Wehrspohn, Ralf B.

Ordered porous nanostructures and applications / Ed. by Ralf B. Wehrspohn.

p. cm.—(Nanostructure science and technology)

Includes bibliographical references and index.

ISBN 0-387-23541-8

1. Nanotechnology. 2. Nanostructures. I. Title. II. Series.

T174.7.W44 2005

620'.5—dc22

## I. MATERIALS AND PREPARATIONS

<b>CHAPTER 1. Electrochemical Pore Array Fabrication on n-Type Silicon Electrodes</b> .....	<b>3</b>
<i>V. Lehmann</i>	
1.1 Why the first artificial pore arrays were realized in n-type silicon electrodes .....	3
1.2 The physics of pore initiation on silicon electrodes in HF .....	4
1.3 The photolithographic pre-structuring process and the anodization set-up .....	8
1.4 Limiting factors and design rules for macropore arrays on n-type silicon electrodes .....	9
<b>CHAPTER 2. Macropores in p-Type Silicon</b> .....	<b>15</b>
<i>J.-N. Chazalviel and F. Ozanam</i>	
2.1 Introduction .....	15
2.2 Phenomenology .....	16
2.3 Theory .....	22
2.4 Discussion .....	28
2.5 Ordered macropore arrays .....	32
2.6 Conclusion .....	33
<b>CHAPTER 3. Highly Ordered Nanohole Arrays in Anodic Porous Alumina</b> .....	<b>37</b>
<i>Hideki Masuda</i>	
3.1 Introduction .....	37
3.2 Naturally occurring long-range ordering of the hole configuration of anodic alumina .....	38
3.3 Two-step anodization for ordered arrays with straight holes in naturally ordering processes .....	40
3.4 Ideally ordered hole array using pretexturing of aluminum .....	41
3.5 Self-repair of the hole configuration in anodic porous alumina .....	45

3.6	Modification of the shape of hole opening in the anodic porous alumina .....	46
3.7	Nanofabrication based on highly ordered anodic alumina .....	48
3.8	Conclusion .....	53
<b>CHAPTER 4. The Way to Uniformity in Porous III–V Compounds Via Self-Organization and Lithography Patterning .....</b>		<b>57</b>
<i>S. Langa, J. Carstensen, M. Christophersen, H. Föll and I.M. Tiginyanu</i>		
4.1	Introduction .....	57
4.2	Aspects of Chemistry and Electrochemistry of Semiconductors .....	60
4.3	Pore morphologies observed in III–V compounds .....	65
4.4	Self-organized processes during pore formation in III–V compounds .....	73
4.5	Possible applications of III–V porous structures .....	80
4.6	Conclusion .....	84
<b>CHAPTER 5. Microporous Honeycomb-Structured Polymer Films .....</b>		<b>89</b>
<i>L.V. Govor</i>		
5.1	Introduction .....	89
5.2	Experimental formation of polymer honeycomb structures .....	90
5.3	Self-assembled networks of polymers .....	92
5.4	Model for the formation of the honeycomb structures in polymer films .....	95
5.5	Application of polymer networks .....	103
5.6	Conclusion .....	105
<b>CHAPTER 6. From Nanosize Silica Spheres to Three-Dimensional Colloidal Crystals .....</b>		<b>109</b>
<i>Siegmond Greulich-Weber and Heinrich Marsmann</i>		
6.1	Introduction .....	109
6.2	Synthesis of colloidal silica nanospheres .....	110
6.3	Growth of colloidal crystals .....	119
6.4	Three-dimensional periodic nanoporous materials .....	128
6.5	Applications .....	130
6.6	Concluding remarks .....	132
<b>II. APPLICATIONS</b>		
<b>CHAPTER 7. Macroporous Silicon Photonic Crystals .....</b>		<b>145</b>
<i>Ralf B. Wehrspohn, Joerg Schilling</i>		
7.1	Introduction .....	145
7.2	2D photonic crystals on the basis of macroporous silicon .....	146
7.3	Defects in 2D macroporous silicon photonic crystals .....	152

7.4	2D photonic crystals in the NIR .....	156
7.5	Tunability of Photonic band gaps .....	158
7.6	3D photonic crystals on the basis of macroporous silicon .....	159
7.7	Summary .....	161
<b>CHAPTER 8. High-Density Nickel Nanowire Arrays .....</b>		<b>165</b>
<i>Kornelius Nielsch, Riccardo Hertel and Ralf B. Wehrspohn</i>		
8.1	Introduction .....	165
8.2	Experimental details .....	166
8.3	Magnetic properties of nickel nanowire arrays .....	169
8.4	Nickel nanowire arrays with 2D single crystalline arrangement .....	173
8.5	Micromagnetic modelling .....	175
8.6	Conclusion .....	183
<b>CHAPTER 9. Porous Silicon for Micromachining .....</b>		<b>185</b>
<i>P.J. French and H. Ohji</i>		
9.1	Introduction .....	185
9.2	Basic process .....	186
9.3	Applications .....	197
9.4	Conclusions .....	203
<b><i>Index</i> .....</b>		<b>205</b>
