Distributions and Operators

 Springer

Contents

Preface v

Part I Distributions and derivatives

1 Motivation and overview 3

 1.1 Introduction 3

 1.2 On the definition of distributions 6

2 Function spaces and approximation 9

 2.1 The space of test functions 9

 2.2 Some other function spaces 16

 2.3 Approximation theorems 17

 2.4 Partitions of unity 23

 Exercises for Chapter 2 24

3 Distributions. Examples and rules of calculus 27

 3.1 Distributions 27

 3.2 Rules of calculus for distributions 31

 3.3 Distributions with compact support 36

 3.4 Convolutions and coordinate changes 40

 3.5 The calculation rules and the weak* topology on \mathcal{D}' 46

 Exercises for Chapter 3 50

Part II Extensions and applications

4 Realizations and Sobolev spaces 57

 4.1 Realizations of differential operators 57

 4.2 Sobolev spaces 61

 4.3 The one-dimensional case 68

 4.4 Boundary value problems in higher dimensions 77

 Exercises for Chapter 4 86

5	Fourier transformation of distributions	95
5.1	Rapidly decreasing functions	95
5.2	Temperate distributions	103
5.3	The Fourier transform on \mathcal{S}'	105
5.4	Homogeneity	110
5.5	Application to the Laplace operator	114
5.6	Distributions associated with nonintegrable functions	116
	Exercises for Chapter 5	120
6	Applications to differential operators. The Sobolev theorem	123
6.1	Differential and pseudodifferential operators on \mathbb{R}^n	123
6.2	Sobolev spaces of arbitrary real order. The Sobolev theorem .	127
6.3	Dualities between Sobolev spaces. The Structure theorem ...	132
6.4	Regularity theory for elliptic differential equations	138
	Exercises for Chapter 6	144
	Miscellaneous exercises (exam problems)	147

Part III Pseudodifferential operators

7	Pseudodifferential operators on open sets	163
7.1	Symbols and operators, mapping properties	163
7.2	Negligible operators	172
7.3	Composition rules	178
7.4	Elliptic pseudodifferential operators	183
7.5	Strongly elliptic operators, the Gårding inequality	189
	Exercises for Chapter 7	193
8	Pseudodifferential operators on manifolds, index of elliptic operators	195
8.1	Coordinate changes	195
8.2	Operators on manifolds	197
8.3	Fredholm theory, the index	208
	Exercises for Chapter 8	215

Part IV Boundary value problems

9	Boundary value problems in a constant-coefficient case ...	219
9.1	Boundary maps for the half-space	219
9.2	The Dirichlet problem for $I - \Delta$ on the half-space	228
9.3	The Neumann problem for $I - \Delta$ on the half-space	234
9.4	Other realizations of $I - \Delta$	236
9.5	Variable-coefficient cases, higher orders, systems	246
	Exercises for Chapter 9	248

10 Pseudodifferential boundary operators	251
10.1 The real formulation	251
10.2 Fourier transform and Laguerre expansion of \mathcal{S}_+	266
10.3 The complex formulation	275
10.4 Composition rules	281
10.5 Continuity	289
10.6 Elliptic ψ dbo's	296
Exercises for Chapter 10	300
11 Pseudodifferential methods for boundary value problems .	305
11.1 The Calderón projector	305
11.2 Application to boundary value problems	317
11.3 The solution operator for the Dirichlet problem	320
Exercises for Chapter 11	326
Part V Topics on Hilbert space operators	
12 Unbounded linear operators	337
12.1 Unbounded operators in Banach spaces	337
12.2 Unbounded operators in Hilbert spaces	340
12.3 Symmetric, selfadjoint and semibounded operators	343
12.4 Operators associated with sesquilinear forms	350
12.5 The Friedrichs extension	359
12.6 More on variational operators	361
Exercises for Chapter 12	364
13 Families of extensions	373
13.1 A universal parametrization of extensions	373
13.2 The symmetric case	383
13.3 Consequences for resolvents	393
13.4 Boundary triplets and M -functions	397
Exercises for Chapter 13	402
14 Semigroups of operators	405
14.1 Evolution equations	405
14.2 Contraction semigroups in Banach spaces	409
14.3 Contraction semigroups in Hilbert spaces	416
14.4 Applications	419
Exercises for Chapter 14	421
A Some notation and prerequisites	423
Exercises for Appendix A	429

B	Topological vector spaces	431
B.1	Fréchet spaces	431
B.2	Inductive limits of Fréchet spaces	441
	Exercises for Appendix B	443
C	Function spaces on sets with smooth boundary	447
	Exercises for Appendix C	450
	Bibliography	451
	Index	457
