

# Table of Contents

Foreword: The Nephrology Side <i>Robert W. Schrier</i>	xvii
Foreword: The Intensive Care Side <i>Ake Grenvik</i>	xix
Preface <i>Claudio Ronco and Rinaldo Bellomo</i>	xxi
List of Contributors	xxiii
<b>Section 1: The Critically Ill Patient</b> Section Editor: <i>Michael R. Pinsky</i>	
1. Applied cardiovascular physiology <i>Michael R. Pinsky</i>	1
2. Fundamentals of resuscitation <i>John J. Brady and Michael R. Pinsky</i>	9
3. Prediction of outcome in critically ill patients <i>Gilles Clermont and Derek C. Angus</i>	19
4. Rationale and application of physiologic monitoring <i>Michael R. Pinsky</i>	33
5. Pharmacologic support of the hemodynamically unstable patient <i>Navdeep K. Mehta and Michael R. Pinsky</i>	43
<b>Section 2: Elements of Basic Sciences</b> Section Editors: <i>Claudio Ronco and Hans Joachim Weber</i>	
1. Fundamentals of applied probability and basic statistics <i>Gerhard Dikta</i>	51
2. Applied physics of compressible and incompressible fluids <i>Hans Joachim Weber</i>	63
3. Elements of applied immunology for the intensive care unit and chronic uremia-related disorders <i>Béatrice Descamps-Latscha and Paul Jungers</i>	85

4. Basic elements of applied microbiology in the intensive care unit <i>Stephen I. Vas</i>	103
5. Basic elements of applied pharmacology in the intensive care unit <i>Michael F. Flessner</i>	111
6. Fundamentals of biochemistry and energy metabolism in the normal subject and in the critically ill patient <i>Xavier M. Leverve and Noël Cano</i>	125
<b>Section 3: Epidemiology of Kidney Diseases in the Intensive Care Unit</b>	
Section Editor: <i>David Bihari</i>	
1. Epidemiology of acute renal failure in the intensive care unit <i>Ian C. Abbs and J. Stewart Cameron</i>	133
2. Risk factors for acute renal failure in critically ill patients <i>Dieter Kleinknecht</i>	143
3. Assessment of outcome from acute renal failure <i>Kathleen Daly and David Bihari</i>	153
<b>Section 4: Fluid and Electrolyte Problems in the Intensive Care Unit and Acute Renal Failure</b>	
Section Editors: <i>Francesco Locatelli and Lambert G. Thijs</i>	
1. Regulatory mechanisms of fluid and electrolyte turnover <i>Reinold O. B. Gans and Pieter M. ter Wee</i>	163
2. Edematous states in the intensive care unit <i>Walther H. Boer and Hein A. Koomans</i>	175
3. Hypernatremia and hyponatremia <i>Lambert G. Thijs</i>	183
4. Hyper- and hypokalemia in critical patients <i>Bruno Redaelli and Giovanna Bonoldi</i>	197
5. Calcium phosphate and magnesium balance in patients with acute illness <i>Giuseppe Pontoriero, Francesco Locatelli and Eberhard Ritz</i>	211
6. Trace metals in patients with acute renal failure <i>Patrick C. D'Haese and Marc E. De Broe</i>	225
7. Fluid and electrolyte balance during peritoneal dialysis <i>Raymond T. Krediet</i>	231
8. Fluid and electrolyte balance during extracorporeal therapies <i>Francesco Locatelli, Salvatore Di Filippo and Giuseppe Pontoriero</i>	249
<b>Section 5: Acid-base Problems in the Critically Ill</b>	
Section Editors: <i>Mariano Feriani and John A. Kellum</i>	
1. Biochemical and biophysical principles of hydrogen ion regulation <i>Martine Leblanc and John A. Kellum</i>	261

2. Pathophysiology of metabolic acid-base disturbances in patients with critical illness <i>Sheldon Magder</i>	279
3. Pathophysiology and diagnosis of respiratory acid-base disturbances in patients with critical illness <i>Luciano Gattinoni and Alfredo Lissoni</i>	297
4. Impact of acid-base disorders on individual organ systems <i>David M. Forrest, Keith R. Walley and James A. Russell</i>	313
5. Correction of acid-base derangements <i>Aaron Spital and Serafino Garella</i>	327
6. Acid-base balance during renal replacement therapies <i>Mariano Feriani</i>	345
<b>Section 6: Metabolism in the Critically Ill Patient with and without Acute Renal Failure</b> Section Editors: <i>Jonas Bergstrom and Gaetano Iapichino</i>	
1. Carbohydrate, lipid and protein metabolism in the critically ill patient <i>Peter Fürst</i>	355
2. Nutritional management of the critically ill patient with and without renal failure <i>Peter Bárány and Anders Alvestrand</i>	375
3. Hormonal status in critically ill patients with or without acute renal failure <i>Peter Stenvinkel</i>	391
4. Enteral and parenteral nutrition in patients undergoing continuous renal replacement therapies <i>Gaetano Iapichino, Danilo Radrizzani and Andrea Noto</i>	405
<b>Section 7: Infections in Intensive Care Patients</b> Section Editors: <i>Fausto de Lalla and Peter Linden</i>	
1. Microbiological considerations in intensive care <i>Silvano Esposito</i>	413
2. Upper and lower respiratory tract infection <i>Peter Linden</i>	421
3. Urinary tract infections <i>Martine Leblanc</i>	441
4. Intestinal and peritoneal infections <i>Mario Cruciani, Marina Malena and Fausto de Lalla</i>	455
5. Skin and soft tissue infections <i>Mario Cruciani and Fausto de Lalla</i>	461
6. Intravascular catheter infections in the intensive care unit <i>Giampietro Pellizzer and Fausto de Lalla</i>	469
7. Antibiotics in intensive care patients <i>Fausto de Lalla and Mario Cruciani</i>	479

**Section 8: The Kidney in Sepsis**Section Editors: *Giuseppe Remuzzi and Jean-Louis Vincent*

1. Pathophysiology of the sepsis syndrome 495  
*Jean-Louis Vincent*
2. Influence of cytokines on the renal circulation and nephron function 503  
*Jeffrey R. Schelling and John R. Sedor*
3. Renal alterations in the septic patient 517  
*Jane Goddard and Allan D. Cumming*
4. Endothelial dysfunction in acute renal failure 527  
*Anupam Agarwal and Leopoldo Raij*
5. Role of eicosanoids in sepsis-induced acute renal failure 551  
*Bertrand Guidet and Laurent Baud*
6. The role of oxygen free radicals in acute renal failure 557  
*Mark S. Paller*
7. Nitric oxide as a mediator of hemodynamic disturbances in acute renal failure associated with sepsis 557  
*Marina Noris*

**Section 9: Acute Renal Failure 1**Section Editors: *Andrew Bersten and Giovanni Camussi*

1. Acute renal failure—definitions and diagnosis 591  
*Allan D. Cumming*
2. Hemodynamic factors influencing renal blood flow 599  
*Andrew D. Bersten and Andrew W. Holt*
3. Tubuloglomerular feedback and its role in acute renal failure 613  
*Hartmut Osswald and Volker Vallon*
4. The histopathology of acute renal failure 623  
*Lorraine C. Racusen*
5. The immune system and the kidney 631  
*Luigi Biancone, Donato Donati, Luigi Gastaldi and Giovanni Camussi*
6. Vasculitis, glomerulonephritis and acute renal failure 651  
*Judy Savige*

**Section 10: Acute Renal Failure 2**Section Editors: *Vittorio Emanuele Andreucci and Eberhard Ritz*

1. Drug-induced acute renal failure 669  
*Giuseppe Conte, Vincenzo Bellizzi, Luca De Nicola and Vittorio Emanuele Andreucci*

2. Post-surgery/Polytrauma and acute renal failure <i>Adrian Iaina and Gari Peer</i>	683
3. Fluid and electrolyte disorders and renal function impairment after burns <i>Vittorio Emanuele Andreucci, Giorgio Fuiano and Michele Andreucci</i>	693
4. Acute obstructive nephropathy <i>Saulo Klahr</i>	705
5. Acute renal failure in pregnancy and postpartum <i>Jacques Bernheim and Eduardo Podjarny</i>	713
6. Hantavirus-induced acute renal failure <i>Martin Zeier, Lothar Zöller and Eberhard Ritz</i>	729
7. Rhabdomyolysis <i>Aldo Fabris, Maria Valentina Pellanda and Claudio Gardin</i>	739
8. Acute renal dysfunction after renal transplantation <i>Martin Zeier, Stephan R. Orth and Eberhard Ritz</i>	749
9. Acute renal failure in human immunodeficiency virus disease <i>T. K. Sreepada Rao and Eli A. Friedman</i>	761
 <b>Section 11: Acute Renal Failure 3</b>	
Section Editor: <i>Allen R. Nissenson</i>	
1. Clinical features of acute renal failure syndrome <i>James Y. Shin and Robert E. Cronin</i>	773
2. Bleeding and hemostatic defects in uremia <i>Geoffrey A. Block and Richard D. Swartz</i>	783
3. Gastrointestinal problems in acute renal failure <i>May T. Chow, Vasant C. Gandhi, Todd S. Ing and David J. Leehey</i>	793
4. Cardiovascular problems in acute renal failure <i>Edwin A. Rutsky and Stephen G. Rostand</i>	803
5. Acute renal failure as part of the multiple organ failure syndrome (MOF) <i>Andre A. Kaplan</i>	807
6. Acute renal failure in children and newborns: pathophysiology, clinical patterns and therapeutic approach <i>Charles I. Stewart, Frederick J. Kaskel and Richard N. Fine</i>	821
7. Metabolic perturbations in patients with acute renal failure <i>Wilfred Druml</i>	831
8. Neurological problems in acute renal failure <i>Cosmo L. Fraser and Allen I. Arieff</i>	839

**Section 12: Uremic Toxins**Section Editors: *Walter Hörl and Raymond Vanholder*

- |   |     |
|---|-----|
| 1. Pathogenesis of uremic toxicity<br><i>Raymond Vanholder</i>          | 845 |
| 2. Low molecular weight uremic toxins<br><i>Raymond Vanholder</i>       | 855 |
| 3. High molecular weight uremic toxins<br><i>Walter H. Hörl</i>         | 869 |
| 4. AGE-modified proteins in renal failure<br><i>Marianne Haag-Weber</i> | 877 |

**Section 13: Acute Intoxication and Poisoning**Section Editors: *James F. Winchester and Angelo M. Taveira-Da Silva*

- |  |     |
|--|-----|
| 1. Principles of management of the poisoned patient<br><i>Angelo M. Taveira-Da Silva</i>         | 885 |
| 2. Antidotes for acute poisoning and intoxication<br><i>Charles A. Read</i>                      | 897 |
| 3. Drug intoxication: manifestations and treatment<br><i>Sayeed Qazi and James F. Winchester</i> | 907 |

**Section 14: The Liver and the Kidney**Section Editor: *John A. Kellum*

- |   |     |
|---|-----|
| 1. Liver–kidney interaction<br><i>Edmund Bourke</i>   | 919 |
| 2. The kidney in liver disease<br><i>Vicente Arroyo, Pau Sort and Pere Ginés</i>              | 927 |
| 3. The liver in kidney disease<br><i>John J. Brady and John A. Kellum</i>                     | 941 |
| 4. The kidney in liver transplantation<br><i>John P. Johnson and Paul M. Palevsky</i>         | 949 |
| 5. Extracorporeal liver support and the kidney<br><i>Norman L. Sussman and James H. Kelly</i> | 959 |

**Section 15: The Heart and the Kidney**Section Editors: *Didier Journois and Volker Witzemann*

- |  |     |
|--|-----|
| 1. Cardiovascular system in renal failure: cardiac complications in renal failure<br><i>Volker Witzemann</i> | 969 |
| 2. Arterial function in renal failure<br><i>Gérard M. London</i>   | 975 |

3. The kidney in cardiac failure: today's perspective 983  
*Peter Gross, Martin Schadt, Jens Passauer, Dierk Werner, Eckhart Büsselmaker*
4. Hypertensive emergencies 1003  
*Karel M. L. Leunissen and Jeroen P. Kooman*
5. Prophylaxis of acute renal failure before and during open heart surgery 1021  
*Hilary P. Grocott and Robert N. Sladen*

### **Section 16: The Lung and the Kidney**

Section Editor: *Hilmar Burchardi*

1. Pulmonary edema and other disorders in acute renal failure 1037  
*Kenneth W. Presberg and Richard M. Effros*
2. Acute renal failure in acute respiratory distress syndrome 1047  
*Daniel P. Schuster and David Windus*
3. Effects of mechanical ventilation on kidney function 1055  
*Hilmar Burchardi*
4. The kidney: a target organ during mechanical ventilation 1067  
*Martin O. Krebs and Gabriele Kaczmarczyk*
5. Kidney function during extracorporeal lung assist techniques (ECMO/ECCO2R) 1073  
*Mark J. Heulitt and James Marshall*

### **Section 17: The Brain and the Kidney**

Section Editor: *Alex M. Davison*

1. Neurological disorders in patients with acute renal failure 1081  
*Andrew Davenport*
2. Brain death and organ donation 1105  
*J. Peter A. Lodge and Mark C. Bellamy*

### **Section 18: Supportive Renal Therapy in the Critically Ill Patient**

Section Editors: *Rinaldo Bellomo and Claudio Ronco*

1. Supportive management strategies in chronic or end stage renal failure patients with critical illness 1125  
*Paul M. Palevsky*
2. The use of inotropic and vasopressor agents in patients at risk of renal dysfunction 1133  
*Rinaldo Bellomo and Claudio Ronco*
3. Renal replacement therapy in patients with chronic (end stage) renal failure and acute illness 1139  
*Miet Schetz*
4. Pharmacologic therapy in acute renal failure: the role of diuretics 1155  
*John A. Kellum and Abdul K. Garuba*

**Section 19: Continuous Renal Replacement Therapy (CRRT)**Section Editors: *Rinaldo Bellomo and Claudio Ronco*

1. History and development of continuous renal replacement therapy (CRRT) 1161  
*Heinz-Günther Sieberth*
2. Nomenclature for continuous renal replacement therapies 1169  
*Claudio Ronco and Rinaldo Bellomo*
3. Vascular access for continuous renal replacement therapy 1177  
*Vanita Jassal and Andreas Pierratos*
4. The extra-corporeal circuit: physical principles and monitoring 1189  
*Randall D. Jenkins*
5. Anticoagulation for continuous renal replacement therapies 1199  
*Ravindra L. Mehta*
6. Principles of solute clearance during continuous renal replacement therapy 1213  
*Claudio Ronco and Rinaldo Bellomo*
7. Continuous versus intermittent renal replacement therapy in the critically ill 1225  
*William Silvester, Rinaldo Bellomo and Claudio Ronco*
8. Removal and generation of inflammatory mediators during continuous renal replacement therapies 1239  
*Ciro Tetta, Filippo Mariano, Claudio Ronco and Rinaldo Bellomo*
9. Removal of drugs, toxins and poisons by continuous hemofiltration 1249  
*Thomas A. Golper and Michael A. Marx*
10. Non-renal indications of continuous renal replacement therapies 1259  
*Didier Journois and Eric Playe*
11. Current technology for continuous renal replacement therapies 1269  
*Claudio Ronco, Alessandra Brendolan and Rinaldo Bellomo*
12. Nursing issues, practices and perspectives for the management of continuous renal replacement therapy in the intensive care unit 1309  
*Ian C. Baldwin, Nicholas P. Bridge and Tania D. Elderkin*
13. Guidelines for drug dosing during continuous renal replacement therapies 1327  
*Jonathan N. Buckmaster and Andrew R. Davies*
14. Acute renal failure in infancy: treatment by continuous renal replacement therapy 1335  
*Claudio Ronco and Rinaldo Bellomo*
15. Complications of continuous renal replacement therapies 1351  
*Claudio Ronco and Rinaldo Bellomo*

**Section 20: Peritoneal Dialysis in the Intensive Care Unit**Section Editors: *Giuseppe La Greca and Ram Gokal*

1. Principles of peritoneal dialysis and its application in acute renal failure 1357  
*Norbert Lameire*

2. Indications, contraindications and complications of peritoneal dialysis in the critically ill  
*Sharad Goel, Rajiv Saran and Karl D. Nolph* 1373

### **Section 21: Intermittent Hemodialysis in the Intensive Care Unit**

Section Editors: *Juan P. Bosch and Bernard Canaud*

1. Rationale for intermittent renal replacement therapy (IRRT) in acute renal failure (ARF)  
*Bernard Canaud, Hélène Leray-Moragues, Laurie Garred, Martine Leblanc and Charles Mion* 1383
2. Biophysics of intermittent renal replacement therapy  
*Laurie Garred, Bernard Canaud and Jean-Yves Bosc* 1391
3. Intermittent renal replacement modalities and indications  
*Bernard Canaud, Martine Leblanc, Laurie Garred, Charles Mion and Juan P. Bosch* 1411
4. Vascular access for intermittent renal replacement therapy  
*Hélène Leray-Moragues, Martine Leblanc and Bernard Canaud* 1421
5. Antithrombotic management of the blood circuit in intermittent renal replacement therapy  
*Philippe Morinière, Bertrand deCagny, Najeh El Esper, Jean M. Achard, Pierre F. Westeel and Albert Fournier* 1427
6. Risks and hazards of intermittent renal replacement therapy  
*Kada Klouche and Jean J. Béraud* 1441
7. Drug administration in intermittent renal replacement therapy  
*Miet Schetz* 1457
8. Nutritional requirements in critically ill patients treated with intermittent renal replacement therapy  
*Kada Klouche and Jean J. Béraud* 1473

### **Section 22: Imaging of the Kidney and Urinary Tract in Acute Renal Failure**

Section Editor: *Zoltan H. Endre*

1. Imaging of the kidney in the critically ill  
*Guglielmo Fodor and Bruno Giacon* 1491
2. Radionuclide scanning in critical care nephrology  
*Joseph C. H. Wong* 1503
3. Magnetic resonance imaging and spectroscopy in critical care nephrology  
*Zoltán H. Endre* 1517

### **Section 23: Special Problems in the Intensive Care Unit**

Section Editor: *Haskel Eliahou*

1. Acute renal failure scoring  
*Fernando Liaño, Kim Solez, Haskel Eliahou and Dieter Kleinknecht* 1535
2. Acute illness superimposed on chronic renal failure  
*Eric Hoste, Norbert Lameire and Raymond Vanholder* 1547
3. The diabetic with acute renal failure in the intensive care unit  
*Pesach Segal and Haskel Eliahou* 1559

4. Prevention, amelioration and conservative therapy of acute renal failure in the elderly <i>Haskel Eliahou, Norbert Lameire, Raymond Vanholder and Eric Hoste</i>	1565
Index	1577
