

Kirsten A. Morris

Controller Design for Distributed Parameter Systems

Contents

1 Introduction	1
References	11
2 Infinite-Dimensional Systems Theory	13
2.1 Riesz-Spectral Operators	26
2.2 Lumer-Phillips Theorem	31
2.3 Sesquilinear Forms	39
2.4 Control	46
2.5 Observation	49
2.6 Controllability and Observability	53
2.7 Input/Output Maps	59
2.8 Notes and References	67
References	68
3 Dynamics and Stability	71
3.1 Sesquilinear Forms	77
3.2 Spectrum Determined Growth	84
3.3 Boundary Conditions	88
3.4 External Stability	95
3.5 Notes and References	100
References	101
4 Optimal Linear-Quadratic Controller Design	103
4.1 Finite-Time Optimal Linear Quadratic Control	104
4.2 Infinite-Time Optimal Linear Quadratic Control	107
4.3 Solving the Algebraic Riccati Equation	123
4.4 LQ-Optimal Actuator Location	130
4.5 Notes and References	150
References	152

5	Disturbances	155
5.1	Fixed Disturbance	156
5.2	\mathbb{H}_2 -Optimal Actuator Location	160
5.3	Unknown Disturbance	170
5.4	Solving \mathbb{H}_∞ -Algebraic Riccati Equations	177
5.5	\mathbb{H}_∞ -Optimal Actuator Location	183
5.6	Notes and References	189
	References	190
6	Estimation	191
6.1	Minimum Variance Estimation	192
6.2	Output Estimation	197
6.2.1	\mathbb{H}_2 -Output Estimation	198
6.2.2	\mathbb{H}_∞ -Output Estimation	200
6.3	Optimal Sensor Location	206
6.4	Notes and References	217
	References	217
7	Output Feedback Controller Design	219
7.1	Dissipativity	220
7.2	Final Value Theorem	224
7.3	Approximation of Control Systems	226
7.4	State-Space Based Controller Design	232
7.5	\mathbb{H}_2 - and \mathbb{H}_∞ -Controller Design	236
7.5.1	\mathbb{H}_2 -Cost	238
7.5.2	\mathbb{H}_∞ -Cost	239
7.6	Notes and References	249
	References	251
	Appendix: Functional Analysis and Operators	253
	Index	285
