List of Figures ........................ xi
List of Tables ........................ xiii
Foreword by Peter Cochrane .......... xv

## Section 1  Introduction .............. 1

1 The Identity Vision .................. 3
   
   *David G.W. Birch*
   
   - Identity Management Components .. 3
   - Exploiting Technology ............. 4
   - Building Business Models .......... 6
   - The Evolution of Digital Identity .. 8

## Section 2  Identity Technologies ... 10

2 Smart Cards, Smart Identities ...... 11
   
   *Andrew Henderson*
   
   - The Implications of Mass Smart Card Use 11
   - Stable Technology .................. 12
   - Business Implications .............. 14
   - Health Cards ....................... 15
   - Social Implications ................ 16
   - Proven Technology ................. 19

   **Case Study: Estonian Electronic Identity Cards** 20

   *Taarvi Martens*

3 A Roadmap for Biometrics .......... 23
   
   *John Elliott*
   
   - Planning for Biometrics .......... 23
   - Technology Roadmapping .......... 23
   - A Real Example: Person Identification for Policing .. 26
   - Status Check ...................... 29
   - Fingerprint ....................... 31
   - Iris .............................. 32
   - Face ............................. 33
   - DNA ............................. 34
   - Conclusions ....................... 35

## CONTENTS

- Identity ... A Best-of-Network Convergence 84
- Final Thoughts 86
- **Case Study: Hong Kong's Smartics** 89
  *Raymond Wong*

### Section 3: Identity in Business and Government 93

#### 8  A Model for Digital Identity 95

*David G.W. Birch and Neil A. McEvoy*
- A Platform for Business 95
- Many to Many 99
- Shaping Infrastructure 100
- The Digital Identity Value Network 101
- Using Privacy 101
- Federal Solutions 102
- Model Solutions 103

#### 9  Large-Scale Identity Management 105

*Paul Mackinnon*
- Building Successful Implementations 105
- What Should IAM Provide? 106
- The Federated Model 106
- How Does Federation Work? 107
- What Do Customers Actually Want? 109
- IAM will Affect Everyone 110
- What Makes a Successful IAM System? 111
- Get Management Commitment 111
- Conclusion 112

#### 10  Two-Factor Authentication 113

*Richard Allen and Anthony Pickup*
- Authenticating Identity in Financial Services 113
- Something Must be Done (Really) 113
- Phish and Chips 113
- It's a Phix 118

#### 11  The Private Life of Things 121

*David G.W. Birch*
- Chips With Absolutely Everything 121
- The Identity of Stuff 122
- Protection and Provenance 124
- Adding Digital Identity 124
- Lost? What Do You Mean? 126
Authentication in Business

John Skipper

Federating Digital Identity at Population Scale
The Benefits of Federated Identity
Issues with Federated Identity
Limitations of Federated Identity
Authentication Network Models
Conventional Federated Identity Models
Integrated Identity – a New Model for Advanced Authentication
Integrated Identity – Building the Business Case
Evolving Population Scale Networks
Managing Risk Through Multiple Credentials
Understanding Your Customers
Federated Identity versus Integrated Identity
Towards Population-Scale Deployment

Identity Services Infrastructure: Trust and Privacy in Communities of the Twenty-First Century

Jon Shamah

The Role of ISI
The Evolution Toward ISI
ISI Fundamentals
Standards
Keys
Ubiquitous Networks
Privacy and Security
Products and Services
Implementing ISI
Validation in ISI
Distributed Architecture for ISI
Corestreet’s Secure Distributed Validation Design Principle
The Benefits of Secure Distributed Validation
The Corestreet Validation Infrastructure
Corestreet Implementation Benefits

Case Study: US Department of Defense

Jon Shamah

The US-VISIT Program

C. Maxine Most

Large-Scale Biometric Identity
US-VISIT Program Development and Approach
Privacy and Data Protection Implications
Europe's Progress – Societal Factors are Key 158
Practical Reality – Australia and Chile Border Control Solutions 159
The Future of US-VISIT 160

15 Building Privacy-Friendly RFID 163
   Toby Stevens
   Potential for Misuse 163
   RFID Applications 164
   The Privacy Impact of RFID 164
   Managing RFID Risk 165
   Case Study: A Sample Code of Conduct 167
   Toby Stevens

Section 4: Digital Identity in Context 173

16 The ID Problem 175
   Gareth Crossman
   Digital Identity in Context 175
   Access to Public Services 180

17 Planning ID Management in Government 183
   John Elliott
   Identity Management and Uncertainty 183
   Modern Solutions 184
   Define the Service 184
   Framework for Interoperability 186
   Preparing for the Unknown 188
   The Rapid Pace of Change 188
   Practical Example: E-Passport 189
   Technology is Not the Problem 191

18 ID and the Law 193
   Steve Philipsohn
   Identity Fraud 193
   Current Legislation 194
   Passing Off 202
   Conclusion 203

19 This is Not Your Father's ID Card 205
   David G.W. Birch, John Elliot and Neil A. McEvoy
   Using Digital Identity 205
   The UK Direction 206
   Chips not Cardboard 208
Identity
Identity in Cyberspace

20 Eavesdropping on the Future of Identity
David G.W. Birch and Aleks Krotoski
Digital Identity in an Online World
Virtual Worlds
Virtual Property
Virtual Identity
Digital Divisions

21 Cyborg Identity
Kevin Warwick
Introduction
The 1998 Implant Experiment
The 2002 Implant Experiment
Experimentation
Identity Issues
Cyborg Enhancements
Implications
Conclusions

Section 5: Where Next?

22 Digital Identity Management Implications
David G.W. Birch, John Elliot and Andrew Whitcombe
The Uneven Distribution
Timeline
Sector Analysis
Connection Technologies
Disconnection Technologies
Processing Technologies
Assessing Implications
Coming Soon
On the Horizon
Tomorrow Morning
The Key Implication is Choice
