# Petrogenesis of Metamorphic Rocks

7th Completely Revised and Updated Edition

With 99 Figures and 25 Tables

Springer

---

# Contents

## Part I

<b>1</b>	<b>Definition, Conditions and Types of Metamorphism</b> . . . . .	<b>3</b>
1.1	Conditions of Metamorphism . . . . .	3
1.1.1	Low-Temperature Limit of Metamorphism . . . . .	3
1.1.2	High-Temperature Limit of Metamorphism . . . . .	4
1.1.3	Low-Pressure Limit of Metamorphism . . . . .	6
1.1.4	High-Pressure Limit of Metamorphism . . . . .	6
1.2	Types of Metamorphism . . . . .	7
1.2.1	Orogenic Metamorphism . . . . .	7
1.2.2	Ocean-Floor Metamorphism . . . . .	8
1.2.3	Other Types of Regional Metamorphism . . . . .	10
1.2.4	Contact Metamorphism . . . . .	10
1.2.5	Other Types of Small-Scale Metamorphism . . . . .	11
	References . . . . .	13
<b>2</b>	<b>Metamorphic Rocks</b> . . . . .	<b>17</b>
2.1	Primary Material of Metamorphic Rocks . . . . .	18
2.1.1	Chemical Composition of Protoliths of Metamorphic Rocks . . . . .	19
2.1.2	Chemical Composition Classes of Metamorphic Rocks and Their Protoliths . . . . .	21
2.2	Structure of Metamorphic Rocks . . . . .	22
2.3	Classification and Names of Metamorphic Rocks . . . . .	24
2.3.1	Rock Names Referring to the Structure . . . . .	24
2.3.2	Names for High-Strain Rocks . . . . .	25
2.3.3	Special Terms . . . . .	26
2.3.4	Modal Composition of Rocks . . . . .	28
2.3.5	Names Related to the Origin of the Protolith . . . . .	28
2.4	Mineral Assemblages and Mineral Parageneses . . . . .	29
2.5	Graphic Representation of Metamorphic Mineral Assemblages . . . . .	32
2.5.1	Mole Numbers, Mole Fractions and the Mole Fraction Line . . . . .	32
2.5.2	The Mole Fraction Triangle . . . . .	34

2.5.3	Projections . . . . .	36
2.5.3.1	Simple Projections . . . . .	36
2.5.3.2	Complex Projections . . . . .	39
2.5.3.3	AFM Projections . . . . .	41
2.5.3.4	ACF Projections . . . . .	45
2.5.3.5	Other Projections . . . . .	47
	References . . . . .	47
<b>3</b>	<b>Metamorphic Processes . . . . .</b>	<b>49</b>
3.1	Principles of Metamorphic Reactions . . . . .	50
3.2	Pressure and Temperature Changes in Crust and Mantle . . . .	57
3.2.1	General Aspects . . . . .	57
3.2.2	Heat Flow and Geotherms . . . . .	58
3.2.2.1	Transient Geotherms . . . . .	61
3.2.3	Temperature Changes and Metamorphic Reactions . . . . .	62
3.2.4	Pressure Changes in Rocks . . . . .	64
3.3	Gases and Fluids . . . . .	65
3.4	Time Scale of Metamorphism . . . . .	67
3.5	Pressure-Temperature-Time Paths and Reaction History . . . .	68
3.6	Chemical Reactions in Metamorphic Rocks . . . . .	73
3.6.1	Reactions Among Solid-Phase Components . . . . .	73
3.6.1.1	Phase Transitions, Polymorphic Reactions . . . . .	73
3.6.1.2	Net-Transfer Reactions . . . . .	73
3.6.1.3	Exchange Reactions . . . . .	73
3.6.1.4	Exsolution Reactions/Solvus Reactions . . . . .	74
3.6.2	Reactions Involving Volatiles as Reacting Species . . . . .	75
3.6.2.1	Dehydration Reactions . . . . .	75
3.6.2.2	Decarbonatization Reactions . . . . .	78
3.6.2.3	Mixed Volatile Reactions . . . . .	78
3.6.2.4	Oxidation/Reduction Reactions . . . . .	81
3.6.2.5	Reactions Involving Sulfur . . . . .	82
3.6.2.6	Reactions Involving Halogens . . . . .	83
3.6.2.7	Complex Mixed Volatile Reactions and Fluids . . . . .	83
3.6.2.8	Reactions Involving Minerals and Dissolved Components in Aqueous Solutions . . . . .	85
3.7	Reaction Progress . . . . .	86
3.8	Phase Diagrams . . . . .	89
3.8.1	Phase Diagrams, General Comments and Software . . . . .	89
3.8.2	The Phase Rule . . . . .	90
3.8.2.1	Phase Rule in Reactive Systems . . . . .	91
3.8.3	Construction of Phase Diagrams for Multicomponent Systems After the Method of Schreinemakers . . . . .	92
3.8.4	Use of Phase Diagrams, an Example . . . . .	96
	References . . . . .	99

<b>4</b>	<b>Metamorphic Grade</b> .....	105
4.1	General Considerations .....	105
4.2	Index Minerals and Mineral Zones .....	106
4.3	Metamorphic Facies .....	107
4.3.1	Origin of the Facies Concept .....	107
4.3.2	Metamorphic Facies Scheme .....	109
4.3.2.1	Sub-Blueschist-Greenschist Facies .....	111
4.3.2.2	Greenschist Facies .....	112
4.3.2.3	Amphibolite Facies .....	112
4.3.2.4	Granulite Facies .....	113
4.3.2.5	Blueschist Facies .....	114
4.3.2.6	Eclogite Facies .....	114
4.3.3	Pressure-Temperature Conditions of Metamorphic Facies ..	115
4.4	Isograds and Reaction Isograds .....	116
4.4.1	Origin and History of the Isograd Concept .....	116
4.4.2	Zone Boundaries, Isograds and Reaction Isograds .....	117
4.4.3	Assessing Isograds, Isobars and Isotherms .....	119
4.5	Bathozones and Bathograds .....	122
4.6	Petrogenetic Grid .....	125
4.6.1	Polymorphic Transitions .....	127
4.6.1.1	Andalusite-Kyanite-Sillimanite .....	127
4.6.1.2	Calcite-Aragonite .....	128
4.6.1.3	Quartz-Coesite .....	130
4.7	Geothermobarometry .....	130
4.7.1	Concept and General Principle .....	131
4.7.2	Assumptions and Precautions .....	134
4.7.2.1	Question of Equilibrium .....	134
4.7.2.2	Retrograde Effects .....	135
4.7.2.3	Quality of Calibration .....	135
4.7.2.4	Long Extrapolations in P-T .....	135
4.7.2.5	Sensitivity of Thermobarometry .....	136
4.7.2.6	Variable Structural State .....	136
4.7.2.7	Effect of Other Components .....	136
4.7.2.8	Estimation of $Fe^{2+}/Fe^{3+}$ in Mineral Analysis .....	137
4.7.3	Exchange Reactions .....	138
4.7.3.1	Garnet-Clinopyroxene .....	139
4.7.3.2	Garnet-Biotite .....	141
4.7.3.3	Isotopic Exchange Thermometry .....	142
4.7.4	Net Transfer .....	143
4.7.4.1	Garnet-Aluminosilicate-Quartz-Plagioclase (GASP) .....	145
4.7.4.2	Garnet-Rutile-Aluminosilicate-Ilmenite-Quartz (GRAIL) .....	146
4.7.4.3	Clinopyroxene-Plagioclase-Quartz .....	146
4.7.4.4	Sphalerite-Pyrrhotite-Pyrite .....	147
4.7.5	Miscibility Gaps and Solvus Thermometry .....	147
4.7.5.1	Orthopyroxene-Clinopyroxene .....	148
4.7.5.2	Plagioclase-Alkali Feldspar .....	149

4.7.5.3	Calcite-Dolomite	150
4.7.5.4	Muscovite-Paragonite	150
4.7.6	Uncertainties in Thermobarometry	151
4.7.7	Thermobarometry Using Multiequilibrium Calculations (MET)	152
4.8	Gibbs Method	154
4.9	Assemblage Stability Diagrams	155
4.10	More P-T Tools	156
4.10.1	Reactions Involving Fluid Species	156
4.10.1.1	Phengite-Biotite-K-Feldspar-Quartz	156
4.10.1.2	Magnetite-Ilmenite Equilibria and the "Quilf" System	157
4.10.2	P-T Tools for Very Low-Grade Rocks	158
4.10.2.1	Fluid Inclusions	158
4.10.2.2	Vitrinite Reflectance	159
4.10.2.3	Conodont Color Alteration Index (CAI)	159
