

Inhalt/Contents

Vorwort	IX
Preface	XI
I Bericht und Schlussfolgerungen	1
1 Einleitung	1
2 Allgemeine und lebensmitteltechnologische Aspekte	1
3 Gesundheitliche Aspekte thermischer Behandlung von Lebensmitteln	2
4 Fazit	6
5 Forschungsbedarf	6
II Report and Conclusions	9
1 Foreword	9
2 General and Food Technological Aspects	9
3 Health Aspects of Thermal Food Processing	10
4 Conclusions	13
5 Research Needs	14
III Contributions	17
1 Thermal Processing of Foods: Technological Aspects	17
<i>Dietrich Knorr, Volker Heinz, and Cornelius Luscher</i>	
2 Thermal Processing: More than Extending the Shelf Life of Foods	26
<i>Thomas Hofmann and Peter Schieberle</i>	
3 Nutritional Aspects	50
<i>Gerhard Rechkemmer</i>	
4 Biological Activities of Maillard Reaction Products	66
<i>Doris Marko</i>	
5 Risk Assessment of Acrylamide	75
<i>Erik Dybing</i>	
6 An Ex-vivo Approach to Assess Low Dose Effects of Acrylamide ..	90
<i>Matthias Baum, Daniel Bertow, Evelynne Fauth, Silke Thielen, and Gerhard Eisenbrand</i>	

7	Risk Assessment of Furan <i>Josef Schlatter</i>	103
8	Heterocyclic Aromatic Amines: Potent Genotoxicants Formed in Cooked Meats <i>Robert J. Turesky and Ricky D. Holland</i>	109
9	Molecular Epidemiology of Food Pyrolysis Products in Relation to Colon, Breast, and Prostate Cancer <i>Susan A. Nowell, Rashmi Sinha, Luke Ratnasinghe, Nicholas P. Lang, and Fred F. Kadlubar</i>	131
10	The Formation of 3-Monochloropropane-1,2-diol (3-MCPD) in Food and Potential Measures of Control <i>Richard H. Stadler, Viviane Theurillat, Alfred Studer, Francis Scanlan, and Walburga Seefelder</i>	141
11	Minimization Strategies: Acrylamide <i>Norbert U. Haase</i>	155
12	Deep-fat Frying as Food Heating Process: Product Quality, Safety and Process Control <i>Knut Franke and Ernst H. Reimerdes</i>	175
13	Thermal Processing of Food: Allergenicity <i>Lars K. Poulsen</i>	185
14	The Acrylamide Minimisation Concept – A Risk Management Tool <i>Andreas Kliemant and Angela Göbel</i>	197
15	The Consequences of Cooking: How the Origin of Cuisine Shaped Human Culture, Ecology, and Biology <i>Greg Laden</i>	208
IV	Posters	225
1	Formation, Structural Elucidation, Analysis and Toxicity of Thermal Degradation Products of the <i>Fusarium</i> Mycotoxin Nivalenol <i>Michael Bretz, Anja Knecht, Simon Göckler, and Hans-Ulrich Humpf</i>	225
2	Influence of Different Heating Processes on the Formation of Nucleotides, Nucleosides and Free Bases in Vegetables <i>Isabelle Kölling-Speer and Alfred Montag</i>	227
3	Determination of Free 3-Monochloropropane-1,2-Diol in Coffee and Coffee Surrogates <i>Torsten Kurzrock and Karl Speer</i>	233
4	Minimisation Concept – A Reaction on the Potential Health Risk of Acrylamide <i>Andreas Kliemant and Hartmut Waldner</i>	239
5	Isomerisation of Lycopene Due to Thermal Treatment of Carrot Homogenates: Increased Bioavailability of Total Lycopene and Generation of 5- <i>cis</i> -Lycopene in the Human Intestine <i>Esther Mayer-Miebach, Diana Behsnlian, Heike P. Schuchmann, and Achim Bub</i>	241

6	Influence of High Hydrostatic Pressure on the Formation of N ^ε - Carboxymethyllysine and N ^ε -Carboxyethyllysine in Maillard-type Reactions	247
	<i>Martina Kasper and Peter Schieberle</i>	
7	Effect of Acrylamide from a Heated Potato Product on the Acrylamide Content in Eggs, Breast Muscle Meat, Liver and Kidney of Hens	248
	<i>Ingrid Halle, Gerhard Flachowsky, Marcus Ihling, Monika Lahrssen-Wiederholt, and Horst Klaffke</i>	
8	PAH in Oil and Tocopherols – Analytical Challenges in Complying with EC Recommendations	250
	<i>Sonja Schittko, Holger Fritz, Robert Gatermann, and Ansgar Ruthenschrör</i>	
9	Acrylamide in Fried Potato Products – Influence of Process Conditions and Precursor Contents	256
	<i>Knut Franke and Ernst H. Reimerdes</i>	
10	Thermal Stability of Zeaxanthin in Potato Homogenates	257
	<i>Diana Behnsilian, Esther Mayer-Miebach, Ping Idda, and Heike P. Schuchmann</i>	
11	Osmotic Treatment as a Pre-Step to Drying and Frying	259
	<i>Diana Behnsilian, Esther Mayer-Miebach, and Wolf-D. Koller</i>	
12	Influence of Maillard Reaction Products on the Inflammatory Cellular Response of Macrophages	266
	<i>Sonja Muscat and Monika Pischetsrieder</i>	
13	Dosimetry of Acrylamide and Glycidamide Binding to Proteins in Human Blood	267
	<i>Daniel Bertow, Matthias Baum, and Gerhard Eisenbrand</i>	
14	DNA Strand Breaking Capacity of Acrylamide and Glycidamide in Mammalian Cells	275
	<i>Doris Marko, Zeina Tjaden, Florian Fueller, and Nicole Puppel</i>	
15	2-Dodecylcyclobutanone, the Radiolytic Product of Palmitic Acid, is Genotoxic in the Comet Assay and Induces Chromosomal Aberrations in Preneoplastic Cells Using 24-Color-FISH	277
	<i>Nadine Knoll, Anja Weise, Michael Gleis, Uwe Claussen, Brigitte Marian, and Beatrice L. Pool-Zobel</i>	
V	Participants and Contributors of the Symposium	279
