

# **Modelling of Structure and Reactivity in Zeolites**

*edited by*

**C.R.A. Catlow**  
*The Royal Institution, London.*

**ACADEMIC PRESS**

*Harcourt Brace Jovanovich, Publishers*

London • San Diego • New York • Boston

Sydney • Tokyo • Toronto

# Contents

Preface	v
Contributors	vii
1 Zeolites: Structure, Synthesis and Properties—An Introduction <i>C.R.A. Catlow</i>	1
2 The Prediction of Zeolite Structures <i>G.D. Price, I.G. Wood and D.E. Akporiaye</i>	19
3 Lattice Energy and Free Energy Minimization of Zeolites <i>R.A. Jackson, S.C. Parker and P. Tschauferer</i>	43
4 Computer Simulations of the Structure, Thermochemistry and Dynamics of Adsorbed Molecules in Zeolite and Related Catalysts <i>A.K. Cheetham and J.D. Gale</i>	63
5 Molecular Dynamics Studies on Zeolites <i>P. Demontis and G.B. Suffritti</i>	79
6 Zeolite Computer Graphics <i>C.M. Freeman, S.M. Levine, J.M. Newsam, J. Sauer, S.M. Tomlinson, J. Brickmann and R.G. Bell</i>	133
7 Structural Chemistry of Zeolites: Solid State Electronegativity and Sensitivity Analysis <i>B.G. Baekelandt, W.J. Mortier and R.A. Schoonheydt</i>	157
8 Quantum Mechanical Studies of Zeolites <i>J. Sauer</i>	183
9 Electronic Structure of the Molecules Adsorbed in Zeolites <i>R. Vetrivel and C.R.A. Catlow</i>	217
10 Population Balance Analysis of Zeolite Crystallization <i>R.W. Thompson</i>	231
Index	257
