## Preface

xiii

## 1. Some Background

1

- 1.1. Fourier Transforms and the Theory of Distributions, 1
- 1.2. Fourier Transforms of  $L^2$  Functions, 4
  - 1.2.1. Fourier Transforms of Some Well-known Functions, 4
- 1.3. Convolution of Functions, 7
  - 1.3.1. Differentiation of the Fourier Transform, 12
- 1.4. Theory of Distributions, 12
  - 1.4.1. Topological Vector Spaces, 13
  - 1.4.2. Locally Convex Spaces, 21
  - 1.4.3. Schwartz Testing Function Space: Its Topology and Distributions, 23
  - 1.4.4. The Calculus of Distribution, 29
  - 1.4.5. Distributional Differentiation, 31
- 1.5. Primitive of Distributions, 31
- 1.6. Characterization of Distributions of Compact Supports, 32
- 1.7. Convolution of Distributions, 33
- 1.8. The Direct Product of Distributions, 34
- 1.9. The Convolution of Functions, 36
- 1.10. Regularization of Distributions, 39
- 1.11. The Continuity of the Convolution Process, 39
- 1.12. Fourier Transforms and Tempered Distributions, 40
  - 1.12.1. The Testing Function Space  $S(\mathbb{R}^n)$ , 40
- 1.13. The Space of Distributions of Slow Growth  $S'(\mathbb{R}^n)$ , 41

- 1.14. A Boundedness Property of Distributions of Slow Growth and Its Structure Formula, 41
- 1.15. A Characterization Formula for Tempered Distributions, 42
- 1.16. Fourier Transform of Tempered Distributions, 44
- 1.17. Fourier Transform of Distributions in  $D'(\mathbb{R}^n)$ , 49  
Exercises, 51

## 2. The Riemann-Hilbert Problem

54

- 2.1. Some Corollaries on Cauchy Integrals, 54
- 2.2. Riemann's Problem, 56
  - 2.2.1. The Hilbert Problem, 58
  - 2.2.2. Riemann-Hilbert Problem, 58
- 2.3. Carleman's Approach to Solving the Riemann-Hilbert Problem, 58
- 2.4. The Hilbert Inversion Formula for Periodic Functions, 66
- 2.5. The Hilbert Transform on the Real Line, 75
- 2.6. Finite Hilbert Transform as Applied to Aerofoil Theories, 82
- 2.7. The Riemann-Hilbert Problem Applied to Crack Problems, 84
- 2.8. Reduction of a Griffith Crack Problem to the Hilbert Problem, 85
- 2.9. Further Applications of the Hilbert Transform, 86
  - 2.9.1. The Hilbert Transform, 86
  - 2.9.2. The Hilbert Transform and the Dispersion Relations, 86
- Exercises, 87

## 3. The Hilbert Transform of Distributions in $\mathcal{D}'_p, 1 < p < \infty$

89

- 3.1. Introduction, 89
- 3.2. Classical Hilbert Transform, 91
- 3.3. Schwartz Testing Function Space,  $\mathcal{D}_p, 1 < p < \infty$ , 93
  - 3.3.1. The Topology on the Space  $\mathcal{D}_p$ , 93
- 3.4. The Hilbert Transform of Distributions in  $\mathcal{D}'_p, 1 < p < \infty$ , 96
  - 3.4.1. Regular Distribution in  $\mathcal{D}'_p$ , 96
- 3.5. The Inversion Theorem, 97
  - 3.5.1. Some Examples and Applications, 98
- 3.6. Approximate Hilbert Transform of Distributions, 100
  - 3.6.1. Analytic Representation, 103
  - 3.6.2. Distributional Representation of Analytic Functions, 104
- 3.7. Existence and Uniqueness of the Solution to a Dirichlet Boundary-Value Problem, 107

3.8.	The Hilbert Problem for Distributions in $\mathcal{D}'_p$ , 110	
3.8.1.	Description of the Problem, 110	
3.8.2.	The Hilbert Problem in $\mathcal{D}'_p$ , $1 < p < \infty$ , 111	
	Exercises, 113	
<b>4.</b>	<b>The Hilbert Transform of Schwartz Distributions</b>	<b>114</b>
4.1.	Introduction, 114	
4.2.	The Testing Function Space $H(\mathcal{D})$ and Its Topology, 115	
4.3.	Generalized Hilbert Transformation, 116	
4.4.	An Intrinsic Definition of the Space $H(\mathcal{D})$ and Its Topology, 118	
4.5.	The Intrinsic Definition of the Space $H(\mathcal{D})$ , 121	
4.5.1.	The Intrinsic Definition of the Topology of $H(\mathcal{D})$ , 121	
4.6.	A Gel'fand-Shilov Technique for the Hilbert Transform, 121	
4.6.1.	Gel'fand-Shilov Testing Function Space $\Psi$ , 122	
4.6.2.	The Topology of the Space $\Phi$ , 124	
4.7.	An Extension of the Gel'fand-Shilov Technique for the Hilbert Transform, 125	
4.7.1.	The Testing Function Space $S_1$ , 126	
4.7.2.	The Testing Function Space $Z_1$ , 126	
4.7.3.	The Hilbert Transform of Ultradistributions in $Z'_1$ , 127	
4.8.	Distributional Hilbert Transforms in $n$ -Dimensions, 131	
4.8.1.	The Testing Function Space $S_1(\mathbb{R}^n)$ , 131	
4.8.2.	The Testing Function Space $Z_1(\mathbb{R}^n)$ , 131	
4.8.3.	The Testing Function Space $S_\eta(\mathbb{R}^n)$ , 132	
4.8.4.	The Testing Function Space $Z_\eta(\mathbb{R}^n)$ , 132	
4.8.5.	The Strict Inductive Limit Topology of $Z_\eta(\mathbb{R}^n)$ , 132	
	Exercises, 136	
<b>5.</b>	<b><math>n</math>-Dimensional Hilbert Transform</b>	<b>138</b>
5.1.	Generalized $n$ -Dimensional Hilbert Transform and Applications, 138	
5.1.1.	Notation and Preliminaries, 138	
5.1.2.	The Testing Function Space $\mathcal{D}'_p(\mathbb{R}^n)$ , 138	
5.1.3.	The Test Space $X(\mathbb{R}^n)$ , 139	
5.2.	The Hilbert Transform of a Test Function in $X(\mathbb{R}^n)$ , 142	
5.2.1.	The Hilbert Transform of Schwartz Distributions in $\mathcal{D}'_p(\mathbb{R}^n)$ , $p > 1$ , 145	
5.3.	Some Examples, 147	
5.4.	Generalized $(n + 1)$ -Dimensional Dirichlet Boundary-Value Problems, 149	

- 5.5. The Hilbert Transform of Distributions in  $\mathcal{D}'_p(\mathbb{R}^n)$ ,  $p > 1$ ,  
Its Inversion and Applications, 151
- 5.5.1. The  $n$ -Dimensional Hilbert Transform, 152
- 5.5.2. Schwartz Testing Functions Space  $\mathcal{D}(\mathbb{R}^n)$ , 152
- 5.5.3. The Inversion Formula, 153
- 5.5.4. The Topology on the Space  $\mathcal{D}'_p(\mathbb{R}^n)$ , 154
- 5.5.5. The  $n$ -Dimensional Distributional Hilbert Transform, 156
- 5.5.6. Calculus on  $\mathcal{D}'_p(\mathbb{R}^n)$ , 157
- 5.5.7. The Testing Function Space  $H(\mathcal{D}(\mathbb{R}^n))$ , 159
- 5.5.8. The  $n$ -Dimensional Generalized Hilbert Transform, 160
- 5.5.9. An Intrinsic Definition of the Space  $H(\mathcal{D}(\mathbb{R}^n))$   
and Its Topology, 161
- Exercises, 168
- 6. Further Applications of the Hilbert Transform,  
the Hilbert Problem—A Distributional Approach 170**
- 6.1. Introduction, 170
- 6.2. The Hilbert Problem, 174
- 6.3. The Fourier Transform and the Hilbert Transform, 178
- 6.4. Definitions and Preliminaries, 180
- 6.5. The Action of the Fourier Transform on the Hilbert Transform,  
and Vice Versa, 181
- 6.6. Characterization of the Space  $F(S_0(\mathbb{R}^n))$ , 182
- 6.7. The  $p$ -Norm of the Truncated Hilbert Transform, 183
- 6.8. Operators on  $L^p(\mathbb{R}^n)$  that Commute with Translations  
and Dilatations, 186
- 6.9. Functions Whose Fourier Transforms Are Supported on Orthants, 192
- 6.9.1. The Schwartz Distribution Space  $\mathcal{D}'_p(\mathbb{R}^n)$ , 194
- 6.9.2. An Approximate Hilbert Transform and Its Limit in  $L^p(\mathbb{R}^n)$ , 197
- 6.9.3. Complex Hilbert Transform, 202
- 6.9.4. Distributional Representation of Holomorphic Functions, 205
- 6.9.5. Action of the Fourier Transform on the Hilbert Transform, 206
- 6.10. The Dirichlet Boundary-Value Problem, 213
- 6.11. Eigenvalues and Eigenfunctions of the Operator  $H$ , 214  
Exercises, 215
- 7. Periodic Distributions, Their Hilbert Transform and Applications 217**
- 7.1. The Hilbert Transform of Periodic Distributions, 217
- 7.1.1. Introduction, 217

7.2. Definitions and Preliminaries, 222	
7.2.1. Testing Function Space $P_{2\tau}$ , 222	
7.2.2. The Space $P'_{2\tau}$ of Periodic Distributions, 223	
7.3. Some Well-Known Operations on $P'_{2\tau}$ , 228	
7.4. The Function Space $L^p_{2\tau}$ and Its Hilbert Transform, $p \geq 1$ , 228	
7.5. The Inversion Formula, 230	
7.6. The Testing Function Space $Q_{2\tau}$ , 231	
7.7. The Hilbert Transform of Locally Integrable and Periodic Function of Period $2\tau$ , 233	
7.8. Approximate Hilbert Transform of Periodic Distributions, 236	
7.8.1. Introduction to Approximate Hilbert Transform, 237	
7.8.2. Notation and Preliminaries, 238	
7.9. A Structure Formula for Periodic Distributions, 241	
7.9.1. Applications, 245	
Exercises, 247	
<b>Bibliography</b>	<b>249</b>
