CONTENTS

| | |
|------------------------|------|
| Introduction | ix |
| Acknowledgments | xvii |
| Prerequisites | xix |

Chapter I. Elements of Differential Calculus in Commutative Rings

| | |
|--|----|
| 1. The Principal Functors in the Theory of Linear Differential Operators | 1 |
| 2. Representative Objects | 12 |
| 3. Elementary Algebraic Geometry of Differential Operators | 26 |
| 4. Change of Rings | 40 |
| 5. The δ -lemma | 46 |

Chapter II. Nonlinear Differential Operators and the U -Geometry on Jet Manifolds

| | |
|--|----|
| 1. The Elements $\rho_k(\pi)$ and $U_k(\pi)$ | 62 |
| 2. Nonlinear Differential Operators | 65 |
| 3. Prolongations of Nonlinear Differential Operators | 69 |
| 4. U -Geometry | 81 |

Chapter III. Evolutions and Linearizations

| | |
|---|-----|
| 1. Differential Operators on the Space of Infinite Jets | 94 |
| 2. Universal Linearizations and Evolutionary Derivations | 98 |
| 3. \mathcal{G} -Fields and their Structures | 108 |
| 4. \mathcal{G} -Fields and the Operators ρ_k and U_k | 112 |

Chapter IV. The Geometry of the Cartan Distribution

| | |
|----------------------------|-----|
| 1. The Cartan Distribution | 122 |
| 2. Involution Subspaces | 127 |

| | |
|--|-----|
| 3. Integral Manifolds of the Cartan Distribution and Lie Transformations | 134 |
| 4. Structure of Lie Fields and Lie Transformations | 138 |
| 5. Characteristic Cones | 144 |

Chapter V. Nonlinear Differential Equations, their Solutions, Symbols, and Symmetries

| | |
|---|-----|
| 1. Differential Equations and their Solutions | 152 |
| 2. Formal Integrability | 159 |
| 3. Intermediate Integrals and Characteristic Covectors | 173 |
| 4. Geometric Singularities of Solutions and Characteristics | 177 |
| 5. Riemann Invariants | 191 |
| 6. Classical Symmetries of Differential Equations | 198 |

Chapter VI. The Geometry of the Cartan Distribution on the Space of Infinite Jets

| | |
|--|-----|
| 1. Derivations in Fibre Bundles | 218 |
| 2. The Elements $U_{(k)}(\pi)$ and $\mathcal{C}_{(k)}$ -Fields | 228 |
| 3. Integral Manifolds of the Cartan Distribution on $J^\infty(\pi)$ and \mathcal{C} -Transformations | 240 |
| 4. Transformations Preserving the Elements $U_{(k)}$, ρ'_k , $U_k(\pi)$, $\rho_k(\pi)$ | 254 |

Chapter VII. The Projective Point of View and the Geometry of Infinitely Prolongated Equations

| | |
|--|-----|
| 1. The Projective Point of View | 272 |
| 2. The Differential Calculus on the Space of Infinite Jets of a Nonlinear Fibre Bundle. The Structure of \mathcal{C} -Differential Operators | 286 |
| 3. Projective Transformations of Coordinates and Operators | 298 |
| 4. The Geometry of Infinitely Prolongated Equations and the Related Differential Calculus | 305 |
| 5. The Category of Differential Equations | 320 |

Chapter VIII. Some Applications of the Theory of Symmetries of Partial Differential Equations

| | |
|---|-----|
| 1. Classical Infinitesimal Symmetries of Differential Equations | 349 |
|---|-----|

CONTENTS

vii

| | |
|--|-----|
| 2. The Computation of Higher Symmetries of Differential Equations. Nonlocal Symmetries | 371 |
| 3. Invariant Solutions and Factorization of Differential Equations | 390 |
| 4. L - A Pairs | 406 |
| References | 433 |
| Subject Index | 439 |
| Index of Symbols | 441 |
