| Preface | xix |

I. X-Ray Crystallographic Studies of Ribosomal Subunits

| | |
|--|----|
| 1. Progress toward the Crystal Structure of a Bacterial 30S Ribosomal Subunit ■ V. Ramakrishnan, Malcolm S. Capel, William M. Clemons, Jr., Joanna L. C. May, and Brian T. Wimberly | 3 |
| 2. Crystal Structure of the Large Ribosomal Subunit at 5-Angstrom Resolution ■ Nenad Ban, Poul Nissen, Peter B. Moore, and Thomas A. Steitz | 11 |
| 3. Identification of Selected Ribosomal Components in Crystallographic Maps of Prokaryotic Ribosomal Subunits at Medium Resolution ■ Anat Bashan, Marta Pioletti, Heike Bartels, Daniela Janell, Frank Schluenzen, Marco Gluehmann, Inna Levin, Joerg Harms, Harly A. S. Hansen, Ante Tocilji, Tamar Auerbach, Horacio Avila, Maria Simitsopoulou, Moshe Peretz, William S. Bennett, Ilana Agmon, Maggie Kessler, Shulamith Weinstein, François Franceschi, and Ada Yonath | 21 |

II. Functional States Mapped by Cryo-Electron Microscopy

| | |
|---|----|
| 4. Visualization of the Translational Elongation Cycle by Cryo-Electron Microscopy ■ Tillmann Pape, Holger Stark, Rishi Matadeen, Elena V. Orlova, and Marin van Heel | 37 |
| 5. Cryo-Electron Microscopy of the Translational Apparatus: Experimental Evidence for the Paths of mRNA, tRNA, and the Polypeptide Chain ■ Joachim Frank, Pawel Penczek, Robert A. Grassucci, Amy Heagle, Christian M. T. Spahn, and Rajendra K. Agrawal | 45 |
| 6. Studies of Elongation Factor G-Dependent tRNA Translocation by Three-Dimensional Cryo-Electron Microscopy ■ Rajendra K. Agrawal, Amy B. Heagle, and Joachim Frank | 53 |

III. Structures of Isolated Components

| | |
|--|----|
| 7. Ribosomal Proteins and Their Structural Transitions on and off the Ribosome ■ Salam Al-Karadaghi, Natalia Davydova, Irina Eliseikina, Maria Garber, Anders Liljas, Natalia Nevskaya, Stanislav Nikonov, and Svetlana Tishchenko | 65 |
| 8. Structures of Bacterial Ribosomal Proteins: High-Resolution Probes of the Architecture and Mechanism of the Ribosome ■ Stephen W. White, William M. Clemons, Christopher Davies, V. Ramakrishnan, and Brian T. Wimberly | 73 |
| 9. Structure and Evolution of 23S rRNA Binding Domain of Protein L2 ■ Isao Tanaka, Atsushi Nakagawa, Takashi Nakashima, Masae Taniguchi, Harumi Hosaka, and Makoto Kimura | 85 |

10. How Ribosomal Proteins and rRNA Recognize One Another ■ Robert A. Zimmermann, Irina Alimov, K. Uma, Herren Wu, Iwona Wower, Edward P. Nikonowicz, Denis Drygin, Peining Dong, and Lihong Jiang 93
11. RNA Tertiary Structure and Protein Recognition in an L11-RNA Complex ■ David E. Draper, Graeme L. Conn, Apostolos G. Gittis, Debraj GuhaThakurta, Eaton E. Lattman, and Luis Reynaldo 105
12. Structure of the Yeast Ribosomal Stalk ■ Juan P. G. Ballesta, Esther Guarinos, Jesus Zurdo, Pilar Parada, Gretel Nusspaumer, Vassiliki S. Lalioti, Jorge Perez-Fernandez, and Miguel Remacha 115

IV. Ribosomal Modeling

13. Studies on the Structure and Function of Ribosomes by Combined Use of Chemical Probing and X-Ray Crystallography ■ Harry F. Noller, Jamie Cate, Anne Dallas, Gloria Culver, Thomas N. Earnest, Rachel Green, Lovisa Holmberg, Simpson Joseph, Laura Lancaster, Kate Lieberman, Chuck Merryman, Lisa Newcomb, Raymond Samaha, Uwe von Ahsen, Marat Yusupov, Gulnara Yusupova, and Kevin Wilson 129
14. Three-Dimensional Organization of the Bacterial Ribosome and Its Subunits: Transition from Low-Resolution Models to High-Resolution Structures ■ Richard Brimacombe, Barbara Greuer, Florian Mueller, Monika Osswald, Jutta Rinke-Appel, and Ingolf Sommer 151
15. Functional Interpretation of the Cryo-Electron Microscopy Map of the 30S Ribosomal Subunit from *Escherichia coli* ■ Margaret S. VanLoock, Arun Malhotra, David A. Case, Rajendra K. Agrawal, Pawel Penczek, Thomas R. Easterwood, Joachim Frank, and Stephen C. Harvey 165

V. rRNA Modification and Protein Signals

16. Bacterial, Archaeal, and Organellar rRNA Pseudouridines and Methylated Nucleosides and Their Enzymes ■ James Ofengand and Kenneth E. Rudd 175
17. Nucleotide Modifications of Eukaryotic rRNAs: the World of Small Nucleolar RNA Guides Revisited ■ Jean-Pierre Bachellerie, Jérôme Cavaillé, and Liang-Hu Qu 191
18. Nuclear Import of Ribosomal Proteins: Evidence for a Novel Type of Nuclear Localization Signal ■ Rogier Stuger, Antonius C. J. Timmers, Hendrik A. Raué, and Jan van 't Riet 205

VI. Probing of Functional Sites

19. Probing Ribosomal Structure and Function: Analyses with rRNA and Protein Mutants ■ Michael O'Connor, Mark Bayfield, Steven T. Gregory, Wyan-Ching Mimi Lee, J. Stephen Lodmell, Anuj Mankad, Jill R. Thompson, Anton Vila-Sanjurjo, Catherine L. Squires, and Albert E. Dahlberg 217
20. Reconstitution of the 50S Subunit with In Vitro-Transcribed 23S rRNA: a New Tool for Studying Peptidyltransferase ■ Philipp Khaitovich and Alexander S. Mankin 229
21. Modern Site-Directed Cross-Linking Approaches: Implication for Ribosome Structure and Functions ■ Alexey A. Bogdanov, Petr V. Sergiev, Inna N. Lavrik, Olga V. Spanchenko, Andrey A. Leonov, and Olga A. Dontsova 245
22. Chemical Cleavage as a Probe of Ribosomal Structure ■ Walter E. Hill, Gregory W. Muth, James M. Bullard, Scott P. Hennelly, Jing Yuan, Wendy T. Grace, Douglas J. Bucklin, Michael A. Van Waes, and Charles M. Thompson 257
23. Applying Photolabile Derivatives of Oligonucleotides To Probe the Peptidyltransferase Center ■ Barry S. Cooperman, Serguei N. Vladimirov, Yuri Bukhtiyarov, Zhanna Druzina, Ruo Wang, and Hyuk-Soo Seo 271

24. Folding of Nascent Peptides on Ribosomes ■ Boyd Hardesty, Gisela Kramer, Tamara Tsalkova, Vasanthi Ramachandiran, Bryan McIntosh, and Delbert Brod 287

VII. Factor-Mediated Steps in the Elongation Cycle

25. Mechanisms of Partial Reactions of the Elongation Cycle Catalyzed by Elongation Factors Tu and G ■ Marina V. Rodnina, Tillmann Pape, Andreas Savelsbergh, Dagmar Mohr, Natalia B. Matassova, and Wolfgang Wintermeyer 301
26. Ribosomal Elongation Cycle ■ Knud H. Nierhaus, Christian Spahn, Nils Burkhardt, Marylena Dabrowski, Gundo Diedrich, Edda Einfeldt, Detlev Kamp, Viter Marquez, Sebastian Patzke, Markus A. Schäfer, Ulrich Stelzl, Gregor Blaha, Regine Willumeit, and Heinrich B. Stuhmann 319
27. Ternary Complex of EF-Tu and Its Action on the Ribosome ■ Gregers R. Andersen, Victor G. Stepanov, Morten Kjeldgaard, Søren S. Thirup, and Jens Nyborg 337
28. Insights into the GTPase Mechanism of EF-Tu from Structural Studies ■ Rolf Hilgenfeld, Jeroen Mesters, and Tanis Hogg 347
29. The States, Conformational Dynamics, and Fusidic Acid-Resistant Mutants of Elongation Factor G ■ Anders Liljas, Ole Kristensen, Martin Laurberg, Salam Al-Karadaghi, Anatoly Gudkov, Kirill Martemyanov, Diarmaid Hughes, and Ivan Nagaev 359

VIII. mRNA Decoding

30. Poking a Hole in the Sanctity of the Triplet Code: Inferences for Framing ■ John F. Atkins, Alan J. Herr, Christian Massire, Michael O'Connor, Ivaylo Ivanov, and Raymond F. Gesteland 369
31. The Unbearable Lightness of Peptidyl-tRNA ■ Jonathan Gallant, Dale Lindsley, and Judy Masucci 385
32. tmRNA: a Case of Structural and Functional Mimicry on and off the Ribosome? ■ Jacek Wower, Christian Zwieb, and Iwona K. Wower 397

IX. Functional Target Sites for Antibiotics and Ribotoxins

33. Antibiotic Biosynthesis: Some Thoughts on “Why?” and “How?” ■ Eric Cundliffe 409
34. Aminoglycoside Antibiotics and Decoding ■ Joseph D. Puglisi, Scott C. Blanchard, Kam D. Dahlquist, Robert G. Eason, Dominique Fourmy, Stephen R. Lynch, Michael I. Recht, and Satoko Yoshizawa 419
35. Macrolide Resistance Conferred by Alterations in the Ribosome Target Site ■ Stephen Douthwaite and Birte Vester 431
36. Antibiotics and the Peptidyltransferase Center ■ Bo T. Porse, Stanislav V. Kirillov, and Roger A. Garrett 441
37. Structures and Properties of Ribotoxins ■ Richard Kao and Julian Davies 451
38. Structure and Function of the Sarcin-Ricin Domain ■ Ira G. Wool, Carl C. Correll, and Yuen-Ling Chan 461

X. Initiation, Termination, and Recycling

39. Translation Initiation in Bacteria ■ Claudio O. Gualerzi, Letizia Brandi, Enrico Caserta, Anna La Teana, Roberto Spurio, Jerneja Tomšić, and Cynthia L. Pon 477
40. Factor-Mediated Termination of Protein Synthesis: a Welcome Return to the Mainstream of Translation ■ Daniel N. Wilson, Mark E. Dalphin, Herman J. Pel, Louise L. Major, John B. Mansell, and Warren P. Tate 495
41. rRNA Functional Sites and Structures for Peptide Chain Termination ■ Emanuel J. Murgola, Alexey L. Arkov, Natalya S. Chernyaeva, Klas O. F. Hedenstierna, and Frances T. Pagel 509

42. Genetic Probes to Bacterial Release Factors: tRNA Mimicry Hypothesis and Beyond ■
Yoshikazu Nakamura, Yoichi Kawazu, Makiko Uno, Kuniyasu Yoshimura, and
Koichi Ito 519
43. Ribosome-Recycling Factor: an Essential Factor for Protein Synthesis ■ Akira Kaji
and Go Hirokawa 527
44. Mechanism of Bacterial Translation Termination and Ribosome Recycling ■ Måns
Ehrenberg, Vildan Dincbas, David Freistroffer, Valerie Heurgué-Hamard, Reza
Karimi, Michael Pavlov, and Richard Buckingham 541

XI. In Conclusion

45. Concluding Remarks for the Helsingør Ribosome Conference, 13 to 17 June 1999 ■
Peter B. Moore 555
- Index 557
