Chapter 1	Introduction	1
	Hedging with the cash market	2
	What is a derivative?	3
	OTC or exchange traded?	4
	Credit risk and market risk	4
	Hedgers, speculators and arbitrageurs	4
	General points	5
Chapter 2	The nature of currency exposure	7
	Types of currency exposure	8
	Transaction risk	8
	Translation risk	9
	Economic exposure	10
	Hedging or covering transaction risk	10
	Summary	11
	Key terms	11
	Questions	11
Chapter 3	Internal hedging techniques	13
	Selling and buying in one's own currency	13
	Selling and buying in ECUs (or other basket currencies)	14
	Leading and lagging	14
	Matching	15
	Netting	15
	Summary	16
	Key terms	16
	Questions	16

Chapter 4	Currency borrowing or currency deposits	17
	Currency borrowing	17
	Disadvantages of currency borrowing/depositing	19
	A derivative	20
	Summary	20
	Key terms	20
	Questions	21
Chapter 5	The foreign exchange market	23
	Survey of the foreign exchange market	23
	The spot market	24
	Spot market quotation conventions	24
	Key terms	26
	Questions	26
Chapter 6	Forward exchange contracts	27
	Forward exchange contracts – an outline	27
	How to quote a forward rate	28
	Fixed and option forward contracts	30
	Forward contract close-outs	31
	Forward contract extensions	32
	Forward contracts – a contingent liability	33
	Forward rate margin determination	33
	Cost/gain of forward cover	35
	Forward contracts – a derivative	36
	Range forward contracts	39
	Summary	39
	Key terms	40
	Questions	40
Chapter 7	Interest rate risk exposure	43
	Interest rate volatility	43
Chapter 8	Forward/forwards	45
	Determination of forward/forward rates	46
	Summary	47
	Key terms	48
	Questions	48
Chapter 9	Forward or future rate agreements (FRAs)	49
	FRA definition	49
	Contract terms	49
	Creating a hedge with an FRA	50
	Settlement/reference rate	51
	Sale and purchase of FRAs	51
	An FRA in action	52
	FRA settlement rates	53
	FRA compensation formula	53
	Further FRA market details	54
	The bank as FRA market maker	54
	FRA users	55
	FRAs and forward contracts – a comparison	56

	Forward/forward – FRA arbitrage	56
	Summary	57
	Questions	57
Chapter 10	An introduction to futures	59
	Definitions of futures	59
	History of futures	60
	Futures exchanges	61
	Financial futures	62
	Forward delivery contracts ‘to arrive’	63
	Trade in the forward agreement	63
	Buying long and selling short	64
	Futures price and cost of carry	65
	Futures price	66
	Basis and what makes futures prices change	67
	Futures contracts – standardisation	69
	Clearing house and exchange	70
	Margins	73
	Tick	75
	Marking to market	75
	Hedging and speculating with commodity futures	77
	Basis risk	78
	Basis, gains/losses on futures positions	79
	Open interest and volume	80
	Opening and settlement prices	80
	Summary	81
	Key terms	82
	Questions	83
	Further reading	83
Chapter 11	Interest rate futures	85
	Introduction	85
	Interest rate contracts	86
	Definition – interest rate futures	87
	Users of interest rate futures	88
	Bond prices and interest rates	88
	Buying and selling interest rate futures	89
	Price quotes – short-term interest rate futures	90
	Basis point and tick	90
	Futures prices and forward/forward rates	91
	Interest rate futures and basis	91
	Basis and fair value	92
	Cash settlement, EDSP	92
	Futures prices and the yield curve	93
	Interest rate risk management and futures	94
	Hedging short-term interest rates – an introduction	95
	A short hedge, LIFFE Three-month Sterling	95
	A long hedge, CBOT 30-day interest future	98
	Cash market price quotes – bonds	100
	Maturity, coupon and bond price sensitivity	100
	The UK government bond (gilts) market	101
	US Government bond (T-bond) market	101

Deliverable bonds	102	
CTD bonds	102	
Bond conversion factor	102	
Cash equivalent price of bonds	103	
Futures equivalent price of bonds	103	
Invoice amount/EDSP and bond futures	103	
Bond/futures price relationships – cost of carry	104	
Positive/negative cost of carry and bond futures	104	
Bond futures prices in reality	106	
Implied repo rate (IRR) – cost of carry	106	
Rich/cheap futures prices	107	
Contract highlights of the LIFFE		
Long Gilt future, June 1993 delivery		
onwards and newspaper quotes	107	
A short hedge to protect asset values using		
LIFFE Long Gilt futures	108	
A weighted long hedge (US T-bond) using		
conversion factor	109	
Weighted and unweighted hedges	110	
Short weighted hedge – price factor	111	
Weighted hedges – an alternative	112	
Choice of contract – asset and delivery month	113	
Summary	114	
Key terms	115	
Questions	115	
Further reading	116	
Chapter 12	Currency futures	117
	Introduction	117
	Currency futures – a definition	118
	Price quotes – currency futures	118
	Buying long and selling short	118
	Cost of carry – currency futures	120
	Currency futures and interest rate parity	122
	Calculating the swap	123
	Implied repo rate – currency futures	123
	A short hedge	124
	A long hedge	126
	Summary	127
	Key terms	127
	Questions	127
	Further reading	128
Chapter 13	Advanced futures concepts	129
	Introduction	129
	Equivalency/hedge ratio, further considerations	129
	Conversion factor weighting	131
	Bonds and duration	131
	Bonds and BPV	133
	Weighting the hedge with BPV	134
	ER and duration	135
	Convexity and ERs	135

Contract strips	138
Rolling/stack hedge	139
Hedging odd time periods – stubs and tails	139
A cross hedge	140
Futures and portfolio management	142
Changing portfolio duration using futures	143
Summary	144
Key terms	145
Questions	145
Further reading	145
Chapter 14	An introduction to traded options
	147
Definition of options	147
OTC/traded options	148
Puts and calls	149
Strike/exercise price	150
American, European and Asian options	150
History of options	151
Underlying assets	151
Option exchanges	152
Contract specifications	153
Intrinsic value	154
Premium, intrinsic and time value	154
In-, out-, at-the-money	155
Pay-off diagrams	156
Pay-off for a naked long call	158
Pay-off for a naked short call	159
Pay-off for a naked long put	160
Pay-off for a naked short put	161
Summary of naked short and long calls and puts	162
Hedge strategies	163
Covered call writing	163
Protective put buying – to hedge large asset price falls	166
Covered long call – to hedge a rise in price	166
Put–call parity relationship	168
Closing out/off-setting	170
Exercising an option	170
Choice of strike and expiration	171
Spreads, straddles and strangles	171
Spreads	172
Vertical call spreads	172
A bull vertical call spread	172
A bull vertical put spread	173
A bear vertical call spread	174
A bear vertical put spread	176
Horizontal spreads	177
Straddles	177
Strangles	178
Further points	179
Hedging using more complex trading strategies	179
Hedging small price rises using a long bull call spread	180
Hedging small price falls using a long bear put spread	180

	Open interest and volume	181
	Summary	181
	Key terms	183
	Questions	183
	Further reading	184
Chapter 15	Currency options	185
	Introduction	185
	Put and call conventions	187
	Currency option definitions	188
	Currency options on futures	188
	Cross-currency options	189
	Currency option hedging strategies – an outline	190
	Currency options to hedge contingencies	190
	Currency options – what is the best way to hedge currency risk?	191
	Exporter hedging scenarios	191
	Covered at-the-money long call	191
	Covered long out-of-the-money call	192
	Writing a covered at-the-money put	193
	A covered currency bull vertical call spread	194
	A currency zero cost fence/cylinder option	194
	Variations on a cost fence	195
	Currency option premium determination	196
	Currency options and volatility	197
	Currency option premiums and interest rate differentials	197
	American- and European-style currency option intrinsic values	199
	American in-the-money calls and intrinsic value	200
	European in-the-money calls and intrinsic value	200
	American in-the-money puts and intrinsic value	201
	Intrinsic values, more relationships and a summary	202
	Best value – European or American options?	203
	OTC currency options	204
	Summary	204
	Key terms	205
	Questions	205
	Further reading	206
Chapter 16	Interest rate options	207
	Introduction	207
	Why interest rate options on futures?	208
	Puts and calls on underlying futures	208
	Contract highlights – LIFFE option on three-month sterling	211
	Price quotes and intrinsic value for LIFFE Short Sterling options	212
	Put/call parity – LIFFE Short Sterling option	213
	Hedging short-term interest rates with options – an outline	213
	Buying a cap to hedge short-term	

borrowing – a long put	214
Buying a floor to hedge short-term	
lending – a long call	216
An interest rate cap over more than one	
option contract period	217
A short sterling lending collar	219
A short sterling borrowing collar	220
LIFFE Long Gilt futures option contract highlights	221
Price quotes – LIFFE Long Gilt option	222
Hedging long-term interest rates/bond prices	
with options – an outline	223
A long put to hedge falling bond prices	224
A long call to hedge rising bond prices	226
Writing a call	226
Writing a put	228
Hedging uncovered futures with options	230
Summary	231
Key terms	231
Questions	232
Further reading	234
Chapter 17	Option pricing
	235
Introduction	235
Re-cap on intrinsic and time value	236
Option price variables	238
e^{rT} continuous compounding/ e^{-rT} continuous	
discount factor	238
Present value of the exercise rate	239
American calls	240
Option prices and interest rates	240
Put valuations	241
Prices of options on futures	241
Option price and volatility of the underlying	242
Black and Scholes Option Pricing Model	244
BSOPM, a worked example	245
LIFFE option pricing model	246
Implied volatility	247
Sensitivity of option price to changes in key variables	248
Delta (Δ)	248
Gamma (Γ)	249
Theta (Θ)	250
Vega (kappa, lambda or sigma)	250
Summary	251
Key terms	251
Questions	252
Further reading	252
Chapter 18	Interest rate swaps
	253
Interest rate swap definitions	253
Plain vanilla	253
Swaps terminology	255
Dealers and swap quotations	256

	Swaps – a string of FRAs or futures	258
	Swaps – a package of cash market bonds	258
	Comparative advantage	259
	Origin and development of the swap market	260
	Interest rate swap users	261
	Secondary market in swaps	261
	Swaps as a hedging vehicle	262
	Other interest rate swaps	263
	Summary	268
	Key terms	269
	Questions	269
	Further reading	270
Chapter 19	Currency swaps	271
	Introduction	271
	Currency swap definitions	271
	Types of currency swaps	272
	Currency swap basics	272
	Fixed to fixed currency swap	272
	A fixed to floating cross-currency swap	275
	Summary	276
	Key terms	276
	Questions	277
	Further reading	277
Chapter 20	Summary/conclusions	279
	Introduction	279
	Corporate treasury losses	279
	New developments at LIFFE	282
	Single transaction strips	282
	Single transaction butterfly	283
	Serial options	283
	Single trade futures and option strategies	284
	Volume and open interest records for LIFFE contracts as at 31 August 1994	285
	Questions and further study	288
	Further reading	289
Chapter 21	Postscript – Barings Bank	291
	Index	297
