List of corresponding authors.	ix
Foreword	xiii
List of abbreviations	xv
Section 1: Biophysical properties and classification	1
Introduction	3
Calcium channel properties in endocrine cells of pituitary origin	5
<i>Clay M. Armstrong</i>	
T-type calcium channels in myocardial cells	16
<i>Bernd Nilius</i>	
Distinctive biophysical and pharmacological features of T-type calcium channels	29
<i>Andrew Randall, Richard W. Tsien</i>	
Multiple types of LVA calcium channel in brain neurons	44
<i>I. Dzhura, A. Eremin, D. Isaev, P. Kostyuk, O. Lyubanova, V. Naidenov, Y. Shuba, A. Tarasenko</i>	
Heterogeneous distribution of LVA and HVA calcium channels in mammalian brain tissue	53
<i>Norio Akaike</i>	
Low-threshold fast-inactivating calcium channels in dendrites of cerebellar Purkinje cells	63
<i>Jean-Louis Bossu, Didier Mougnot, Jean-Luc Dupont, Anne Feltz, Beat H. Gähwiler</i>	
G2 and G3: two different R-type (toxin-resistant) calcium channels coexpressed in rat cerebellar granule cells	72
<i>Angelita Tottene, Lia Forti, Alessandra Moretti, Daniela Pietrobon</i>	
Mg ²⁺ block of LVA and HVA channels: a probe for studying calcium channel structure	80
<i>E. Carbone, H. Zucker, H.D. Lux, V. Carabelli, V. Magnelli, P. Baldelli, G. Aicardi</i>	
Limitations of Ni ²⁺ ions as a tool for discrimination between high- and low-threshold calcium channels	92
<i>Gerald W. Zamponi, Emmanuel Bourinet, Terry P. Snutch</i>	
Section 2: Biological roles in diverse cell types	99
Introduction.	101
What role do T-type calcium channels play in cardiac pacemaker activity?	103
<i>Ming Lei, Hilary Brown, Denis Noble</i>	

Functions of T-type calcium channels in rabbit atrioventricular node and cardiomyopathic hamster ventricle	110
<i>Xinqiang Han, Luyi Sen, Thomas W. Smith</i>	
T-type calcium currents in vascular smooth muscle cells: a role in cellular proliferation?	123
<i>Sylvain Richard, Joël Nargeot</i>	
Physiology, pharmacology and function of LVA calcium channels in hippocampal pyramidal neurons.	133
<i>Daniel Johnston, Robert B. Avery, Jeffrey C. Magee</i>	
Heterogeneity of LVA calcium currents in thalamic neurons and their functional role in burst firing	143
<i>John R. Huguenard</i>	
Ca ²⁺ entry through T-type channels of nerve and muscle	153
<i>Kurt Beam</i>	
T-type calcium channels in floor plate cells of the developing CNS	161
<i>F. Frischknecht, A. Randall</i>	
Angiotensin II stimulates aldosterone secretion by two distinct mechanisms that modulate LVA T-type calcium channels	168
<i>Paula Q. Barrett, Hong-Kai Lu, Robert J. Fern</i>	
Distinct functions of T- and L-type calcium channels during activation of aldosterone production in adrenal glomerulosa cells.	176
<i>Michel F. Rossier, Muriel M. Burnay, Alessandro M. Capponi</i>	
Control of secretion in chromaffin cells from normal and spontaneously hypertensive rats	186
<i>Lars Cleemann, Jing Fan, Martin Morad</i>	
Section 3: Molecular biological approaches to calcium channel diversity	203
Introduction.	205
Localisation and function of brain calcium channels	207
<i>William A. Catterall, Ruth E. Westenbroek, Stefan Herlitze, Charles T. Yokohama</i>	
Human neuronal voltage-gated calcium channels: splice variants, subunit interactions and subtypes.	218
<i>Michael M. Harpold, Mark E. Williams, Paul F. Brust, Ken Stauderman, Arturo Urrutia, Edwin C. Johnson, Michael Hans</i>	
Structural determinants of calcium channel β subunit function.	229
<i>Hongyan Liu, Kevin P. Campbell</i>	
Two splice variants of human L-type calcium channels with different inactivation properties	244
<i>R.D. Zühlke, N.M. Soldatov, A. Bouron, H. Reuter</i>	

α_{1E} : an orphan calcium channel?	251
<i>Emmanuel Bourinet, Gerald Zamponi, Joël Nargeot, Terry P. Snutch</i>	
Studies on the regulation of the human neuronal α_{1E} calcium channel by β and $\alpha_2\delta$ subunits	258
<i>Lutz Birnbaumer, Ning Qin, Riccardo Olcese, Erwin Tareilus, Enrico Stefani</i>	
Properties and modulation of T-type currents in dorsal root ganglia and ND7-23 cells: comparison with α_{1E} currents expressed in COS-7 cells	269
<i>Annette C. Dolphin</i>	
Does α_{1E} code for T-type calcium channels? A comparison of recombinant α_{1E} calcium channels with GH3 pituitary T-type and recombinant α_{1B} calcium channels	279
<i>David M. Rock, William A. Horne, Sally J. Stoehr, Chica Hashimoto, Mei Zhou, Ruth Cong, Andrew Palma, Debra Hidayetoglu, James Offord</i>	
Molecular characterisation of T-type calcium channels.	290
<i>Edward Perez-Reyes, Leanne L. Cribbs, Asif Daud, Jie Yang, Antonio E. Lacerda, Jane Barclay, Magali P. Williamson, Margaret Fox, Michele Rees, Jung-Ha Lee</i>	
Section 4: Regulation, modulation and novel pharmacology	307
Introduction.	309
Charges per channel in calcium channels: effect of regulatory β subunit coexpression on α_1 pore-forming subunit currents.	311
<i>Francesca Noceti, Riccardo Olcese, Pietro Baldelli, Ning Qin, Lutz Birnbaumer, Enrico Stefani</i>	
T-type calcium channels and G proteins in cardiac cells	324
<i>G. Vassort, J. Alvarez</i>	
Regulation of human neuronal calcium channels by receptors and G proteins	332
<i>Lee R. Shekter, Louis H. Philipson, Hyewhon Rhim, Peter T. Toth, Richard J. Miller</i>	
Regulation of the density of T-type calcium current by growth hormone and insulin-like growth factor 1 in atrial myocytes.	343
<i>Philip M. Best, Chien-Chang Chen, Xiaoping Xu</i>	
Molecular basis of drug interactions with calcium channels: a constructive approach	351
<i>J. Mitterdorfer, S. Hering, S. Aczel, S. Berjukow, V. Degtiar, F. Döring, M. Grabner, R. Kraus, M.J. Sinnegger, J. Striessnig, Z. Wang, H. Glossmann</i>	
Block of L- and T-type calcium channels in vascular muscle cells by mibefradil	366
<i>Kent Hermsmeyer</i>	

Interaction of mibefradil with T- and L-type calcium channels. 378
Norbert Klugbauer, Xiangang Zong, Franz Hofmann

Selective block of myocardial T-type calcium channels by mibefradil:
a comparison with the 1,4-dihydropyridine amlodipine. 386
Agnes Benardeau, Eric A. Ertel
