1	The Background of Statistics	1
	<i>Introduction</i>	1
	<i>The First Example</i>	1
	<i>Another Example</i>	8
	<i>The Third Example</i>	11
	<i>Types of Statistical Problems and Models</i>	14
2	Parametric Models	19
	<i>Introduction</i>	19
	<i>Examples of Model Construction</i>	19
	<i>A Formulation</i>	21
	<i>Some Common Families of Distributions</i>	22
	★ <i>Location and Scale Parameters</i>	34
	<i>The Normal Distribution</i>	40
	<i>The Multidimensional Normal Distribution</i>	42
	<i>Summary</i>	45
3	Estimation in Parametric Models	46
	<i>Introduction</i>	46
	<i>An Example</i>	47
	<i>The Difficulties of the Statistician's Life</i>	53
	<i>Intuition Is Not Enough</i>	55
	<i>Some General Principles of Estimation</i>	57

The Maximum Likelihood Method 65
Maximum Likelihood Applied to Normal Distributions 75
Other Examples 81
★ *The Method of Moments* 84
Desirable Qualities of Maximum Likelihood Estimation 85
★ *Efficiency of Estimation Methods* 88
Summary 95

4 Confidence Intervals 97

Confidence Intervals 97
Simple Confidence Intervals for Large Sample Sizes 99
Confidence Intervals for a Multidimensional Parameter 104
Rough and Ready Confidence Intervals 110
General Confidence Intervals 112
★ *Exact Confidence Intervals for Location and Scale Parameters* 116
★ *Confidence Intervals—A Higher Vision* 125
Summary 125

5 Hypothesis Testing in Parametric Models 127

Introduction 127
Tests and Their Operating Characteristics 130
Level of Significance, Detecting, and Discrimination 131
An Example 133
A Two Point Parameter Space 136
The Likelihood Ratio Tests 140
Student's t Test 144
The ρ Test for Independence 150
The F Test 153
★ *Analyzing the Differences* 156
★ *The Asymptotic Distribution of Likelihood Ratio Tests* 158
★ *How Does Likelihood Ratio Work?* 160
★ *Confidence Intervals Revisited* 170
Summary 174

6 Fitting the Underlying Distribution 176

Introduction 176
The Histogram and a Touch Estimate of the Density 182

The χ^2 Test 187
Maximum Likelihood Estimates and χ^2 Tests 193
Application of the χ^2 Test to Goodness of Fit 196
Detection Sensitivity of the χ^2 Test 202
The Sample Distribution Function 207
Confidence Bands 209
The Kolmogorov–Smirnov Test for Goodness of Fit 213
★ *The Search for Rejection* 215
Summary 217

7 Safety in Estimation **219**

Introduction 219
The Sample Distribution 223
The Median and Quantiles 228
Confidence Intervals for Quantiles 235
Two and More Dimensions 239
The Midpoints of Slightly Deviant Distributions 241
Robust Estimates for the Scale of a Normal Distribution 247
Summary 252

8 Nonparametric One-Sample Tests **254**

Introduction 254
Paired Comparison 255
The Wilcoxon Test 260
How Well Do Nonparametric Tests Perform? 263
★ *Rank Estimates of the Median* 268
Independence 271
Contingency Tables and χ^2 Again 273
From Independence to Trend 275
Independence Again 282
Summary 284

9 Testing Whether Underlying Distributions Are the Same **286**

Introduction 286
The Two-Sample Student t Test 288
The Median Test 290

Another Wilcoxon Test 291
The Wilcoxon Test for More Than Two Samples 295
The χ^2 Test for Homogeneity 298
Kolmogorov and Smirnov Reappear 305
Summary 309

10 Multifactor, Multisample Problems **311**

Introduction 311
A One-Factor Example 312
The General Regression Model 319
★ *Interaction and Selection of Factor Levels* 326
 Estimating σ^2 and Getting Confidence Intervals 330
 Testing Hypotheses on Regression Coefficients 337
 Does a Regression Model Fit? 344
★ *Least Squares Estimates in Nonstandard Situations* 351
 The Analysis of Variance 354
 The Two-Factor Layout 360
 Decomposing the Sum of Squares 366
 Simultaneous Confidence Intervals 368
 Other Analysis of Variance Layouts 371
 Robustness 375
 Summary 375

Tables 379
