<i>List of abbreviations</i>	<i>ix</i>
<i>List of figures and tables</i>	<i>xi</i>
<i>Preface</i>	<i>xiii</i>
<i>Introduction</i>	<i>xv</i>
<i>About the author</i>	<i>xix</i>
1 Defining our terms	1
Can we organise knowledge?	1
What are taxonomies?	4
Taxonomy as artificial memory	8
Taxonomy work	11
2 Taxonomies can take many forms	13
Lists	14
Tree structures	15
Hierarchies	18
Polyhierarchies	25
Matrices	25
Facets	33
System maps	42
Practical implications of different taxonomy forms	45
3 Taxonomies and infrastructure for organisational effectiveness	49
Organisational ineffectiveness	50
The problem of Babel	57
Taxonomies as boundary objects	61

	Information and knowledge structure	64
4	Taxonomies and activities for organisational effectiveness	67
	Risk	68
	<i>Case study 4.1 Department of Homeland Security digital library</i>	72
	Costs	74
	<i>Case study 4.2 Unilever's brand simplification exercise</i>	80
	Customers and markets	81
	<i>Case study 4.3 Club Med, storytelling and archetypes</i>	88
	Innovation	90
	<i>Case study 4.4 Unilever Research and disposable taxonomies</i>	92
5	Taxonomies and knowledge management	97
	Taxonomies and findability	98
	Taxonomies and content management	100
	Taxonomies and knowledge management	102
	Logos/Information	105
	Sophos/Expertise and learning	106
	<i>Case study 5.1 The British Council maps its competencies</i>	108
	Pathos/Collaboration	112
	<i>Case study 5.2 Cabot Corporation builds a taxonomy to coordinate global quality</i>	114
	Ethos/Culture	115
	<i>Case study 5.3 The Civil Aviation Authority of Singapore uses a typology to structure and communicate its knowledge management strategy</i>	118
6	What do we want our taxonomies to do?	123
	What taxonomies do	124
	Making sense of taxonomy work	134
	When taxonomies go bad	140
7	Preparing for a taxonomy project	153
	Step 1: Meet project sponsor	155
	Step 2: Engage stakeholders	166

Step 3: Refine project purpose	167
<i>Case study 7.1 The structure-and-organise taxonomy</i>	168
<i>Case study 7.2 Losing clarity of purpose</i>	170
<i>Case study 7.3 Evolving purpose</i>	173
Step 4: Design the approach	175
Step 5: Build the communication plan	177
Step 6: Start the governance process	181
8 Designing your taxonomy	185
The cognitive constraints on taxonomy design	186
Step 7: Collect vocabularies and organising principles	193
Step 8: Facet analysis	197
Step 9: Test and observe	198
<i>Case study 8.1 Facet analysis for a sports organisation</i>	203
9 Implementing your taxonomy	207
Step 10: Plan the instantiation of your taxonomy	209
<i>Case study 9.1 Metadata strategies and vocabulary control at the BBC</i>	215
Step 11: Integrate your taxonomy into the infrastructure	217
Step 12: Secure the governance process	234
10 The future of taxonomy work	237
Ontologies and machine intelligence	238
Folksonomies and rich serendipity	240
Enhancing usefulness in folksonomies	245
Taxonomies vs folksonomies?	249
Towards an array of knowledge infrastructure tools	253
The benefits of diversity in knowledge and information infrastructure	255
Spimes and the future of taxonomies	260
Bibliography	263
<i>Index</i>	273

List of figures and tables

Figures

1.1	Relationships in a thesaurus	7
2.1	Effective and ineffective ways of representing caste	19
2.2	Maslow's hierarchy of needs	20
2.3	Hierarchical tree used to represent a corporate structure	21
2.4	Periodic table in Mendeleev's format	27
2.5	Boston Consulting Group Matrix	28
2.6	Three-dimensional Alexander periodic table	30
2.7	Matrix representation for an engineering project taxonomy	31
2.8	Career advice matrix from LearnDirect UK	32
2.9	Detail from Epicurious.com enhanced search page showing facets as lists	39
2.10	Taxonomy of arteries shown as a map	43
2.11	Concept map of taxonomy attributes	44
2.12	Example of a project roadmap with knowledge assets	45
3.1	Public and private taxonomies	60
3.2	Incident report – facet analysis	63
3.3	The elements of information and knowledge infrastructure	65
4.1	Marchand's strategic information alignment framework	67
4.2	SIPOC process map	75
4.3	SIPOC knowledge mapping template	76
4.4	Crop rotation plan for a kitchen garden	79
4.5	Unilever's taxonomy of brands	81
5.1	Knowledge lens framework	103
5.2	Knowledge lens framework and taxonomy work	105
5.3	Example archetypes from CAAS	120
6.1	The Cynefin framework	134
6.2	Taxonomy functions as sense-making responses	137

6.3	Where taxonomies go wrong	140
7.1	Preparing for a taxonomy project	154
7.2	Detail from a human resource concept map	157
8.1	Designing a taxonomy	186
8.2	Cognitive constraints in navigating a taxonomy	191
8.3	Example of input-output knowledge map	195
9.1	The full taxonomy development cycle with implementation steps	208
9.2	Checklist for building an information neighbourhood	225
10.1	Person-mediated serendipity trails in folksonomies	243
10.2	Social tagging as a complement to taxonomy work	253
10.3	An array of knowledge infrastructure tools	254
10.4	Thinkmap's Visual Thesaurus	256

Tables

2.1	Kinds of relationship expressed in a tree structure	17
2.2	Practical implications of taxonomy forms	46
7.1	Examples of important cues to taxonomy types and construction approaches	158
7.2	Key decision factors in choosing your design approach	175
7.3	Example statements of taxonomy purpose and benefits	180
8.1	Knowledge asset types	194
8.2	Candidates for facet analysis	198
8.3	Key criteria for taxonomy validation	199
9.1	Example of a metadata framework	211
9.2	Extract from a thesaurus for a training institution	213
