field Research	328
Stages of Field Research	330
A Field Study of the Homeless	331
Selecting a Research Setting	332
Gaining Access	335
Presenting Oneself	337
Gathering Information	341
Analyzing the Data	345
Summary	349

Chapter 12 Research Using Available Data 354

Sources of Available Data	354
Public Documents and Official Records	355
Private Documents	360
Mass Media	361
Physical, Nonverbal Evidence	362
Social Science Data Archives	363
Advantages of Research Using Available Data	363
Nonreactive Measurement	364
Analyzing Social Structure	364
Studying and Understanding the Past	365
Understanding Social Change	365
Studying Problems Cross-Culturally	365
Improving Knowledge Through Replication and Increased Sample Size	366
Savings on Research Costs	366
General Methodological Issues in Available-Data Research	367
Searching for and Procuring Available Data	367
Measurement of Key Concepts	368
Evaluation of Data Quality	369
Assessment of Data Completeness	372
Historical Analysis	373
Descriptive and Analytical History	373

Handling Documentary Evidence	376
Historical Interpretation	378
Content Analysis	381
Selecting and Defining Content Categories	382
Defining the Unit of Analysis	382
Deciding on a System of Enumeration	383
Carrying Out the Analysis	384
Summary	387

Chapter 13 Multiple Methods 391

Triangulation	391
Multiple Measures of Concepts Within the Same Study	394
Composite Measures: Indexes and Scales	395
Structural Equation Modeling	399
Multiple Tests of Hypotheses Across Different Studies	402
Replications Using the Same Research Strategy: Compliance Without Pressure	403
Replications Using Different Research Strategies: Deterrent Effects of Arrest	405
A Comparison of the Four Basic Approaches to Social Research	407
Summary	410

IV DATA PROCESSING, ANALYSIS, AND INTERPRETATION 413

Chapter 14 Data Processing and Elementary Data Analysis 415

Beginning the Analysis	416
Data Processing	417
Coding	417
Editing	421
Entering the Data	422
Cleaning	423
Modifying the Data	424
The Functions of Statistics in Social Research	425
Univariate Analysis	426
Bivariate Analysis	434
Relationships Involving Nominal-Scale Variables	434
Relationships Between Two Ordinal-Scale Variables	438
Relationships Between a Nominal-/Ordinal- and an Interval-/Ratio-Scale Variable	440
Relationships Between Two Interval-/Ratio-Scale Variables	442
Summary	446

Chapter 15 Multivariate Analysis 451

Modeling Relationships	452
Arrow Diagrams	452
Stochastic and Systematic Components	454
Elaboration	456

Multiple-Regression Analysis	458
A Three-Variable Example	460
Use of Dummy Variables	463
Other Modeling Techniques	469
Summary	470
Chapter 16 Research Ethics	474
Treatment of Human Subjects	475
Harm	476
Informed Consent	479
Deception	481
Privacy	484
Making Ethical Decisions	486
The Uses of Research: Science and Society	490
Summary	494
Chapter 17 Writing Research Reports	497
Using the Library for Research	497
Outlining and Preparing to Write	502
Major Headings	504
The Abstract	504
Introduction	504
Literature Review	505
Methods	505
Findings	506
Discussion	507
References	507
Other Considerations	507
The Writing–Reading Interface	507
Revisions	508
Length	509
Summary	509
Glossary	511
References	529
Name Index	550
Subject Index	556
