

Handbook of Reward and Decision Making

Edited by

Dr. Jean-Claude Dreher and Léon Tremblay

AMSTERDAM • BOSTON • HEIDELBERG • LONDON • NEW YORK • OXFORD
PARIS • SAN DIEGO • SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO

Academic Press is an imprint of Elsevier

Contents

Preface	ix
<i>Jean-Claude Dreher</i>	
List of contributors	xiii
Part One Monkey Anatomical and Electrophysiological Studies on Reward and Decision making	1
1. Anatomy and connectivity of the reward circuit <i>Suzanne N. Haber</i>	3
2. Electrophysiological correlates of reward processing in dopamine neurons <i>Philippe N. Tobler and Shunsuke Kobayashi</i>	29
3. The ventral striatum: a heterogeneous structure involved in reward processing, motivation and decision-making <i>Léon Tremblay, Yulia Worbe and Jeffrey R. Hollerman</i>	51
4. Role of the primate lateral prefrontal cortex in integrating decision-making and motivational information <i>Masataka Watanabe</i>	79
5. From reward value to decision-making: neuronal and computational principles <i>Edmund T. Rolls</i>	97
Part Two fMRI Studies on Reward and Decision Making	135
6. Decomposing brain signals involved in value-based decision making <i>Jean-Claude Dreher</i>	137
7. Reward processing in the human brain: insights from fMRI <i>Anthony J. Porcelli and Mauricio R. Delgado</i>	165
8. Spatiotemporal characteristics of perceptual decision making in the human brain <i>Marios G. Philiastides and Hauke R. Heekeren</i>	185

9. Feedback valuation processing within the prefrontal cortex <i>Céline Amiez and Michael Petrides</i>	213
10. Computational neuroimaging: monitoring reward learning with blood flow <i>Samuel M. McClure and Kimberlee D'Ardenne</i>	229
Part Three Brain Disorders Involving Dysfunctions of Reward and Decision Making Processes	249
11. Can models of reinforcement learning help us to understand symptoms of schizophrenia? <i>G.K. Murray and P.C. Fletcher</i>	251
12. Effects of dopamine depletion on reward-seeking behavior: evidence from human and non-human primates <i>Mathias Pessiglione and Léon Tremblay</i>	271
13. A neuropsychological perspective on the role of the prefrontal cortex in reward processing and decision-making <i>Michael Hernandez, Natalie L. Denburg and Daniel Tranel</i>	291
Part Four Genetic and Hormonal Influences on the Reward System	307
14. Gonadal steroid hormones' influence on reward and decision making processes <i>Xavier Caldú and Jean-Claude Dreher</i>	309
15. Hormone effects on specific motivational states and underlying CNS arousal <i>Mihaela Stavarache, Donald Pfaff and Justine Schober</i>	335
16. The genetic basis of individual differences in reward processing and the link to addictive behavior <i>Juliana Yacubian and Christian Büchel</i>	345
17. Catechol-O-methyltransferase (COMT) genotype effects on brain activation elicited by affective stimuli and cognitive tasks <i>Andreas Heinz and Imke Puls</i>	361

Part Five Computational Models of the Reward System and Decision Making	373
18. Optimal decision-making theories <i>Rafal Bogacz</i>	375
19. The basal ganglia in reward and decision making: computational models and empirical studies <i>Bradley B. Doll and Michael J. Frank</i>	399
20. Reward-based emotions: affective evaluation of outcomes and regret learning <i>Giorgio Coricelli and Aldo Rustichini</i>	427
21. Bayesian decision making in two-alternative forced choices <i>Sophie Deneve</i>	441
22. Predicting risk in a multiple stimulus-reward environment <i>Mathieu d'Acremont, Manfred Gilli and Peter Bossaerts</i>	459
Index	475
