## Part 1: Introduction

### 1 Dive Into® Web 2.0

1.1 Introduction
1.2 What Is Web 2.0?
1.3 Search
1.4 Content Networks
1.5 User-Generated Content
1.6 Blogging
1.7 Social Networking
1.8 Social Media
1.9 Tagging
1.10 Social Bookmarking
1.11 Software Development
1.12 Rich Internet Applications (RIAs)
1.13 Web Services, Mashups, Widgets and Gadgets
1.14 Location-Based Services
1.15 XML, RSS, Atom, JSON and VoIP
1.16 Web 2.0 Monetization Models
1.17 Web 2.0 Business Models
1.18 Future of the Web
1.19 Where to Go for More Web 2.0 Information
1.20 Web 2.0 Bibliography
1.21 Web 2.0 Glossary

## Part 2: The Ajax Client

### 2 Introduction to XHTML

2.1 Introduction
2.2 Editing XHTML
2.3 First XHTML Example
2.4 W3C XHTML Validation Service
2.5 Headings
14.5 Creating Special Effects with Flash
14.5.1 Importing and Manipulating Bitmaps
14.5.2 Creating an Advertisement Banner with Masking
14.5.3 Adding Online Help to Forms
14.6 Creating a Website Splash Screen
14.7 ActionScript
14.8 Web Resources

15 Adobe® Flash® CS3: Building an Interactive Game
15.1 Introduction
15.2 Object-Oriented Programming
15.3 Objects in Flash
15.4 Cannon Game: Preliminary Instructions and Notes
15.5 Adding a Start Button
15.6 Creating Moving Objects
15.7 Adding the Rotating Cannon
15.8 Adding the Cannonball
15.9 Adding Sound and Text Objects to the Movie
15.10 Adding the Time Counter
15.11 Detecting a Miss
15.12 Adding Collision Detection
15.13 Finishing the Game
15.14 ActionScript 3.0 Elements Introduced in This Chapter

16 Adobe® Flex™ 2 and Rich Internet Applications
16.1 Introduction
16.2 Flex Platform Overview
16.3 Creating a Simple User Interface
16.4 Accessing XML Data from Your Application
16.5 Interacting with Server-Side Applications
16.6 Customizing Your User Interface
16.7 Creating Charts and Graphs
16.8 Connection Independent RIAs on the Desktop: Adobe Integrated Runtime (AIR)
16.9 Flex 3 Beta
16.10 Web Resources

Part 4: Rich Internet Application Server Technologies

17 Web Servers (IIS and Apache)
17.1 Introduction
22.2.1 Servlets 800
22.2.2 JavaServer Pages 801
22.2.3 JavaServer Faces 802
22.2.4 Web Technologies in Netbeans 802
22.3 Creating and Running a Simple Application in Netbeans 803
22.3.1 Examining a JSP File 804
22.3.2 Examining a Page Bean File 806
22.3.3 Event-Processing Life Cycle 810
22.3.4 Relationship Between the JSP and Page Bean Files 811
22.3.5 Examining the XHTML Generated by a Java Web Application 811
22.3.6 Building a Web Application in Netbeans 813
22.4 JSF Components 820
22.4.1 Text and Graphics Components 820
22.4.2 Validation Using Validator Components and Custom Validators 825
22.5 Session Tracking 833
22.5.1 Cookies 834
22.5.2 Session Tracking with the SessionBean Object 846
22.6 Web Resources 856

23 Ajax-Enabled JavaServer™ Faces Web Applications 858

23.1 Introduction 859
23.2 Accessing Databases in Web Applications 860
23.2.1 Building a Web Application That Displays Data from a Database 860
23.2.2 Modifying the Page Bean File for the AddressBook Application 869
23.3 Ajax-Enabled JSF Components 872
23.4 AutoComplete Text Field and Virtual Forms 873
23.4.1 Configuring Virtual Forms 874
23.4.2 JSP File with Virtual Forms and an AutoComplete Text Field 875
23.4.3 Providing Suggestions for an AutoComplete Text Field 879
23.5 Google Maps Map Viewer Component 881
23.5.1 Obtaining a Google Maps API Key 882
23.5.2 Adding a Map Viewer Component to a Page 882
23.5.3 JSP File with a Map Viewer Component 883
23.5.4 Page Bean That Displays a Map in the Map Viewer Component 887
23.6 Web Resources 890

24 Web Services 891

24.1 Introduction 892
24.2 Java Web Services Basics 894
24.3 Creating, Publishing, Testing and Describing a Web Service 894
24.3.1 Creating a Web Application Project and Adding a Web Service Class in Netbeans 895
24.3.2 Defining the HugeInteger Web Service in Netbeans 895
24.3.3 Publishing the HugeInteger Web Service from Netbeans 900
24.3.4 Testing the Hugelnteger Web Service with Sun Java System Application Server’s Tester Web page 900
24.3.5 Describing a Web Service with the Web Service Description Language (WSDL) 904
24.4 Consuming a Web Service 905
24.4.1 Creating a Client in Netbeans to Consume the Hugelnteger Web Service 905
24.4.2 Consuming the Hugelnteger Web Service 908
24.5 SOAP 914
24.6 Session Tracking in Web Services 915
24.6.1 Creating a Blackjack Web Service 916
24.6.2 Consuming the Blackjack Web Service 920
24.7 Consuming a Database-Driven Web Service from a Web Application 931
24.7.1 Configuring Java DB in Netbeans and Creating the Reservation Database 931
24.7.2 Creating a Web Application to Interact with the Reservation Web Service 934
24.8 Passing an Object of a User-Defined Type to a Web Service 939
24.9 REST-Based Web Services in ASP.NET 949
24.9.1 REST-Based Web Service Functionality 950
24.9.2 Creating an ASP.NET REST-Based Web Service 954
24.9.3 Adding Data Components to a Web Service 957
24.10 Web Resources 960
