

Berichte aus der Verfahrenstechnik

Johann-Christian Töbermann

**Flowsheet Simulation of Solids Processing -
The Development of a Simulation System
and its Application to Soil Washing**

Shaker Verlag
Aachen 1999

Table of Contents

Nomenclature.....	III
Symbols	III
Abbreviations.....	VI
1 Introduction	1
2 State of the Art.....	5
2.1 Process Simulation Systems and Solids Processing	5
2.2 Solid/Solid-Separation Processes	8
2.2.1 Settling Velocities	10
2.2.1.1 Terminal Settling Velocity.....	10
2.2.1.2 Hindered Settling Velocity.....	13
2.2.2 Hydrocyclones	15
2.2.2.1 The Empirical Model by Plitt.....	17
2.2.2.2 The Empirical Model by Asomah and Napier-Munn	19
2.2.2.3 The Turbulent Diffusion Model by Schubert and Neeße.....	20
2.2.2.4 The Zone Model by Braun and Bohnet.....	21
2.3 Soil Washing.....	26
2.4 Wet liberation	28
2.5 Object-Oriented Software-Design	30
3 Development of <i>SolidSim</i> – A Simulation System for Solids Processes.....	33
3.1 Process Stream Information Structure	33
3.1.1 Requirements and Objectives	33
3.1.2 Implementation	36
3.2 Model Library and Models for Selected Solids Processes	40
3.2.1 General Design Considerations.....	40
3.2.2 General Solid/Solid-Separation	44
3.2.3 Hydrocyclones	51
3.2.3.1 Modification of the Braun and Bohnet Model.....	51
3.2.3.2 Evaluation of Separation Efficiency Curve Predictions.....	53

3.2.3.3	Evaluation of Volume Split Predictions.....	61
3.2.3.4	Implementation	62
3.2.4	Wet Liberation	64
3.3	Layout of the Simulator	66
4	Application of <i>SolidSim</i> to Soil Washing Processes	69
4.1	Pilot-Scale Soil Washing: Experimental and Simulation Results	71
4.2	Pilot-Scale Soil Washing: Further Process Studies	77
4.3	Industrial-Scale Soil Washing I: Estimation of Plant Performance	80
4.4	Industrial-Scale Soil Washing II: A Comprehensive Example	84
5	Summary and Conclusions	89
	Appendix.....	91
	Appendix A: Aspen Plus Solids and Mass Balancing	91
	Appendix B: Comments on the Presented Form of the Model by Plitt.....	93
	Appendix C: Interfaces of Major Classes.....	95
	Appendix D: Simulation Code Details	108
	D1: Pilot-Scale Soil Washing: "Standard" Simulation (cf. 4.1)	108
	D2: Pilot-Scale Soil Washing: Optimization of Cyclone Diameters (cf. 4.2, Part 1)	111
	D3: Pilot-Scale Soil Washing: Recycling of Hydrocyclone Overflows (cf. 4.2, Part 2) ..	112
	D4: Industrial-Scale Soil Washing I: Estimation of Plant Parameters (cf. 4.3)	113
	D5: Industrial-Scale Soil Washing II: A Comprehensive Example (cf. 4.4)	114
	References.....	117
