Alkali Halides

A Handbook of Physical Properties

With 60 Figures and 202 Tables

Springer

Contents

<i>Preface</i>	v
<i>Acknowledgements</i>	vii
<i>Introduction</i>	ix
1 Structure-Related Parameters	1
1.1 General Structural Information	1
1.2 X-ray Powder Diffraction Data	3
1.3 Lattice Constants	6
1.3.1 Lattice Constants at Room Temperature	6
1.3.2 Interionic Distances	7
1.3.3 Ionic Radii	8
1.4 Volumes: Molar Volume and Molecular Volume	10
1.5 Densities	11
1.6 Polymorphic Transitions – Transition Parameters	12
References	13
2 Mechanical Properties	15
2.1 Second Order Elastic Constants	15
2.1.1 Adiabatic Second Order Elastic Constants at Room Temperature	15
2.1.2 Adiabatic Elastic Compliances at Room Temperature	17
2.1.3 Elastic Anisotropy	18
2.1.4 Cauchy Inequality at Room Temperature	19
2.1.5 Low Temperature Adiabatic Elastic Constants	20
2.1.6 High Temperature Adiabatic Elastic Constants	21
2.1.7 Thermoelastic Constants at 0 °C	22
2.1.8 Temperature Derivatives of Elastic Constants at Constant Volume	23
2.1.9 Pressure Derivatives of Elastic Constants	24
2.2 Compressibility and Bulk Modulus	25
2.2.1 Compressibility and Bulk Modulus at RT and 0 K	25
2.2.2 Pressure and Temperature Derivatives of Compressibility (Experimental)	27
2.3 Polycrystalline Elastic Properties	28
2.3.1 Elastic Moduli of Polycrystalline Aggregates (RT)	28
2.3.2 Temperature Derivatives of Polycrystalline Elastic Moduli	30
2.3.3 Pressure Derivatives of Polycrystalline Elastic Moduli	30
2.4 Compression Data at High Pressures	31
2.4.1 Compression Data up to 45 kbars (Experimental)	31
2.4.2 Equation of State Parameters (Experimental)	34

2.4.3	Equation of State Parameters for CsCl Phase (Experimental)....	34
2.4.4	High Temperature Compression Data for NaCl (Experimental)	35
2.4.5	High Temperature Compression Data for NaCl (Theoretical) ...	35
2.5	Higher-Order Elastic Constants	38
2.5.1	Third-Order Elastic Constants (Experimental).....	38
2.5.2	Third-Order Elastic Constants (Theoretical).....	39
2.5.3	Fourth-Order Elastic Constants (Experimental).....	40
2.5.4	Fourth-Order Elastic Constants (Theoretical) at 300 K.....	41
2.6	Velocity of Sound	41
2.6.1	Velocities of Longitudinal Waves, Shear Waves and the Mean Velocity	41
2.6.2	Second Sound Velocity	43
2.7	Hardness	44
2.7.1	Hardness at Room Temperature	44
2.7.2	Knoop Hardness – Hardness Anisotropy.....	46
2.7.3	Temperature Variation of Hardness	46
2.7.4	Pressure Variation of Hardness	47
2.7.5	Surface Hardness.....	47
References	49
3	Thermal Properties.....	51
3.1	Specific Heat.....	51
3.1.1	Specific Heat at Low Temperatures (Experimental)	51
3.1.2	Specific Heat at Low Temperatures (Theoretical).....	54
3.1.3	Specific Heat at High Temperatures (Experimental).....	55
3.1.4	Pressure Variation of Specific Heat at RT.....	55
3.2	Thermal Expansion	56
3.2.1	Thermal Expansion Coefficient at Room Temperature.....	56
3.2.2	Thermal Expansion at Very Low Temperatures ($T < 12$ K)	58
3.2.3	Thermal Expansion at Low Temperatures (10 K $\leq T \leq 250$ K)..	59
3.2.4	Thermal Expansion at High Temperatures (300 K $\leq T \leq 1000$ K).....	60
3.2.5	Temperature Variation of Thermal Expansion (Polynomial Form).....	61
3.2.6	Pressure Variation of Thermal Expansion.....	63
3.3	Thermal Conductivity.....	64
3.3.1	Thermal Conductivity (Room Temperature).....	64
3.3.2	Temperature Variation of Thermal Conductivity	65
3.3.3	Pressure Variation of Thermal Conductivity	66
3.3.4	Thermal Conductivity of Doped Alkali Halides.....	67
3.4	Melting Temperatures.....	70
3.4.1	Melting Point at Atmospheric Pressure	70
3.4.2	Melting Parameters.....	71
3.4.3	Pressure Variation of Melting Point (Polynomial Form).....	72
3.4.4	Pressure Variation of Melting Point (Simon Equation).....	73
3.4.5	Pressure Coefficient of Melting Point and Entropy Change.....	74
3.4.6	Lindemann Parameter.....	75
3.5	Debye-Waller Factors	76
3.5.1	Debye-Waller Factors at RT (Expt. and Theor.)	76
3.5.2	Debye-Waller Factors at Low Temperatures.....	77

3.5.3	Debye-Waller Factors close to Melting Point	77
3.5.4	Temperature Variation of Debye-Waller factors (Experimental).....	77
3.5.5	Temperature Variation of Debye-Waller Factors (Theoretical) ..	79
3.6	Debye Temperature	81
3.6.1	Debye Temperatures at Room Temperature.....	81
3.6.2	Debye Temperatures at ~ 0 K	82
3.6.3	Temperature Variation of Debye Temperatures at Low Temperature	83
3.6.4	Temperature Variation of Debye Temperature (High Temperatures).....	87
3.6.5	Pressure Variation of Debye Temperature	90
3.7	Gruneisen Parameter.....	91
3.7.1	Gruneisen Parameter (γ) at Room Temperature	91
3.7.2	Temperature Variation of Gruneisen Parameter.....	92
3.7.3	Low and High Temperature Limits of Gruneisen Parameter	93
3.7.4	Volume Dependence of Gruneisen Parameter.....	95
3.7.5	Mode Gruneisen Parameters.....	96
3.8	Anderson-Gruneisen Parameter.....	97
	References	99
4	Optical Properties.....	103
4.1	Refractive Index.....	103
4.1.1	Refractive Index at RT	103
4.1.2	Dispersion Equations for Refractive Index.....	105
4.1.3	Temperature Derivative of Refractive Index at Selected Wavelengths	107
4.1.4	Temperature Derivative of Refractive index – Dispersion Equations (Empirical).....	108
4.1.5	Density Derivative of Refractive Index (Experimental).....	109
4.1.6	Pressure Derivative of Refractive Index.....	109
4.1.7	Pressure Variation of Refractive Index (Experimental)	110
4.2	Photoelasticity.....	111
4.2.1	Strain-Optical Constants.....	111
4.2.2	Stress-Optical Constants.....	112
4.2.3	Dispersion of Photoelastic Constants	113
4.2.4	Polycrystalline Photoelastic Constants.....	116
4.3	Faraday Effect.....	118
4.3.1	Verdet Constant and its Temperature Coefficient	118
4.3.2	Dispersion of Verdet Constant	120
4.4	Quadratic Electro-optic Effect.....	121
4.5	Laser-Related Properties.....	122
4.5.1	Optical Transmittance	122
4.5.2	Linear Absorption Coefficient.....	124
4.5.3	Two-Photon Absorption Coefficient	125
4.5.4	Three-Photon Absorption Coefficient	126
4.5.5	Nonlinear Refractive Index	126
4.5.6	Bulk Damage Threshold Parameters	126
4.6	Harmonic Generation.....	127

4.6.1	Second Harmonic Generation Parameters at Crystal-Glass Boundary	127
4.6.2	Third Harmonic Generation Parameters	127
4.7	Polarisability	128
4.7.1	Electronic Polarisabilities	128
4.7.2	Strain Derivative of Polarisability	129
4.7.3	Wavelength and Temperature Variation of the Strain Polarisability Constant	130
4.7.4	Pressure Variation of Polarisability	131
4.7.5	Quadrupole and Octupole Polarisabilities	133
	References	134
5	Dielectric and Electrical Properties	137
5.1	Static Dielectric Constant	137
5.1.1	Static Dielectric Constant at Room Temperature	137
5.1.2	Static Dielectric Constant at Low Temperatures	138
5.1.3	Temperature Coefficient of the Static Dielectric Constant at Low Temperatures	139
5.1.4	First and Second Temperature Derivatives of the Static Dielectric Constant	140
5.1.5	High Temperature Data on Static Dielectric Constant	140
5.1.6	Pressure Coefficient of Static Dielectric Constant	142
5.1.7	Higher-Order Pressure Derivatives of Static Dielectric Constant	143
5.2	Electronic Dielectric Constant	144
5.3	Dielectric Polarisability	145
5.4	Effective Ionic Charge	146
5.4.1	Effective Ionic Charge (Szigeti Charge)	146
5.4.2	Temperature and Volume Derivatives of Effective Ionic Charge	148
5.5	Electrostriction	149
5.6	Electric Breakdown	150
	References	152
6	Phonon Spectra	155
6.1	IR Spectra	155
6.1.1	Transverse Optical and Longitudinal Optical Frequencies (RT)	155
6.1.2	Temperature Variation of TO Frequencies (Low Temp.)	157
6.1.3	Temperature Variation of TO and LO Frequencies (High Temp.)	158
6.1.4	Temperature Variation of Damping Constant	159
6.1.5	Pressure Derivative of $k \sim 0$ ν_{TO} Frequency	159
6.1.6	Pressure Variation of $k \sim 0$ ν_{TO} , ν_{LO} Frequencies at High Pressures	160
6.2	Raman spectra	162
6.2.1	Second-Order Raman Spectra	162
6.2.2	Second-Order Laser Raman Spectra	163

6.2.3	Second-Order Raman Spectra of Alkali Fluorides (Expt. and Theor.)	164
6.2.4	Hyper-Raman Spectra (HRS) and Electric Field Induced First-Order Raman Spectra (EFIRS)	165
6.3	Neutron Inelastic Scattering	166
6.3.1	Phonon Dispersion Relations from Neutron Inelastic Scattering	166
6.3.2	Phonon Frequencies at Zone Centre and Zone Boundary	171
	References	172
7	Chemical-Bond-Related Parameters	173
7.1	Lattice Energy	173
7.1.1	Interatomic Potentials and Expressions for Theoretical Lattice Energy	173
7.1.2	Structural Parameters in Lattice Energy Formulae for Alkali Halides	174
7.1.3	Van der Waal Constants	175
7.1.4	Born Repulsion Parameters	176
7.1.5	Parameters of the Huggins-Mayer form	177
7.1.6	Lattice Energy (Theoretical)	178
7.1.7	Lattice Energy (Experimental)	178
7.2	Electron Affinity	180
7.3	Ionicity	180
7.4	Electron Density Distribution	182
7.5	Force Constant	183
	References	185
8	Band-Structure-Related Parameters	187
8.1	Typical Band Structures	187
8.2	Band Structure Parameters	190
8.2.1	Band Gap Energy	190
8.2.2	Pressure Derivative of Band Gap	191
8.2.3	Valence Band Width	192
8.2.4	Effective Mass	193
8.2.5	Interband Transition Energy	193
8.3	UV Absorption Spectra	194
8.3.1	UV Absorption Spectra (5–12 eV)	194
8.3.2	Extreme UV Absorption Spectra (50–250 eV)	207
8.4	Exciton Spectra	214
8.4.1	Exciton Energy	214
8.4.2	Pressure Derivative of Exciton Energy	216
8.5	UV Photoelectron and X-ray Photon Emission	216
8.6	Characteristic Electron Energy Loss Spectra	217
8.7	Plasma Oscillation Frequency	219
8.8	Metallisation and Superconductivity	220
	References	221

9 Defect State Parameters	223
9.1 Schottky Defects	223
9.1.1 Temperature Variation of Ionic Conductivity (Diagrams)	223
9.1.2 Temperature Variation of Ionic Conductivity (2-Parameter Equation)	224
9.1.3 Temperature Variation of Ionic Conductivity (4-Parameter Equation)	225
9.1.4 Temperature Variation of Ionic Conductivity (6-Parameter Equation)	225
9.1.5 Diffusion Parameters	226
9.1.6 Enthalpy of Formation of a Schottky Pair (Different Methods)	227
9.1.7 Pressure Variation of Ionic Conductivity (σ - P Plots)	228
9.1.8 Pressure Variation of Ionic Conductivity (Pressure Coefficient and Activation Volume)	231
9.1.9 Vacancy-Impurity Dipoles	232
9.1.10 Solution Enthalpy of Divalent Defects	233
9.2 Polarons	233
9.2.1 Polaron Coupling Constant	233
9.2.2 Polaron Mass	234
9.3 Colour Centres	235
9.3.1 Glossary of Colour Centres	235
9.3.2 F Centre Parameters	236
9.3.3 F Centre Formation Energy	238
9.3.4 EPR and ENDOR Parameters for F Centres	240
9.3.5 F Centres (Faraday Rotation and Circular Dichroism)	241
9.3.6 F Centres (Dissociation Energy)	241
9.3.7 F Centres (Temperature Variation of Peak Position)	242
9.3.8 F Centres (Temperature Variation of Half-Width)	244
9.3.9 F Centres (Pressure Variation)	245
9.3.10 Deformation Bleaching and Mechanoluminescence Parameters	246
9.3.11 F Aggregate Centres (R_1 , R_2 , M , N_1 , N_2 , V_3 and F_3^+ Centres) ..	247
9.3.12 Temperature Variation of M Band Half-Width	248
9.3.13 Pressure Variation of M, R_2 and N Frequencies	249
9.3.14 U Centre (Main UV Bands)	249
9.3.15 U Centre (Localised IR Bands)	250
9.3.16 U_2 Centres	251
9.3.17 F_A Centres	251
9.3.18 Z Centres	252
9.3.19 Colour Centre Information Storage	253
9.3.20 Colour Centre Lasers	254
9.4 Luminescence	255
9.4.1 Intrinsic Luminescence	255
9.4.2 Auger-Free Luminescence	256
9.4.3 Thermoluminescence	259
9.5 Dislocations	260
9.5.1 Slip (Glide) Systems	260
9.5.2 Stacking Fault Energy	260
9.5.3 Dislocation Mobility Parameters	261

9.5.4 Etchants for Observation of Dislocations	261
References	264
10 Miscellaneous Properties	267
10.1 Mass-Related Parameters	267
10.2 Polishing Agents	268
10.3 Solubility	268
10.4 Magnetic Susceptibility	270
10.5 X-ray Monochromator Parameters	271
10.6 Positron Annihilation	271
10.6.1 Two-Photon Angular Correlation Cut-off Angle	271
10.6.2 Momentum Distribution of Annihilating Electron-Positron Pairs	272
10.6.3 Positron Annihilation Lifetimes	273
10.6.4 Positron Annihilation Rates	274
10.7 Radiation Detection	276
10.8 Surface Properties	276
10.9 Secondary Electron Emission	278
10.10 Nuclear Quadrupole Relaxation Time	278
References	280
Index	281
