Depositional Sedimentary Environments

With Reference to Terrigenous Clastics

Second, Revised and Updated Edition

With 683 Figures

Springer-Verlag
Berlin Heidelberg New York 1980

Contents

Part I. Primary Structures and Textures

Introduction	3
Depositional Environments	5
Physical Parameters	8
General Information	8
Primary Sedimentary Structures	8
Sediment Grain Movement	9
Mode of Sediment Transport	11
Hydrodynamic Factors and Bedforms in Water	12
Flow Regime	12
Lower Flow Regime	12
Transition Regime	12
Upper Flow Regime	13
Bedforms	13
Plane Bed Without Movement	13
Small Ripples	14
Megaripples	14
Plane Bed with Sediment Movement	15
Antidunes	15
Chutes and Pools	16
“Sand Waves”	16
Megaripples and Sand Waves	17
Study of Bedload Transport	17
Rate of Migration of Bedforms	18
Bedforms, Stream Power, and Water Depth	18
Depth-Velocity-Size Diagram	20
Current and Wave Ripples	22
General Information	22
Description of Ripple Marks	22
Internal Structure of a Ripple	23
Pattern of Flow over a Lee Face of a Small Ripple, a Megaripple, and “Microdeltas”	25
Zone of No Diffusion	26
Zone of Mixing	26
Zone of Backflow	26
Development of Lamination in the Lee Face	27
Variables Controlling the Shape and Slope of Foreset Laminae	29
Causes for the Production of Foreset Laminae of Varying Composition	29

Sediment Movement in Symmetrical Wave Ripples	30
Sediment Movement in Asymmetrical Wave Ripples	31
Wave Ripples	32
Symmetrical Wave Ripples	32
Asymmetrical Wave Ripples	33
Current Ripples	36
Small-Current Ripples	36
Megaripples	40
Giant Ripples	44
Antidunes	47
Combined Current/Wave Ripples	48
Longitudinal Combined Current/Wave Ripples	48
Transverse Combined Current/Wave Ripples	48
Isolated Ripples	49
Wind Ripples	49
Movement of Sand in a Wind Regime	49
Wind Sand Ripples	50
Wind Granule Ripples	51
Tables for the Identification of Ripples	52
Distribution of Ripples in Various Depositional Environments	52
Surface Markings and Imprints	56
Mud and Sand Volcanoes and Other Similar Features	56
Clastic Dykes	58
Mud Cracks	59
Frost and Ice Cracks	60
Raindrop Imprints	61
Foam Impressions	62
Crystal Imprints and Casts	63
Water Level Marks	64
Primary Current Lineation	64
Wrinkle Marks	65
Millimeter Ripples	65
Antiripplets (Adhesion Ripples)	65
Bubble Sand Structure and Other Bubble Cavities	66
Swash Marks	67
Rill Marks	68
Scour-and-Fill Structures	71
Channels	71
Scour Marks	73
Flute Marks	73
Transverse Scour Marks	74
Flute Rill Marks	75
Longitudinal Furrows and Ridges	75
Triangular Marks Tapering Down-Current	76
Pillow-like Scour Marks	76
Harrow Marks	77
Setulfs	77
Tool Marks	78
Stationary Tool Marks	78
Obstacle Marks	78
Moving Tool Marks	79

Groove Marks	80
Chevron Marks	81
Prod Marks	81
Bounce Marks	82
Brush Marks	82
Skip and Roll Marks	82
Penecontemporaneous Deformation Structures	84
Load Structures	84
Ball-and-Pillow Structure	86
Convolute Bedding	87
Dish Structures	89
Slump Structures	90
Water-Escape Structures	93
Bedding	95
General Information	95
Cross-bedding	97
Small-ripple Bedding	101
Megaripple Bedding	102
Wave-ripple Bedding	103
Longitudinal Cross-bedding	104
Channel-fill Cross-bedding	105
Antidune Cross-bedding	106
Microdelta Cross-bedding	106
Beach and Longshore Bar Cross-bedding	107
Sand Dune Cross-bedding	107
Sand-Drift Cross-bedding	108
Scour-and-Fill Cross-bedding	109
Low-Angle Cross-bedding in Fluvial Sediments	109
Planar Cross-bedding of Fluvial Bars	109
Backset Bedding	109
Climbing-ripple Lamination	109
Flaser and Lenticular Bedding	112
Ripple Bedding with Flasers	113
Flaser Bedding	113
Wavy Bedding	114
Lenticular Bedding	114
Graded Bedding	118
Evenly Laminated Sand and Horizontal Bedding	120
Coarsely Interlayered Bedding	122
Thinly Interlayered Bedding (Rhythmites)	123
Thinly Laminated Mud	130
Homogeneous Bedding	130
Thin Sand Layers	130
Sediment Grain Parameters	132
General Information	132
Grain Size	132
Grain-Size Distribution	132
Suspension Transport	135
Saltation Transport	136
Rolling Transport	136
Shape and Roundness of Sediment Grains	138
Shape and Roundness of Gravel	138
Shape and Roundness of Sand	141

Surface Texture of Sediment Grains	142
Primary Fabric or Grain Orientation	145
Orientation of Pebbles	145
Orientation of Sand Grains	147
Orientation of Clay Particles	148
Orientation of Organic Remains	148
Chemical and Mineralogical Parameters	150
Oxidation-Reduction Potential (Eh)	150
Acidity-Alkalinity	150
Salinity	150
Temperature	151
Index Minerals	151
Color	152
Trace Elements	152
Biological Parameters	154
General Information	154
Hard Skeletal Parts	154
Bioturbation Structures	158
Surface Lebensspuren	161
Internal Lebensspuren	162
Dwelling Structures	162
Characterizing of Environments by Lebensspuren	165
Fecal Pellets	171
Environmental Reconstructions	175

Part. II. Modern Environments

Introduction	179
General Information	179
Importance of Sequence in Environmental Reconstruction	181
Glacial Environment	185
General Information	185
Geomorphology of Glaciers	185
Glacial Flow	188
Glacial Erosion	188
Glacial Transport	190
Glacial Deposit	192
Eskers	193
Kames	196
Small-Delta Deposits	197
Glacial Lake Deposits	201
Sandur Deposits	202
Interglacial Deposits	205
Evidences of Glacial Activity	206
Grain Size Characteristics of Glacial Deposits	206
Wind Activity in Outwash Plains	208
Ancient Sediments of Glacial Environments	208
Desert Environment	209
General Information	209

Erosion and Sedimentation Processes in the Desert	210
Deposits of Desert Environments	212
Hamada Deposits	213
Serir Deposits	214
Desert Lake and Inland Sebkha Deposits	215
Wadi Deposits	217
Aeolian Sand Deposits	219
Sand Drifts and Sand Shadows	221
Gozes	221
Sand Sheets	221
Sand Dunes	222
Internal Structure of Sand Dunes	222
Sand Dune Types	228
Interdune Areas	236
Dust or Loess Deposits	237
Grain-size Characteristics of Aeolian Sand Deposits	238
Identification of the Desert Environment in Ancient Sediments	239
Wind-deposited Sands	239
Water-deposited Sediments	240
Criterion for the Recognition of Subaerial Exposure of Water-laid Sediments	240
Ancient Deposits of the Desert Environments	240
Lake Environment	241
General Information	241
Clastic Lake Deposits	241
Lake Geneva	243
Lake Constance	245
Rhine River Delta in Lake Constance	247
Distribution of Sedimentary Structures in the Delta Body	250
Central Basin Plain and Lateral Slope of Lake Constance	250
Lake Thun, Lake Brienz, and Walensee	251
The Life in the Lakes	253
Chemical Precipitates in Lakes	253
Examples of Ancient Lake Deposits	254
Summary	255
Fluvial Environment	257
General Information	257
Channel Pattern	258
Straight Channels	259
Braided Channels	260
Meandering Channels	260
Fluvial Bars	262
Compound Bar-Like Features (Channel Bars)	264
Form of a Channel and Fluvial Processes	264
Fluvial Environments and Their Deposits	265
Channel Lag Deposits	266
Point Bar Deposits	267
Fine-Grained Point Bar Deposits	269
Coarse-Grained Point Bar Deposits	274
Channel Bar and Braided River Deposits	280
Gravelly Braid Bar Deposits	280

General Characteristics of Gravelly Braided Stream Deposits	282
Development of Sequence	284
Fine-Grained Braid Bar Deposits	284
Deposits of Suspended Load Rivers	288
Natural Levee Deposits	289
Crevasse-Splay Deposits	291
Channel-fill Deposits (Cut-off Channels and Lakes)	292
Flood Basin Deposits	295
Flood Plain Deposits	298
Alluvial Fan Deposits	298
Debris-Flow Deposits	301
Water-Laid Deposits	302
Distribution of Facies in a Fan	303
Humid Alluvial Fans	304
Fluvial Associations	305
Alluvial Fan Association	305
Flood Plain Association	306
Coastal Plain-Delta Association	306
Some General Remarks	306
Ephemeral Stream Deposits	310
Role of Aeolian Sediments in Fluvial Deposits	311
Grain-size Characteristics of Fluvial Sediments	311
Ancient Fluvial Deposits	312
Estuarine Environment	315
General Information	315
Classification and Hydrography of Estuaries	315
Sedimentation and Bioturbation	315
Fjords	319
Summary	319
Deltaic Environment	321
General Information	321
The Structure of a Delta	322
Subenvironments of a Delta	323
Subenvironments of Subaerial Topset Deposits	324
Subaqueous Topset Deposits and Their Environments	326
Deltaic Sand Bodies	328
Prodelta Environment	333
Shelf-mud Environment (Delta Bottomset)	334
Development of Repetitive Lateral and Vertical Sequences in a Delta System	334
Examples of Ancient Deposits of the Delta Environment	337
Summary	337
The Coast	339
Introduction	339
The Coast: Definition and Classification	339
Coastal Sand	340
Geomorphology of Coastal Sand (Beach)	345
Beach Dynamics and Sediment Transport	347
Coastal Sand Dunes	350
Beach Ridges and Cheniers	352
Beach Ridges of the Coast of Nayarit, Mexico	355
Chenier Plain of Southwestern Louisiana	356

Washover Fans	359
Backshore	360
Foreshore	363
Shoreface	368
Vertical Sequences of Coastal Sand	370
The Shelf	371
Hydrodynamic Conditions on the Continental Shelf	371
Transition Zone	373
Shelf Sediments	374
Sand Deposits on the Continental Shelf	377
Sand Ribbons	377
Comet Marks and Sand Shadows	378
Giant Ripples	378
Tidal Current Ridges	378
Examples of Ancient Sand Deposits of the Shelf	381
Examples of Beach-Shelf Profiles from Modern Environments	382
Introduction	382
Beach Sand-Shelf Mud Profile, Gulf of Gaeta, Mediterranean Sea, Italy	382
Channels and Sand Bars (Shoals) – Channels and Sand Tongues, North Sea	386
The Channels and Sand Bars (Shoals) of the Outer Jade, North Sea	386
Sand Tongues (Shoals) and Channels in the Region of Nordergründe, North Sea	388
Tidal Inlets and Tidal Deltas	392
Profile of the Büsum: Coastal Sand – Transition Zone – Shelf Mud with Storm Sand Layers	394
Coastal Sand	394
Transition Zone	394
Shelf Mud with Storm Sand Layers	395
Profiles of the Two East Frisian Barrier Islands, Norderney Island and Wangerooge Island, North Sea	397
Galveston Island (Gulf of Mexico, U.S.A.)	398
Beach Profile of a High-energy Coast, Oregon, U.S.A.	400
A “High-Energy” Beach-to-Offshore Sequence, California, U.S.A.	404
Beach-Shelf Profile, Sapelo Island, Georgia, U.S.A.	405
Introduction	405
Distribution of Sedimentary Structures	406
Distribution of Fauna	408
Distribution of Trace Fossils	409
Summary	409
Beach-to-Offshore Profile on Gravelly Coasts, Costa Brava, Spain	410
Coastal Upwelling	412
Glacial Marine Sediments	413
Mineral Deposits on the Shelf	415
Examples of Ancient Coastal Sand and Shelf Sediments	415
Remarks	422
Coastal Lagoons	424
General Information	424
Distribution of Sediment and Sedimentary Structures	425
Example of a Modern Coastal Lagoon	425

Barrier Beach	426
Barrier and Sand Bar	426
Tidal Delta and Algal-bound Sand Flats	427
Tidal Channels	427
Lagoonal Bottom (Subtidal Pond)	427
Gullies (Tidal Creeks)	427
Intertidal Zone	427
Barren Zone	428
Marsh	428
Salt Pans	428
Examples of Ancient Lagoonal Sediments	428
Summary	428
Tidal Flats	430
General Information	430
Physiography and Morphology.	431
Type of Bedding in Tidal Flat Sediments	432
Bioturbation and Fauna	434
Tidal Channels	434
Surface Structures	440
Drift Ice Action	443
Horizontal and Vertical Sequences of Tidal Flat Deposits and Intertidal Sandbars	443
The Tidal Flats of Saint-Michel	445
Wind Tidal Flats	445
Tidal Flats of Taiwan	445
The Saltmarsh	447
Freshwater Tidal Flats	448
Intertidal Sandbars	452
Diagnostic Features of Tidal Flat Deposits	454
Ancient Tidal Flat Deposits	455
Continental Margin, Slope and Ocean Basin	457
General Information	457
Major Units of Continental Margins	457
Tectonic or Erosional Type of Continental Margin	459
Depositional Continental Margins	459
Submarine Canyons and Fan Valleys	462
Transport System in the Continental Shelf, Margin and Ocean Basins	463
Fluvial Mixed Transport and Separation of Sand and Lutum (Mud).	465
High-density, High-velocity Turbidity Currents and Turbidite Deposits	466
Transport and Deposition of Sand	469
Transport and Deposition of Sand-Debris Flow and Pebbly Mudstone Deposits	471
Deposition in Submarine Canyons and Deep-Sea Fan Regions	472
Examples of Ancient Deep-Sea Fan and Fan Valley Deposits	477
Low-velocity, Low-density Turbidity Currents	479
Contour Currents and Contourites	482
Large-scale Gravity Slide and Slump Deposits	485
Deep-Sea Sediments: Recent and Ancient	486
Brown Clay (Red Clay)	488
Globigerina Ooze	488

Radiolarian Ooze	488
Diatom Ooze	488
Pteropod Ooze	488
Diagenetic (Hydrogenous) Deposits	488
Manganese Nodules	488
Terrigenous Deposits	488
Current Markings and Related Sedimentary Structures in the Deep-Sea Sediments	489
Bedding and Bioturbation Structures in the Bottom. Samples of Deep-Sea Sediments of the East African Coast	491
Distribution of Sediments	491
Red Deep-Sea Clay	492
Globigerina Ooze	493
Foraminiferal Sand	496
Olive-gray Mud.	496
Biogenic Carbonate Sand	496
Continental Slope, Rise and Abyssal Plain of the Gulf of Mexico	496
General Information	496
Sedimentary Structures in the Sediments of the Gulf of Mexico	497
Distribution of Sedimentary Structures over Physiographic Provinces	498
Sedimentation in the Deeper Parts of the Adjacent Seas	499
Concluding Remarks	503
References	505
Subject Index	543
