## Contents

*Contributors* ix

1. **Automating adaptive control with item-specific learning**  1  
   Yu-Chin Chiu  
   1. Introduction 2  
   2. Importance of stimulus-control learning 3  
   3. Stimulus-control learning in conflict control 5  
   4. Stimulus-control learning in response inhibition 15  
   5. Stimulus-control learning in task switching 23  
   6. Stimulus-control learning in visual search 26  
   7. Conclusions 29  
   References 31

2. **Two-way translation: Advancing knowledge of politics and psychology via the study of bilingual voters**  39  
   Jason C. Coronel, Daniel Colón Amill, and Erin Drouin  
   1. Psychological perspectives on bilingualism and decision making 41  
   2. Novel predictions on the effect of language medium on political decision making 45  
   3. Insights gained by psychology 59  
   4. Conclusion 60  
   References 61

3. **Protracted perceptual learning of auditory pattern structure in spoken language**  67  
   Sarah C. Creel  
   1. Learning rapidly? Perceptual precocity 68  
   2. Learning slowly? Protracted perceptual learning 69  
   3. Goals of chapter 69  
   4. Evidence for early learning 71  
   5. Why the story is wrong (even though the evidence is right) 76  
   6. My own research: Perceptual immaturity persists into early childhood 77  
   7. Alternative explanations for age-related changes in performance 87  
   8. Possible approaches to studying protracted perceptual learning 90
9. Open questions 95
10. Summary and conclusions 98
Acknowledgments 98
References 98

4. Understanding social factors in alcohol reward and risk for problem drinking 107
Catharine E. Fairbairn and Brynne A. Velia
1. Social contexts, social motives, and alcohol reward 109
2. Underlying mechanisms (why?) 113
3. Individual differences (who?) 116
4. Contextual factors (where?) 119
5. Current and future directions 122
6. Summary and conclusions 124
Acknowledgments 124
References 125

5. Perceptual and mnemonic differences across cultures 131
Angela Gutchess and Robert Sekuler
1. Perceptual and mnemonic differences across cultures 132
2. Influences of culture on memory 135
3. Influences of culture on perception 146
4. Integration of the study of perception and memory across cultures 163
5. Conclusions 166
Acknowledgments 168
References 168

6. Aging, neurocognitive reserve, and the healthy brain 175
Chih-Mao Huang and Hsu-Wen Huang
1. Introduction 176
2. Cognitive and brain aging 178
3. The neurocognitive reserve hypothesis 186
4. Reserve and the healthy aging brain 198
5. Conclusion and new directions 202
Acknowledgments 203
References 203
Further reading 212
7. Aging, context processing, and comprehension

Brennan R. Payne and Jack W. Silcox

1. Introduction 216
2. Findings from behavioral psycholinguistics 217
3. Findings from cognitive audiology 229
4. Findings from cognitive electrophysiology 238
5. The way forward: Bridging gaps and integrating literatures 247
6. Conclusion 253
References 253

8. Speaking waves: Neuronal oscillations in language production

Vitória Piai and Xiaochen Zheng

1. Introduction 266
2. Motor domain 269
3. Memory domain 273
4. Language production and executive control 283
5. Beyond speaking 289
6. Concluding remarks and open questions 291
References 292

9. Memory influences visual cognition across multiple functional states of interactive cortical dynamics

Haline E. Schendan

1. Overview of MUSI account 305
2. State 1: Details and further evidence 314
3. State 2: Details and further evidence 324
4. State M: Details and further evidence 356
5. Future directions, conclusions and overall time course 361
Acknowledgments 363
References 363
Further reading 386

10. Adaptation for growth as a common goal throughout the lifespan: Why and how

Rachel Wu and Carla Strickland-Hughes

1. Introduction 388
2. Learning and cognitive growth in infancy and childhood 390
3. Cognitive growth across the lifespan 391
4. Extending CALLA to include adaptation for growth in a dynamic environment 393
5. Building on positive cognitive aging approaches 399
6. Anecdotal evidence on learning new skills in adulthood 402
7. Implications and future directions 404
8. Conclusions 406
Acknowledgments 407
References 407
Further reading 414
