Multi-Body Dynamics:
Monitoring and Simulation Techniques

Edited by
Dr Homer Rahnejat
and
Professor Robert Whalley
## Contents

### About the Editors

ix

### Preface

xi

### Power Train Dynamics

Dynamics and lubrication with particular reference to the internal combustion engine

_D Dowson and C M Taylor_  
3

Hybrid vehicles – fact or fiction

_C B Besant and M R Etemad_  
15

Clutch pedal dynamic noise and vibration investigation

_P Kelly and H Rahnejat_  
23

Investigation of clonk phenomenon in vehicle transmissions – measurement, modelling, and simulation

_J W Biermann and B Hagerodt_  
33

Practical applications of dynamic system modelling in powertrain and vehicle refinement

_N N Powell and J P March_  
47

System layout considerations for turbo-generator based hybrid vehicles

_C Leontopoulos and S Etemad_  
59

The application of dynamic modelling using parametric design methods for an automotive driveline system

_M Menday and M Ebrahimi_  
69

Driveline vibration analysis of a Land Rover four wheel-drive vehicle

_K J Allin and N A McGowan_  
81

Hybrid modelling of marine power transmission systems

_H Bartlett, R Whalley, and S S I Rizvi_  
97

Inlet manifold modelling for four-stroke engines

_S Thompson, B Kelso, M Thornhill, and N Creary_  
109

Gas turbine engine dynamic model identification using spectral analysis for condition monitoring

_V Y Arkov and G G Kulikov_  
123

### Contact Mechanics and Elasto-hydrodynamics

Contact mechanics viewed as a problem in multibody theory

_J J Kalker_  
135

Virtual prototype testing applied for non-linear dynamic analysis of a vehicle tailgate
   P Rade, M Kushwaha, and H Rahnejat

Fuzzy logic model reference adaptive control of a vehicle active suspension with non-linear dynamics
   J Y M Cheung

**Machine and Rotor Dynamics**

Tool-workpiece interaction during milling of flexible parts
   F Abrari, A D Spence, and M A Elbestawi

Chaotic and stochastic dynamics of orthogonal metal cutting
   M Wiercigroch and A H-D Cheng

A multi-body model of machine tool feed drives
   M Ebrahimi and R Whalley

Chaotic vibration of a simple model of machine tool-cutting process system
   M Wiercigroch

Vibration analysis of a longitudinally coupled flexible shaft-multiple disk system by using substructure synthesis with assumed-modes method
   H S Jia, H Lee, S B Chun, and C W Lee

High frequency rolling mills chatter – mathematical identification and simulation
   A N Marjuta and P V Krot
