CONTENTS

- Preface / ix
Acknowledgments / xiii
Authors / xv
- 1 • BASICS / 01**
- 1.1 Introduction / 1
 - 1.2 Life on Earth / 1
 - 1.3 Perspectives / 2
 - 1.4 Frameworks / 2
 - 1.4.1 Organization and Structure / 2
 - 1.4.2 Emergent Properties / 3
 - 1.5 Meta-Issues / 3
 - 1.6 Additional Considerations / 4
 - 1.6.1 More about the Fossil Record / 4
 - 1.6.2 Scaling for Size / 4
 - 1.6.3 Statistics / 5
 - 1.6.4 Multivariate Processes / 5
 - 1.6.5 Physical Chemistry and Thermodynamics / 5
 - 1.7 Frontiers / 6
 - References / 6
- 2 • ANIMAL BIODIVERSITY: ORIGINS AND EVOLUTION / 09**
- 2.1 Introduction / 9
 - 2.2 Understanding Animal Biodiversity / 10
 - 2.2.1 Classification, Taxonomy, and Systematics / 10
 - 2.2.2 Databases / 11
 - 2.2.3 Cladistics / 12
 - 2.2.4 The Tree of Life / 14
 - 2.3 Where Animals Live and Have Lived / 15
 - 2.3.1 Ecological Niches / 15
 - 2.3.2 Habitats, Environments, and Ecosystems / 18
 - 2.4 The Record of Animal Evolution / 19
 - 2.4.1 The Geological Timescale / 19
 - 2.4.2 Plate Tectonics and Biogeography / 19
 - 2.4.3 Paleontology, Ichnology, and Taphonomy / 21
 - 2.4.4 Major Features of the Record / 22
 - 2.5 Organic Evolution / 22
 - 2.5.1 Evolution Defined / 23
 - 2.5.2 Evolutionary Process / 23
 - 2.5.3 Speciation / 24
 - 2.5.4 Phylogeny / 24
 - 2.5.5 Adaptation / 25
 - References / 25
- 3 • SWIMMING / 29**
- 3.1 Introduction / 29
 - 3.1.1 Evolutionary Origins of Swimming / 29

4.3.2	Specific Lift-Generating Mechanisms / 105	4.5.2	Flight with Skin Flaps: Bats / 125
4.3.2.1	Lift: The Wagner Effect / 105	4.5.3	Flight with Skin Flaps: Pterosaurs / 127
4.3.2.2	Lift: Total Flow Pattern / 106	4.5.4	Winged Insects / 128
4.3.2.3	Leading Edge Vortex Lift / 106	4.6	The Metabolic Cost of Flight / 132
4.3.2.4	Wing-Wake Interaction / 107	4.6.1	Insects / 133
4.3.2.5	Clap, Fling, Peel, and Reverse Peel Mechanisms / 108	4.6.2	Birds / 134
4.3.2.6	The Kramer Effect / 109	4.6.3	Bats / 134
4.3.2.7	Added-Mass Inertia / 111	4.6.4	Comparing Flight Costs / 136
4.4	Biodiversity of Flight / 111	4.7	Evolution of Powered Animal Flight / 138
4.4.1	Passive Displacement by the Wind / 112	4.7.1	Evolution by Natural Selection / 138
4.4.2	Parachuting, Gliding, Tumbling, Rotation, and Gyration of Plant Seeds / 112	4.7.2	The Obscure Distant Past of Early Insects in Flight / 139
4.4.3	Animal Flight Diversity: Gliding / 113	4.7.3	The Origins of Flight on Leather Wings / 140
4.4.4	Animal Flight Diversity: Powered Flight / 114	4.7.4	The Beginning of Bird Flight / 140
4.4.4.1	Insects / 114	4.7.4.1	Archaeopteryx lithographica / 140
4.4.4.2	Vertebrates / 115	4.7.4.2	Conflicting Views and the Archaeopteryx Case / 143
4.5	Functional Morphology of Flying Animals / 116	4.7.4.3	Archaeopteryx Ecology / 143
4.5.1	Birds: Quadrupeds with Feathered Front Legs / 116	4.7.5	Radiation of Ancient Mesozoic and Modern Paleocene Birds / 145
4.5.1.1	Feathers / 117		References / 145
4.5.1.2	Internal Anatomy / 118	5 • TERRESTRIAL LOCOMOTION / 151	
4.5.1.3	Wings / 119	5.1	Introduction / 151
4.5.1.4	Wing Actions / 120	5.1.1	Invasions of the Land / 151
4.5.1.5	Tail / 121	5.1.2	The Phylogeny of Invasions / 151
4.5.1.6	Other Flight-Related Parts of the Body / 122	5.1.3	Environmental Factors and Timing / 152
4.5.1.7	Adaptations to Extreme Flight Conditions / 122	5.1.4	Anatomy, Functional Morphology, Biomechanics, and Physiology / 152
		5.1.5	Solutions for Terrestrial Locomotion / 153
		5.1.5.1	Locomotion without Limbs / 153

	5.1.5.2	Legged Locomotion / 155		5.5.5	The Elegance of Using Collisions to Examine Gaits / 201
	5.1.6	Basics of Locomotion on Level Ground / 156		5.6	Stability of Locomotion / 204
5.2		Principles of Legged Locomotion / 157		5.6.1	Static Stability / 205
	5.2.1	The Spring-Mass Model for Walking and Running / 158		5.6.2	Dynamic Postural Stability / 207
	5.2.2	Hopping on the Spot / 159		5.6.3	Attractive Systems: Self-Stability / 211
	5.2.3	Running and Running- Like Gaits: Two- Dimensional Model / 162		5.6.4	Stability of Insect Locomotion / 214
	5.2.4	Walking: The Influence of Double Support / 166		5.6.5	Muscle-Skeletal Stability / 215
	5.2.5	Stiff-Legged Walking / 168		5.6.6	Basins of Attraction / 221
	5.2.6	Dealing with a Heavy Trunk / 170	5.7		Jumping: Muscles and Catapults / 223
	5.2.7	Trunk as Beam Bending the Spine / 172		5.7.1	Acceleration and Take-Off Velocity / 223
5.3		Swing Legs: Pendulums and Passive Walkers / 173		5.7.2	Catapults: Delivering Energy Fast / 224
	5.3.1	Walking: The Swinging Pendulum as a Pacemaker / 173		5.7.3	Matching and Amplifying Muscle Tendon Properties / 225
	5.3.2	The Advent of Passive Walkers: Combining Dynamics of Stance and Swing / 176		5.7.4	Optimizing Complex Muscle-Skeletal Systems / 227
	5.3.3	The Swing Leg during Running: Approximations and Vectorized Formulation / 178		5.7.5	The Role of Biarticular Muscles (A Tribute to van Ingen Schenau) / 231
5.4		Segmented Legs during Stance / 181		5.7.6	The Proximo-Distal Sequence: A Note / 232
	5.4.1	The Economy of Segmentation / 181		5.7.7	Jumping Far: Redirecting Energy / 232
	5.4.2	Leg Axis and Line of Action / 185		5.7.8	Distal Masses and Wobbling Masses / 236
	5.4.3	Orientation of the Leg: Backward and Forward / 187		5.7.9	Segmental Oscillations: A Spider's Jump / 238
	5.4.4	Flipping Geometries / 188		5.7.10	Flying without Wings: Controlling Attitude without Fluid Forces / 240
5.5		Energy: Mechanics and Cost of Locomotion / 192		5.8	Relevance to Robotics / 242
	5.5.1	Cost of Locomotion and Mechanics / 192		5.8.1	Artificial Creepers / 242
	5.5.2	Internal and External Work / 194		5.8.2	Legged Vehicles / 244
	5.5.3	Muscle Work versus Energy Fluctuations / 196			Symbols / 248
	5.5.4	Muscles, Springs, and Collisions / 197			Operators / 248
					Indices, Suffixes / 249
					References / 250
					Books / 250
					Reviews / 251
					Research Papers / 251
					Index / 259
