|--|-----------|
| <b>Used Symbols and Definitions</b>  | <b>13</b> |
| <b>1 Introduction</b>  | <b>15</b> |
| 1.1 Correlated many-particle systems. Many-body effects . . . . .                  | 16        |
| 1.2 Equilibrium properties of correlated systems . . . . .                         | 18        |
| 1.3 Ultrafast nonequilibrium phenomena . . . . .                                   | 20        |
| 1.3.1 Electromagnetic field-matter interaction . . . . .                           | 21        |
| 1.3.2 Overview of relaxation processes . . . . .                                   | 24        |
| 1.3.3 Theoretical concepts. Outline of this book . . . . .                         | 26        |
| <b>2 The Method of Reduced Density Operators</b>                                   | <b>31</b> |
| 2.1 Density operator. Von Neumann equation . . . . .                               | 31        |
| 2.2 BBGKY-hierarchy . . . . .  | 34        |
| 2.2.1 Reduced density operators. Equations of motion . . . . .                     | 34        |
| 2.2.2 Conservation of density and total energy . . . . .                           | 37        |
| 2.3 Basic representations of the hierarchy . . . . .                               | 42        |
| 2.3.1 Coordinate representation . . . . .  | 42        |
| 2.3.2 Wigner representation . . . . .  | 44        |
| 2.3.3 Spatially homogeneous systems. Momentum<br>representation . . . . .          | 47        |
| 2.4 Multi-component and multi-band systems . . . . .                               | 51        |
| 2.4.1 Bloch representation of the hierarchy . . . . .                              | 54        |
| 2.4.2 Remarks on general properties of the BBGKY-hierarchy                         | 57        |
| 2.5 Correlations in many-particle systems . . . . .                                | 58        |
| 2.5.1 BBGKY-hierarchy for correlation operators . . . . .                          | 58        |
| 2.5.2 Energy conservation condition in terms of<br>correlation operators . . . . . | 60        |
| 2.6 Decoupling of the BBGKY-hierarchy . . . . .                                    | 62        |
| 2.6.1 Correlation effects . . . . .  | 65        |
| 2.6.2 *Selfenergy effects . . . . .  | 68        |

|          |   |            |
|----------|---|------------|
| 2.7      | Relation to equilibrium correlation functions . . . . .                                   | 71         |
| <b>3</b> | <b>*Correlations due to the Spin Statistics</b>   | <b>73</b>  |
| 3.1      | (Anti-)Symmetrization of the density operators . . . . .                                  | 74         |
| 3.2      | Exchange and phase space filling effects . . . . .  | 76         |
| 3.3      | (Anti-)Symmetrization of the first and<br>second hierarchy equations . . . . .            | 79         |
| 3.4      | (Anti-)Symmetrization of the third hierarchy equation . . . . .                           | 80         |
| 3.4.1    | (Anti-)Symmetrization of the selfenergy terms . . . . .                                   | 81         |
| 3.4.2    | Energy conservation with spin statistics . . . . .  | 82         |
| <b>4</b> | <b>Mean-Field Approximation. Quantum Vlasov Equation. Col-<br/>lective Effects</b>        | <b>85</b>  |
| 4.1      | Linearization of the quantum Vlasov<br>equation. Dielectric function . . . . .            | 87         |
| 4.2      | Collective plasma excitations (plasmons) . . . . .  | 93         |
| 4.3      | Plasma instabilities . . . . .  | 98         |
| 4.4      | Examples: Plasmons in quantum systems . . . . .   | 101        |
| 4.4.1    | One-dimensional quantum plasmas . . . . .   | 102        |
| 4.4.2    | Plasmons in 2D and 3D quantum systems . . . . .   | 109        |
| 4.5      | *Quasilinear theory for classical and quantum systems . . . . .                           | 112        |
| 4.6      | Numerical solutions of the nonlinear<br>quantum Vlasov equation . . . . .                 | 115        |
| 4.7      | *Kinetic equations for carrier-plasmon interaction . . . . .                              | 117        |
| <b>5</b> | <b>Correlations and their Dynamics</b>  | <b>121</b> |
| 5.1      | Hierarchy of relaxation processes. Time scale separation . . . . .                        | 122        |
| 5.2      | Correlation buildup. Correlation time approximation . . . . .                             | 125        |
| <b>6</b> | <b>Correlation Dynamics and Non-Markovian Effects</b>                                     | <b>127</b> |
| 6.1      | Solution for $g_{12}$ in second Born approximation . . . . .                              | 128        |
| 6.2      | Non-Markovian quantum Landau equation . . . . .   | 130        |
| <b>7</b> | <b>Non-Markovian Kinetic Equations with Selfenergy. General-<br/>ized Landau Equation</b> | <b>133</b> |
| 7.1      | *Selfenergy in density operator approach . . . . .  | 133        |
| 7.2      | Renormalized binary correlation operator . . . . .  | 138        |
| 7.3      | Non-Markovian quantum Landau equation with selfenergy . . . . .                           | 140        |
| 7.3.1    | Properties of the Landau equation. Memory effects . . . . .                               | 141        |
| 7.3.2    | Dynamics of physical observables.<br>Energy conservation . . . . .                        | 146        |

|           |   |            |
|-----------|---|------------|
| 7.3.3     | Markov limit and corrections. Retardation expansion . . .   | 150        |
| 7.3.4     | Equilibrium correlations . . . . .  | 156        |
| 7.3.5     | *Approximations for the selfenergy . . . . .  | 157        |
| 7.4       | *Discussion of the selfenergy concept.<br>Relation to Green's functions results . . . . .                     | 160        |
| <b>8</b>  | <b>Strong Coupling Effects. Ladder (T-Matrix) Approximation</b>   | <b>165</b> |
| 8.1       | Generalized binary collision approximation . . . . .  | 166        |
| 8.2       | *Selfenergy in ladder (T-matrix) approximation . . . . .  | 167        |
| 8.3       | Correlation operator in binary collision approximation . . . . .  | 169        |
| 8.3.1     | Propagators and scattering quantities . . . . .   | 169        |
| 8.3.2     | *Gradient expansion of $g_{12}$ and physical observables . . .  | 177        |
| 8.3.3     | *Recovery of the Lipavský ansatz . . . . .  | 181        |
| 8.4       | Collision integral with memory effects . . . . .  | 181        |
| 8.5       | Kinetic equation in first order gradient expansion . . . . .  | 185        |
| 8.6       | Numerical results and discussion . . . . .  | 190        |
| <b>9</b>  | <b>*Random Phase Approximation</b>  | <b>193</b> |
| 9.1       | Generalized polarization approximation. Selfenergy . . . . .  | 193        |
| 9.2       | Dynamical screening in nonequilibrium . . . . .   | 198        |
| 9.3       | Non-Markovian Balescu-Lenard equation . . . . .   | 203        |
| 9.3.1     | Properties of the non-Markovian Balescu-Lenard equation. Markov limit. . . . .                                | 205        |
| 9.3.2     | Correlation energy in RPA . . . . .   | 209        |
| 9.3.3     | Short-time behavior. Screening buildup . . . . .  | 210        |
| <b>10</b> | <b>*Dynamically Screened Ladder Approximation</b>   | <b>213</b> |
| 10.1      | Generalized screened ladder approximation. Selfenergy . . . . .   | 214        |
| 10.2      | Gould-DeWitt approximation . . . . .  | 217        |
| <b>11</b> | <b>Charged Many-Particle Systems in Electromagnetic Fields.</b>   |            |
|           | <b>Generalized Bloch Equations</b>  | <b>219</b> |
| 11.1      | Field-matter interaction . . . . .  | 220        |
| 11.2      | Field effects on the distribution and the propagators . . . . .   | 224        |
| 11.3      | Interaction of optical fields with multiband systems . . . . .  | 233        |
| 11.4      | Bloch representation of the first hierarchy equation . . . . .  | 236        |
| 11.5      | *Bloch representation of the solution $g_{12}(t)$ . . . . .   | 244        |
| 11.6      | *Correlation operator, non-Markovian collision integral and self-energy in an electromagnetic field . . . . . | 250        |
| 11.7      | *Non-Markovian Bloch equations beyond the static Born approximation . . . . .                                 | 253        |

|  |            |
|--|------------|
| <b>12 *Green's Functions Approach to Field-Matter Dynamics</b>   | <b>257</b> |
| 12.1 Basic concepts of relativistic quantum electrodynamics . . . . .                                  | 258        |
| 12.2 Relativistic Kadanoff-Baym equations<br>for particles and photons . . . . .                       | 267        |
| 12.3 Nonrelativistic Kadanoff-Baym equations . . . . .   | 274        |
| 12.4 Particle Kadanoff-Baym equations. Properties and approxima-<br>tions. Numerical results . . . . . | 280        |
| 12.5 Interband Kadanoff-Baym equations. Numerical results . . . . .                                    | 287        |
| 12.6 Kinetic equations for one-time functions.<br>Comparison to the density operators . . . . .        | 293        |
| 12.7 Outlook. Advanced calculations . . . . .  | 298        |
| <b>13 Quantum Kinetics vs. Molecular Dynamics</b>  | <b>301</b> |
| 13.1 Classical Molecular Dynamics . . . . .  | 301        |
| 13.2 *Quantum Molecular Dynamics . . . . .   | 304        |
| 13.3 Comparison of the concepts of Molecular Dynamics and Quan-<br>tum Kinetic Theory . . . . .        | 309        |
| 13.4 Numerical comparisons of Molecular<br>Dynamics and Quantum Kinetics . . . . .                     | 312        |
| 13.5 Discussion and outlook . . . . .  | 315        |
| <b>14 Conclusion</b>   | <b>317</b> |
| <b>Appendices</b>  |            |
