

Liquid-Vapor Phase-Change Phenomena

An Introduction to the Thermophysics of
Vaporization and Condensation Processes
in Heat Transfer Equipment

Third Edition

Van P. Carey

CRC Press

Taylor & Francis Group

Contents

Preface.....	xi
Nomenclature.....	xiii
Author Biography.....	xix
Introductory Remarks.....	xxi

PART I Thermodynamic and Mechanical Aspects of Interfacial Phenomena and Phase Transitions

Chapter 1	The Liquid-Vapor Interfacial Region: A Nanoscale Perspective	3
1.1	A Molecular Perspective on Liquid-Vapor Transitions	3
1.2	The Interfacial Region - Molecular Theories of Capillarity	11
1.3	Nanoscale Features of the Interfacial Region	17
1.4	Molecular Dynamics Simulation Studies of Interfacial Region Thermophysics.....	21
1.5	Small System Effects.....	26
	References	34
	Problems.....	36
Chapter 2	The Liquid-Vapor Interface: A Macroscopic Treatment	39
2.1	Thermodynamic Analysis of Interfacial Tension Effects.....	39
2.2	Determination of Interface Shapes at Equilibrium	45
2.3	Temperature and Surfactant Effects on Interfacial Tension.....	51
2.4	Surface Tension in Mixtures	54
2.5	Near Critical Point Behavior	56
2.6	Effects of Interfacial Tension Gradients.....	57
	References	64
	Problems.....	65
Chapter 3	Wetting Phenomena and Contact Angles.....	69
3.1	Equilibrium Contact Angles on Smooth Surfaces	69
3.2	Wettability, Cohesion, and Adhesion	72
3.3	The Effect of Liquid Surface Tension on Contact Angle	76
3.4	Adsorption and Spread Thin Films	79
3.5	Contact Angle Hysteresis	85
3.6	Other Metrics for Wettability.....	90
3.7	A Nanoscale View of Wettability.....	94
3.8	Wetting of Microstructured and Nanostructured Surfaces	96
	References	103
	Problems.....	105

Chapter 4	Transport Effects and Dynamic Behavior at Interfaces.....	109
4.1	Transport Boundary Conditions.....	109
4.2	Kelvin-Helmholtz and Rayleigh-Taylor Instabilities.....	113
4.3	Interface Stability of Liquid Jets.....	121
4.4	Waves on Liquid Films.....	127
4.5	Interfacial Resistance in Vaporization and Condensation Processes.....	134
4.6	Maximum Flux Limitations.....	142
4.7	Non-Equilibrium and Heat Flux Effects on Interface Boundary Conditions.....	146
	References.....	149
	Problems.....	151
Chapter 5	Phase Stability and Homogeneous Nucleation.....	153
5.1	Metastable States and Phase Stability.....	153
5.2	Thermodynamic Aspects of Homogeneous Nucleation in Superheated Liquid.....	164
5.3	The Kinetic Limit of Superheat.....	171
5.4	Comparison of Theoretical and Measured Superheat Limits.....	176
5.5	Thermodynamic Aspects of Homogeneous Nucleation in Supercooled Vapor.....	180
5.6	The Kinetic Limit of Supersaturation.....	184
5.7	Wall Interaction Effects on Homogeneous Nucleation.....	189
5.8	Nanobubbles.....	192
	References.....	197
	Problems.....	198
 PART II Boiling and Condensation Near Immersed Bodies		
Chapter 6	Heterogeneous Nucleation and Bubble Growth in Liquids.....	203
6.1	Heterogeneous Nucleation at a Smooth Interface.....	203
6.2	Nucleation from Entrapped Gas or Vapor in Cavities.....	209
6.3	Criteria for the Onset of Nucleate Boiling.....	217
6.4	Bubble Growth in an Extensive Liquid Pool.....	222
6.5	Bubble Growth Near Heated Surfaces.....	228
6.6	Bubble Departure Diameter and the Frequency of Bubble Release.....	235
	References.....	242
	Problems.....	245
Chapter 7	Pool Boiling.....	249
7.1	Regimes of Pool Boiling.....	249
7.2	Mechanisms and Models of Transport During Nucleate Boiling.....	254
7.3	Correlation of Nucleate Boiling Heat Transfer Data.....	265
7.4	Limitations of Nucleate Boiling Processes and the Maximum Heat Flux Transition.....	275
7.5	Minimum Heat Flux Conditions.....	291
7.6	Film Boiling.....	293

7.7 Transition Boiling..... 316
 References 322
 Problems..... 327

Chapter 8 Other Aspects of Boiling and Evaporation in an Extensive Ambient..... 331

8.1 Additional Parametric Effects on Pool Boiling..... 331
 8.2 The Leidenfrost Phenomenon 341
 8.3 Fluid-Wall Interactions and Disjoining Pressure Effects 351
 8.4 Pool Boiling Heat Transfer on Micro and Nano Structured Surfaces..... 362
 8.5 Fundamentals of Pool Boiling in Binary Mixtures..... 367
 References 381
 Problems..... 387

Chapter 9 External Condensation 391

9.1 Heterogeneous Nucleation in Vapors 391
 9.2 Dropwise Condensation..... 395
 9.3 Film Condensation on a Flat, Vertical Surface 404
 9.4 Film Condensation on Cylinders and Axisymmetric Bodies..... 419
 9.5 Effects of Vapor Motion and Interfacial Waves 423
 9.6 Condensation in the Presence of a Noncondensable Gas 428
 9.7 Enhancement of Condensation Heat Transfer 438
 References 442
 Problems..... 447

PART III Internal Flow Convective Boiling and Condensation

Chapter 10 Introduction to Two-Phase Flow 453

10.1 Two-Phase Flow Regimes 453
 10.2 Basic Models and Governing Equations for One-Dimensional
 Two-Phase Flow 463
 10.3 Determination of the Two-Phase Multiplier and Void Fraction..... 470
 10.4 Analytical Models of Annular Flow 487
 10.5 Effects of Flow Passage Size and Geometry..... 498
 References 500
 Problems..... 503

Chapter 11 Internal Convective Condensation 507

11.1 Regimes of Convective Condensation in Conventional (Macro) Tubes 507
 11.2 Analytical Modeling of Downflow Internal Convective Condensation 511
 11.3 Correlation Methods for Convective Condensation Heat Transfer..... 519
 11.4 Convective Condensation in Microchannels, Advanced Modeling,
 and Special Topics 535
 11.5 Internal Convective Condensation of Binary Mixtures 542
 References 549
 Problems..... 552

Chapter 12 Convective Boiling in Tubes and Channels	555
12.1 Regimes of Convective Boiling in Conventional (Macro) Tubes	555
12.2 Onset of Boiling in Internal Flows	561
12.3 Subcooled Flow Boiling	567
12.4 Saturated Flow Boiling	575
12.5 Critical Heat Flux Conditions for Internal Flow Boiling	590
12.6 Post-CHF Internal Flow Boiling	608
12.7 Internal Flow Boiling in Microchannels and Complex Enhanced Flow Passages	625
12.8 Internal Flow Boiling of Binary Mixtures	639
References	650
Problems	661
Appendix I: Basic Elements of the Kinetic Theory of Gases	663
Appendix II: Saturation Properties of Selected Fluids	673
Appendix III: Analysis Details for the Molecular Theory of Capillarity	681
Index	687
