

Contents in Brief

Part I Information Systems Basics

Chapter 1	Information Systems: An Overview	3
Chapter 2	Hardware and Software Concepts	33
Chapter 3	Database Concepts	67
Chapter 4	Organizational, Social and Legal Impacts of Information Systems	95

Part II Data Communications and The Internet

Chapter 5	Data Communications Concepts	125
Chapter 6	Security Issues and Measures	149
Chapter 7	The Information Superhighway and Global Information Systems	173
Chapter 8	The Intranet: The Internet of Your Own	215

Part III Building and Utilizing Effective Information Systems

Chapter 9	Tools and Techniques for Building Information Systems	245
------------------	---	-----

Chapter 10	Total Quality Management and Information Systems Reengineering	275
Chapter 11	Building Effective Information Systems in Functional Areas	305

Part IV

Information Systems in Action

Chapter 12	Electronic Data Interchange (EDI): A New Strategic Tool	339
Chapter 13	Decision Support and Executive Information Systems	367
Chapter 14	Group Support Systems: Collaborative Computing Has Started	399
Chapter 15	Geographic Information Systems	431
Chapter 16	Multimedia and Virtual Reality Information Systems	461

Part V

Emerging Technologies and Applications in the Information Systems Environment

Chapter 17	Applied Artificial Intelligence: What Is Really Involved?	487
Chapter 18	Expert Systems Development: Putting Theory to Work	519
Chapter 19	Fuzzy Logic and Hybrid Systems: Managing Imprecise Data	551
Chapter 20	Neural Networks: Computers That Learn By Doing	575
Chapter 21	Natural Language Processing: The Ultimate User/System Interface	601
	Index	635

Part I **Information Systems Basics**

Chapter 1

Information Systems: An Overview

Learning Objectives	1	
1-1 Introduction	4	
1-2 Computer-Based Information Systems (CBISs)		4
1-3 A CBIS Model	5	
1-3-1 Data	5	
1-3-2 Database	7	
1-3-3 Process	8	
1-3-4 Information	8	
1-3-5 Information Systems Life Cycle		9
1-3-6 Environment	10	
1-3-7 Design Specifications		10
1-4 Classes of CBISs	11	
1-4-1 Electronic Data Processing (EDP)		12
1-4-2 Management Information Systems (MISs)		13
1-4-3 Decision Support Systems (DSSs)		13
1-4-4 Executive Information Systems (EISs)		14
1-5 Comparative Analysis of EDP, MISs, DSSs, and EISs		15

1-6 Other Classes of Information Systems	16
1-6-1 Group Support Systems (GSSs)	17
1-6-2 Geographic Information Systems (GISs)	18
1-7 The Artificial Intelligence (AI) Era	19
1-8 AI-Related Technologies	20
1-8-1 Expert Systems	20
1-8-2 Natural Language Processing (NLP)	21
1-8-3 Robotics	22
1-8-4 Neural Networks	23
1-8-5 Fuzzy Logic	24
1-8-6 Intelligent Agents	25
1-9 Do Computers Think?	26
1-10 Will Computers Replace Us?	27
1-11 The Importance of CBISs	27
1-12 Future Outlook	28
Summary	29
Review Questions	29
Projects	30
Key Terms	31
References	31

Chapter 2

Hardware and Software Concepts

Learning Objectives	33
2-1 Introduction	34
2-2 Input Devices	34
2-2-1 Keyboard	34
2-2-2 Touch Screen	35
2-2-3 Light Pen	35
2-2-4 Mouse	36
2-2-5 Trackball	36
2-2-6 Data Tablet	36
2-2-7 Bar Code Reader	36
2-2-8 Optical Character Reader	36
2-3 Output Devices	37
2-4 Memory Devices	37
2-4-1 Main Memory Devices	41
2-4-2 Secondary Memory Devices	43
2-5 Classes of Computers	44
2-6 Defining a Computer Program	44

2-7	Operating Systems	47	
2-8	Application Software for Microcomputers		47
2-8-1	Word Processing Software	48	
2-8-2	Spreadsheet Software	49	
2-8-3	Database Software	50	
2-8-4	Graphics Software	51	
2-8-5	Communications Software	51	
2-8-6	Desktop Publishing Software	52	
2-8-7	Financial Planning Software	53	
2-8-8	Accounting Software	54	
2-8-9	Project Management Software	54	
2-8-10	Computer-Aided Design (CAD) Software		54
2-8-11	Other Popular Software for Microcomputers		55
2-9	Computer Languages	55	
2-10	High-Level Languages	57	
2-10-1	FORTRAN	57	
2-10-2	COBOL	58	
2-10-3	BASIC	59	
2-10-4	PASCAL	60	
2-10-5	C	60	
2-10-6	Java	61	
	Summary	63	
	Review Questions	63	
	Projects	64	
	Key Terms	65	
	References	65	

Chapter 3

Database Concepts

	Learning Objectives	67	
3-1	Introduction	68	
3-2	What Is a Database?	68	
3-3	Types of Data in the Information Systems Environment		70
3-4	Database Design: An Overview	70	
3-5	Database Design: A Functional View	72	
3-6	Issues Related to the Data Component of a Database		73
3-7	Conceptual Design of a Database	75	
3-7-1	The Relational Model	75	
3-7-2	The Hierarchical Model	77	
3-7-3	The Network Model	79	

3-8 Database Administrator	80
3-9 Methods for Accessing Files and Databases	81
3-10 Querying a Database	82
3-11 New Trends in Database Design and Utilization	82
3-11-1 Distributed Database	83
3-11-2 Client/server Database	87
3-11-3 Object-Oriented Database	87
3-11-4 Database Machines	90
Summary	90
Review Questions	91
Projects	93
Key Terms	94
References	94

Chapter 4

Organizational, Social, and Legal Impacts of Information Systems

Learning Objectives	95
4-1 Introduction	96
4-2 Negative Effects of Information Systems: An Overview	96
4-2-1 Information Systems Effects on the Workplace	96
4-2-2 Privacy Issues	98
4-2-3 Computer Crime and Fraud	100
4-2-4 Health Issues	101
4-3 Information System Impacts on the Organization Structure and Function	103
4-3-1 Information System Impacts on the Organization's Traditional Structure	103
4-3-2 Telecommuting: Reducing the Organization's Physical Size	105
4-3-3 Virtual Organization: Breaking the Traditional Barriers	109
4-3-4 Information System Impacts on Middle Management	110
4-3-5 Information Systems and Decentralization	111
4-4 Social and Legal Issues of Information Systems	112
4-4-1 Copyrights, Patents, and Piracy	112
4-4-2 Legal Issues of Expert Systems	115
Summary	118
Review Questions	118
Projects	120

Key Terms	120
References	120

Part II

Data Communications and the Internet

Chapter 5

Data Communications Concepts

Learning Objectives	125
5-1 Introduction	126
5-2 Defining Data Communications	126
5-3 Components of a Data Communications System	127
5-3-1 Sender and Receiver Devices	127
5-3-2 Modems	127
5-3-3 Communications Media	129
5-3-4 Communications Software	131
5-3-5 Communications Control Unit	131
5-4 Data Processing Configurations	131
5-4-1 Centralized	131
5-4-2 Decentralized	133
5-4-3 Distributed Data Processing	133
5-5 Important Concepts in Data Communications	134
5-6 Network Types	136
5-7 Network Topologies	137
5-7-1 Star Network	137
5-7-2 Ring Network	138
5-7-3 Bus Network	138
5-7-4 Tree Network	138
5-7-5 Web Network	141
5-8 Applications of Data Communications	141
5-9 PBX Network	143
5-10 ISDN Network	144
5-11 Summary	145
Review Questions	145
Projects	146
Key Terms	147
References	147

Chapter 6

Security Issues and Measures

Learning Objectives	149	
6-1 Introduction	149	
6-2 What Is Computer Security Anyway?		150
6-3 Security Issues and Considerations		151
6-4 Intentional Computer Threats	152	
6-5 Security Measures	155	
6-5-1 General System Security		156
6-5-2 Physical Security	161	
6-5-3 Software Security	162	
6-6 Guidelines for a Comprehensive Security System		165
6-7 Preparing for a Disaster	167	
6-8 Steps to Take When Disaster Strikes	169	
Summary	169	
Review Questions	169	
Projects	170	
Key Terms	171	
References	172	

Chapter 7

The Information Superhighway and Global Information Systems

Learning Objectives	173	
7-1 Introduction	174	
7-2 The Information Superhighway: An Overview		174
7-3 Internet Access Options	175	
7-4 Domain Name Systems	177	
7-5 Navigational Tools	179	
7-6 Basic Terminology	181	
7-7 Netiquette	183	
7-8 Internet Services	183	
7-8-1 Electronic Mail (E-mail)		183
7-8-2 News Groups and Discussions		184
7-8-3 Transferring Files with FTP		184
7-8-4 Telnet	184	
7-8-5 Internet Relay Chat (IRC)		185
7-9 Internet Applications	185	

7-9-1	Marketing	185	
7-9-2	Online Employment	188	
7-9-3	Banking	188	
7-9-4	Online Software	189	
7-9-5	Politics	190	
7-9-6	Healthcare	190	
7-9-7	Miscellaneous Applications	191	
7-10	Global Information Systems: An Overview	192	
7-11	Definitions and Requirements of Global Computer-Based Information Systems (GCBISs)	194	
7-12	Components of a Global Information System	197	
7-13	Organizational Structure and Global Information Systems		199
7-14	Global Information Systems in Action	201	
7-14-1	Digital Equipment Corporation	201	
7-14-2	Frank Russell Corporation	203	
7-15	Obstacles in Designing Global Information Systems		203
7-16	Economic Issues	205	
7-17	Social Implications	207	
7-18	Future Development	208	
	Summary	209	
	Review Questions	209	
	Projects	210	
	Key Terms	211	
	References	211	

Chapter 8

The Intranet: The Internet of Your Own

	Learning Objectives	215	
8-1	Introduction	216	
8-2	Internet versus Intranet	216	
8-3	What Is an Intranet?	217	
8-4	What Are Extranets?	220	
8-5	Developing an Intranet Site	220	
8-5-1	Problem Definition	221	
8-5-2	Cost and Benefit Analysis	221	
8-5-3	Formation of the Task Force	222	
8-5-4	Construction of a Prototype: Pilot Implementation		223
8-5-5	Assessing the Security and Privacy Issues	224	
8-5-6	Tool Selection	225	
8-5-7	Implementation	226	

8-5-8 Postimplementation Audit: Intranet Site Marketing	230
8-6 Intranet versus GroupWare	232
8-7 Applications of the Intranet: An Overview	233
8-8 Training Applications of the Intranet	235
8-9 Major Business Function Applications of the Intranet	237
8-10 Applications of the Intranet by Major Companies	237
Summary	238
Review Questions	239
Projects	240
Key Terms	240
References	241

Part III

Building and Utilizing Effective Information Systems

Chapter 9

Tools and Techniques for Building Information Systems

Learning Objectives	245
9-1 Introduction	246
9-2 The Classic Life-Cycle Approach	246
9-2-1 Problem Definition	246
9-2-2 Feasibility Study	248
9-2-3 Systems Analysis	250
9-2-4 Systems Design	251
9-2-5 Systems Implementation	251
9-2-6 Postimplementation Audit	255
9-3 Product Life-Cycle Approach	255
9-3-1 Introduction	257
9-3-2 Growth	257
9-3-3 Maturity	257
9-3-4 Decline	258
9-4 Product Life-Cycle and Information Systems	
Design Considerations	259
9-4-1 User	259
9-4-2 Technology	260
9-4-3 Top Management	260
9-4-4 Environment	260

9-5 Monitoring Mechanisms for Information Systems Implementation	261	
9-6 Rapid System Development	262	
9-6-1 Computer-Assisted Systems Engineering		262
9-6-2 Prototyping	263	
9-7 Systems Analysis and Design: An Integrated Approach		266
9-7-1 Problem Definition	267	
9-7-2 Formation of the Task Force	267	
9-7-3 Construction of an Online Prototype		267
9-7-4 Evaluation	268	
Summary	270	
Review Questions	270	
Projects	271	
Key Terms	272	
References	272	

Chapter 10

Total Quality Management and Information Systems Reengineering

Learning Objectives	275	
10-1 Introduction	276	
10-2 Total Quality Management (TQM): An Overview		276
10-3 Principles of Total Quality Management		277
10-3-1 Visions and Values	279	
10-3-2 Commitment and Participation		280
10-3-3 Quality Measurement	280	
10-3-4 Continuous Improvement	281	
10-3-5 Human Resource Development		282
10-3-6 Rewards	283	
10-3-7 Technology and Systems	283	
10-4 Information Systems Role in TQM Implementation		284
10-5 TQM Role in Information Systems Design and Implementation	287	
10-5-1 Continuous Improvement in Information Systems		289
10-5-2 TQM Techniques for Information Systems Development	290	
10-5-3 TQM and CASE Tools	291	
10-5-4 TQM and Group Decision Support Systems		293
10-6 Business Process Reengineering	293	

10-6-1	Why Reengineering?	294	
10-6-2	The Role of Information Systems in Reengineering		295
10-7	TQM in Action	298	
10-8	Synergy between TQM and Information Systems		300
	Summary	301	
	Review Questions	301	
	Projects	302	
	Key Terms	303	
	References	303	

Chapter 11

Building Effective Information Systems in Functional Areas

	Learning Objectives	305	
11-1	Introduction	306	
11-2	Building Information Systems: An Overview		306
11-3	Tools and Software Products for Building an Information System	307	
11-4	Three Approaches for Building an Information System		308
11-5	End-User Computing (EUC): A Viable Alternative for Information Systems Construction	310	
	11-5-1 Advantages of EUC	311	
	11-5-2 Disadvantages of EUC	312	
	11-5-3 Successful Utilization of EUC	314	
11-6	Building Effective Information Systems in Functional Areas	316	
11-7	Manufacturing Information Systems (MFISs)		316
	11-7-1 MFISs and Inventory Control	317	
11-8	Marketing Information Systems (MKISs)		321
11-9	Personnel Information Systems (PISs)	321	
11-10	Financial Information Systems (FISs)	321	
11-11	Strategic Planning Information Systems (SPIISs)		322
11-12	The Behavioral Issues in Information Systems		323
11-13	Information Systems and Organizational Levels		326
11-14	Guidelines for Building a Successful Information System		330
	Summary	330	
	Review Questions	332	
	Projects	333	
	Key Terms	334	
	References	335	

Part IV

Information Systems in Action

Chapter 12

Electronic Data Interchange (EDI): A New Strategic Tool

Learning Objectives	339	
12-1 Introduction	340	
12-2 What Is Electronic Data Interchange (EDI)?		340
12-3 The History of EDI	342	
12-4 The Growth of EDI	342	
12-5 Introducing EDI into Your Organization	345	
12-5-1 Assessing the Strategic Value of EDI Applications		346
12-5-2 Analyzing the Advantages and Disadvantages of EDI Applications	349	
12-5-3 Analyzing EDI Costs	351	
12-5-4 Choosing a Communication Interface Option		351
12-5-5 Reviewing EDI Standards	355	
12-5-6 EDI Implementation	357	
12-6 EDI Applications	359	
12-6-1 The DuPont Corporation	359	
12-6-2 The Federal Government	359	
12-6-3 General Motors	361	
12-6-4 The Healthcare Industry	361	
12-6-5 Mobil Corporation	362	
12-6-6 The Transportation Industry	363	
Summary	363	
Review Questions	363	
Projects	364	
Key Terms	364	
References	364	

Chapter 13

Decision Support and Executive Information Systems

Learning Objectives	367	
13-1 Introduction	368	
13-2 What Is a Decision Support System (DSS)?		368

15-5-2	Transportation	451
15-5-3	Insurance	451
15-5-4	Real Estate	452
15-5-5	Government	453
15-5-6	Emerging Applications	454
15-6	Outlook for GISs	455
	Summary	456
	Review Questions	456
	Projects	457
	Key Terms	458
	References	458

Chapter 16

Multimedia and Virtual Reality Information Systems

	Learning Objectives	461
16-1	Introduction	462
16-2	Multimedia: An Overview	462
16-3	Multimedia Historical Development	464
16-4	Multimedia Applications	466
	16-4-1 Multimedia Presentation	466
	16-4-2 Sales Demos	468
	16-4-3 Information Kiosks	468
	16-4-4 Computer-Based Training (CBT)	469
	16-4-5 Interactive Television	469
16-5	Strengths and Limitations of Multimedia Training	471
16-6	Hypertext Systems	472
	16-6-1 Hypermedia	472
16-7	Virtual Reality (VR): An Overview	474
16-8	Types of Virtual Environments	475
16-9	Components of a VR System	476
16-10	Important Concepts in VR Environments	477
16-11	VR Applications	478
16-12	Obstacles in Using VR Systems	480
16-13	Virtual Legality	480
	Summary	481
	Review Questions	481
	Projects	482
	Key Terms	482
	References	482

Part V
Emerging Technologies and Applications
in the Information Systems Environment

Chapter 17

Applied Artificial Intelligence: What Is Really Involved?

Learning Objectives	487
17-1 Introduction	488
17-2 What Is Artificial Intelligence?	488
17-3 General Problems Associated with AI Technologies	489
17-4 How Do We Measure Intelligence?	491
17-4-1 The Alan Turing Test	491
17-4-2 The Chinese Room Experiment	492
17-4-3 The CYC Project	493
17-5 What Is an Expert System?	493
17-6 Survey of Successful Applications of Expert Systems	496
17-7 Components of an Expert System	499
17-8 Three Technologies of an Expert System	503
17-9 Types of Expert Systems Architectures	505
17-10 Application and Nonapplication Situations of Expert Systems	507
17-11 Decision-Making Settings and Computer Technology Support	508
17-12 Decision Support and Artificial Intelligence Integration	510
17-13 Has Integration Already Started?	512
Summary	514
Review Questions	514
Projects	515
Key Terms	515
References	516

Chapter 18

Expert Systems Construction: Putting Theory to Work

Learning Objectives	519
18-1 Introduction	520

18-2	The Knowledge Acquisition Process	520
18-3	Steps in the Knowledge Acquisition Process	521
18-3-1	Selected Knowledge Acquisition Techniques	523
18-4	Knowledge Representation: An Overview	524
18-4-1	Selected Knowledge Representation Techniques	526
18-5	Expert Systems Construction: An Overview	528
18-6	Expert Systems Construction: From the Beginning to the End	529
18-6-1	Problem Definition	529
18-6-2	Organizational Readiness	533
18-6-3	Expert Selection	533
18-6-4	Tool Selection	534
18-6-5	Design Team Selection	536
18-6-6	Prototype Design	536
18-6-7	Final Construction	537
18-6-8	Validation	540
18-6-9	Postimplementation Audit	541
18-7	Selected Examples of ES Shells	542
18-8	Important Considerations for Expert Systems Construction	543
18-9	Future Trends in Expert Systems	544
	Summary	546
	Review Questions	546
	Projects	547
	Key Term	548
	References	548

Chapter 19

Fuzzy Logic and Hybrid Systems: Managing Imprecise Data

	Learning Objectives	551
19-1	Introduction	552
19-2	Background for Fuzzy Logic	552
19-3	Fuzzy Logic Terminology	554
19-4	What Is Fuzzy Logic?	555
19-5	Fuzziness versus Probability	556
19-6	Implementing a Fuzzy System	557
19-7	Advantages of Fuzzy Systems	559
19-7-1	Simplicity	559
19-7-2	Contradiction	559

19-7-3	Reducing Development Time and Increasing Flexibility	560	
19-7-4	System Autonomy	560	
19-7-5	Reduced Costs	560	
19-7-6	User Friendliness	560	
19-8	Fuzzy Logic Shortcomings	561	
19-9	Fuzzy Logic Hybrids: Integrating the Strengths of Complementary Systems	562	
19-9-1	Neural Networks	562	
19-9-2	Expert Systems	562	
19-9-3	Genetic Algorithms	563	
19-10	Fuzzy Logic Applications	565	
19-10-1	Microelectronics	566	
19-10-2	Transportation	566	
19-10-3	Government	566	
19-10-4	Home Appliances	566	
19-10-5	Robotics and Appliances	567	
19-10-6	Financial Management	567	
19-10-7	Database Management Systems	568	
19-10-8	Systems Development	568	
19-10-9	Software Development	569	
19-10-10	Decision Support	569	
19-11	The Outlook for Fuzzy Logic	570	
19-11-1	Forces Influencing Fuzzy Logic Development		571
19-11-2	Training and Support for Fuzzy Logic		571
19-11-3	Payoff in Fuzzy Logic Development		571
	Summary	572	
	Review Questions	572	
	Projects	573	
	Key Terms	573	
	References	574	

Chapter 20

Neural Networks: Computers That Learn by Doing

	Learning Objectives	575	
20-1	Introduction	576	
20-2	Neural Computing: An Overview	576	
20-3	Neural Computing versus Digital Computing		577
20-4	Expert Systems versus Neural Networks		579

20-5	Pattern Recognition: An Overview	580
20-5-1	Optical Pattern Recognition	581
20-5-2	Sound Pattern Recognition	581
20-5-3	Additional Forms of Pattern Recognition	582
20-5-4	Recognizing Patterns in Data	582
20-5-5	Recognizing Hidden Patterns	583
20-6	How Neural Networks Work: An Overview	584
20-6-1	Hardware Aspects	586
20-6-2	Layered Architecture	586
20-6-3	Input Layer	588
20-6-4	Middle Layers	588
20-6-5	Output Layer	589
20-7	Learning in Neural Networks: An Overview	589
20-7-1	Training Neural Networks	590
20-7-2	Adaptive Learning in Neural Networks	591
20-7-3	Supervised Training	592
20-7-4	Unsupervised Training	592
20-8	The Advantages of Neural Networks	593
20-9	The Disadvantages of Neural Networks	594
20-10	Applications of Neural Networks: An Overview	594
20-11	Neural Networks in Action	595
20-12	Outlook for Neural Computing	595
20-13	Selected Neural Networks Products and Services	596
	Summary	597
	Review Questions	598
	Projects	598
	Key Terms	599
	References	599

Chapter 21

Natural Language Processing: The Ultimate User/System Interface

	Learning Objectives	601
21-1	Introduction	602
21-2	Natural Language Processing (NLP): An Overview	603
21-3	Advantages of NLP	606
21-4	Problems with Natural Language Processing	606
21-5	Natural Language Input and Output Technologies	608
21-5-1	Voice Recognition	609

21-5-2	Speech Generation	611	
21-5-3	Handwriting Recognition	612	
21-5-4	Body Language	612	
21-5-5	Machine Vision	613	
21-6	Natural Language-Understanding Systems		614
21-6-1	Syntax Analysis	615	
21-6-2	Semantic Analysis	615	
21-6-3	Pragmatic Analysis	615	
21-7	How a NLP Works		616
21-8	Different Parsing Approaches		617
21-8-1	Pattern-Matching Parsing	618	
21-8-2	Grammar-Based Parsing	618	
21-8-3	Semantic Parsing	619	
21-8-4	Knowledge-Based Parsing	620	
21-8-5	Neural Network Parsing	621	
21-9	Parsing Techniques		621
21-10	Natural Language Interfaces		622
21-10-1	Intellect	623	
21-10-2	Q & A	624	
21-10-3	DOSTALK	624	
21-10-4	Other Products	624	
21-11	Machine Translation		626
21-11-1	LOGOS	626	
21-11-2	PC-Based Systems	626	
21-11-3	ALPS	627	
21-12	Document-Understanding Systems		628
21-12-1	Writer's Workbench	628	
21-12-2	Smart Expert Editor	629	
	Summary		630
	Review Questions		630
	Projects		631
	Key Terms		632
	References		632
