Forewords .....	ix
Editor's foreword to the second edition .....	xi
Introduction .....	xv
<i>Part 0: Preliminaries</i>	
Note on conventions .....	2
0. Basic homotopy notions .....	3
1. Surgery below the middle dimension .....	8
1A. Appendix : applications .....	17
2. Simple Poincaré complexes .....	21
<i>Part 1: The main theorem</i>	
3. Statement of results .....	32
4. An important special case .....	39
5. The even-dimensional case .....	44
6. The odd-dimensional case .....	57
7. The bounded odd-dimensional case .....	74
8. The bounded even-dimensional case .....	82
9. Completion of the proof .....	91
<i>Part 2: Patterns of application</i>	
10. Manifold structures on Poincaré complexes .....	106
11. Applications to submanifolds .....	118
12. Submanifolds : other techniques .....	138
12A. Separating submanifolds .....	142
12B. Two-sided submanifolds .....	149
12C. One-sided submanifolds .....	155
<i>Part 3: Calculations and applications</i>	
13A. Calculations : surgery obstruction groups .....	172
13B. Calculations : the surgery obstructions .....	185
14. Applications : free actions on spheres .....	195
14A. General remarks .....	195
14B. An extension of the Atiyah-Singer $G$ -signature theorem .....	199
14C. Free actions of $S^1$ .....	202
14D. Fake projective spaces (real) .....	206
14E. Fake lens spaces .....	213
15. Applications : free uniform actions on euclidean space .....	231
15A. Fake tori .....	232
15B. Polycyclic groups .....	237
16. Applications to 4-manifolds .....	241

*Part 4: Postscript*

17.	Further ideas and suggestions: recent work .....	250
17A.	Function space methods .....	250
17B.	Topological manifolds .....	254
17C.	Poincaré embeddings .....	256
17D.	Homotopy and simple homotopy .....	258
17E.	Further calculations .....	262
17F.	Sullivan's results .....	268
17G.	Reformulations of the algebra .....	272
17H.	Rational surgery .....	278
	References .....	285
	Index .....	300
