# Contents

<i>Foreword</i>	xiii
<i>Preface</i>	xv
<i>Acknowledgments</i>	xvii
<i>List of Symbols</i>	xix

## CHAPTER 1 **Graph Theoretic Foundations**

1. Basic Definitions and Notations	1
2. Intersection Graphs	9
3. Interval Graphs—A Sneak Preview of the Notions Coming Up	13
4. Summary	17
Exercises	18
Bibliography	20

## CHAPTER 2 **The Design of Efficient Algorithms**

1. The Complexity of Computer Algorithms	22
2. Data Structures	31
3. How to Explore a Graph	37
4. Transitive Tournaments and Topological Sorting	42
Exercises	45
Bibliography	48

<b>CHAPTER 3</b>	<b>Perfect Graphs</b>	
	1. The Star of the Show	51
	2. The Perfect Graph Theorem	53
	3. $p$ -Critical and Partitionable Graphs	58
	4. A Polyhedral Characterization of Perfect Graphs	62
	5. A Polyhedral Characterization of $p$ -Critical Graphs	65
	6. The Strong Perfect Graph Conjecture	71
	Exercises	75
	Bibliography	77
<b>CHAPTER 4</b>	<b>Triangulated Graphs</b>	
	1. Introduction	81
	2. Characterizing Triangulated Graphs	81
	3. Recognizing Triangulated Graphs by Lexicographic Breadth-First Search	84
	4. The Complexity of Recognizing Triangulated Graphs	87
	5. Triangulated Graphs as Intersection Graphs	91
	6. Triangulated Graphs Are Perfect	94
	7. Fast Algorithms for the COLORING, CLIQUE, STABLE SET, and CLIQUE-COVER Problems on Triangulated Graphs	98
	Exercises	100
	Bibliography	102
<b>CHAPTER 5</b>	<b>Comparability Graphs</b>	
	1. $\Gamma$ -Chains and Implication Classes	105
	2. Uniquely Partially Orderable Graphs	109
	3. The Number of Transitive Orientations	113
	4. Schemes and $G$ -Decompositions—An Algorithm for Assigning Transitive Orientations	120
	5. The $\Gamma^*$ -Matroid of a Graph	124
	6. The Complexity of Comparability Graph Recognition	129
	7. Coloring and Other Problems on Comparability Graphs	132

8. The Dimension of Partial Orders	135
Exercises	139
Bibliography	142

**CHAPTER 6 Split Graphs**

1. An Introduction to Chapters 6–8: Interval, Permutation, and Split Graphs	149
2. Characterizing Split Graphs	149
3. Degree Sequences and Split Graphs	152
Exercises	155
Bibliography	156

**CHAPTER 7 Permutation Graphs**

1. Introduction	157
2. Characterizing Permutation Graphs	158
3. Permutation Labelings	160
4. Applications	162
5. Sorting a Permutation Using Queues in Parallel	164
Exercises	168
Bibliography	169

**CHAPTER 8 Interval Graphs**

1. How It All Started	171
2. Some Characterizations of Interval Graphs	172
3. The Complexity of Consecutive 1's Testing	175
4. Applications of Interval Graphs	181
5. Preference and Indifference	185
6. Circular-Arc Graphs	188
Exercises	193
Bibliography	197

**CHAPTER 9 Superperfect Graphs**

1. Coloring Weighted Graphs	203
2. Superperfection	206
3. An Infinite Class of Superperfect Noncomparability Graphs	209

4.	When Does Superperfect Equal Comparability?	212
5.	Composition of Superperfect Graphs	214
6.	A Representation Using the Consecutive 1's Property	215
	Exercises	218
	Bibliography	218

## CHAPTER 10 Threshold Graphs

1.	The Threshold Dimension	219
2.	Degree Partition of Threshold Graphs	223
3.	A Characterization Using Permutations	227
4.	An Application to Synchronizing Parallel Processes	229
	Exercises	231
	Bibliography	234

## CHAPTER 11 Not So Perfect Graphs

1.	Sorting a Permutation Using Stacks in Parallel	235
2.	Intersecting Chords of a Circle	237
3.	Overlap Graphs	242
4.	Fast Algorithms for Maximum Stable Set and Maximum Clique of These Not So Perfect Graphs	244
5.	A Graph Theoretic Characterization of Overlap Graphs	248
	Exercises	251
	Bibliography	253

## CHAPTER 12 Perfect Gaussian Elimination

1.	Perfect Elimination Matrices	254
2.	Symmetric Matrices	256
3.	Perfect Elimination Bipartite Graphs	259
4.	Chordal Bipartite Graphs	261
	Exercises	264
	Bibliography	266

**Appendix**

A.	A Small Collection of NP-Complete Problems	269
B.	An Algorithm for Set Union, Intersection, Difference, and Symmetric Difference of Two Subsets	270
C.	Topological Sorting: An Example of Algorithm 2.4	271
D.	An Illustration of the Decomposition Algorithm	273
E.	The Properties P.E.B., C.B., (P.E.B.)', (C.B.)' Illustrated	273
F.	The Properties $C$ , $\bar{C}$ , $T$ , $\bar{T}$ Illustrated	275
	<i>Index</i>	277
