<b>List of Figures</b>	<b>xix</b>
<b>1 Introduction and Preview</b>	<b>1</b>
1.1 Preview of the book / 5	
<b>2 Entropy, Relative Entropy and Mutual Information</b>	<b>12</b>
2.1 Entropy / 12	
2.2 Joint entropy and conditional entropy / 15	
2.3 Relative entropy and mutual information / 18	
2.4 Relationship between entropy and mutual information / 19	
2.5 Chain rules for entropy, relative entropy and mutual information / 21	
2.6 Jensen's inequality and its consequences / 23	
2.7 The log sum inequality and its applications / 29	
2.8 Data processing inequality / 32	
2.9 The second law of thermodynamics / 33	
2.10 Sufficient statistics / 36	
2.11 Fano's inequality / 38	
Summary of Chapter 2 / 40	
Problems for Chapter 2 / 42	
Historical notes / 49	
<b>3 The Asymptotic Equipartition Property</b>	<b>50</b>
3.1 The AEP / 51	

3.2	Consequences of the AEP: data compression / 53	
3.3	High probability sets and the typical set / 55	
	Summary of Chapter 3 / 56	
	Problems for Chapter 3 / 57	
	Historical notes / 59	
<b>4</b>	<b>Entropy Rates of a Stochastic Process</b>	<b>60</b>
4.1	Markov chains / 60	
4.2	Entropy rate / 63	
4.3	Example: Entropy rate of a random walk on a weighted graph / 66	
4.4	Hidden Markov models / 69	
	Summary of Chapter 4 / 71	
	Problems for Chapter 4 / 72	
	Historical notes / 77	
<b>5</b>	<b>Data Compression</b>	<b>78</b>
5.1	Examples of codes / 79	
5.2	Kraft inequality / 82	
5.3	Optimal codes / 84	
5.4	Bounds on the optimal codelength / 87	
5.5	Kraft inequality for uniquely decodable codes / 90	
5.6	Huffman codes / 92	
5.7	Some comments on Huffman codes / 94	
5.8	Optimality of Huffman codes / 97	
5.9	Shannon-Fano-Elias coding / 101	
5.10	Arithmetic coding / 104	
5.11	Competitive optimality of the Shannon code / 107	
5.12	Generation of discrete distributions from fair coins / 110	
	Summary of Chapter 5 / 117	
	Problems for Chapter 5 / 118	
	Historical notes / 124	
<b>6</b>	<b>Gambling and Data Compression</b>	<b>125</b>
6.1	The horse race / 125	
6.2	Gambling and side information / 130	
6.3	Dependent horse races and entropy rate / 131	
6.4	The entropy of English / 133	
6.5	Data compression and gambling / 136	

- 6.6 Gambling estimate of the entropy of English / 138
- Summary of Chapter 6 / 140
- Problems for Chapter 6 / 141
- Historical notes / 143

## **7 Kolmogorov Complexity** **144**

- 7.1 Models of computation / 146
- 7.2 Kolmogorov complexity: definitions and examples / 147
- 7.3 Kolmogorov complexity and entropy / 153
- 7.4 Kolmogorov complexity of integers / 155
- 7.5 Algorithmically random and incompressible sequences / 156
- 7.6 Universal probability / 160
- 7.7 The halting problem and the non-computability of Kolmogorov complexity / 162
- 7.8  $\Omega$  / 164
- 7.9 Universal gambling / 166
- 7.10 Occam's razor / 168
- 7.11 Kolmogorov complexity and universal probability / 169
- 7.12 The Kolmogorov sufficient statistic / 175
- Summary of Chapter 7 / 178
- Problems for Chapter 7 / 180
- Historical notes / 182

## **8 Channel Capacity** **183**

- 8.1 Examples of channel capacity / 184
- 8.2 Symmetric channels / 189
- 8.3 Properties of channel capacity / 190
- 8.4 Preview of the channel coding theorem / 191
- 8.5 Definitions / 192
- 8.6 Jointly typical sequences / 194
- 8.7 The channel coding theorem / 198
- 8.8 Zero-error codes / 203
- 8.9 Fano's inequality and the converse to the coding theorem / 204
- 8.10 Equality in the converse to the channel coding theorem / 207
- 8.11 Hamming codes / 209
- 8.12 Feedback capacity / 212

8.13	The joint source channel coding theorem / 215	
	Summary of Chapter 8 / 218	
	Problems for Chapter 8 / 220	
	Historical notes / 222	
<b>9</b>	<b>Differential Entropy</b>	<b>224</b>
9.1	Definitions / 224	
9.2	The AEP for continuous random variables / 225	
9.3	Relation of differential entropy to discrete entropy / 228	
9.4	Joint and conditional differential entropy / 229	
9.5	Relative entropy and mutual information / 231	
9.6	Properties of differential entropy, relative entropy and mutual information / 232	
9.7	Differential entropy bound on discrete entropy / 234	
	Summary of Chapter 9 / 236	
	Problems for Chapter 9 / 237	
	Historical notes / 238	
<b>10</b>	<b>The Gaussian Channel</b>	<b>239</b>
10.1	The Gaussian channel: definitions / 241	
10.2	Converse to the coding theorem for Gaussian channels / 245	
10.3	Band-limited channels / 247	
10.4	Parallel Gaussian channels / 250	
10.5	Channels with colored Gaussian noise / 253	
10.6	Gaussian channels with feedback / 256	
	Summary of Chapter 10 / 262	
	Problems for Chapter 10 / 263	
	Historical notes / 264	
<b>11</b>	<b>Maximum Entropy and Spectral Estimation</b>	<b>266</b>
11.1	Maximum entropy distributions / 266	
11.2	Examples / 268	
11.3	An anomalous maximum entropy problem / 270	
11.4	Spectrum estimation / 272	
11.5	Entropy rates of a Gaussian process / 273	
11.6	Burg's maximum entropy theorem / 274	
	Summary of Chapter 11 / 277	
	Problems for Chapter 11 / 277	
	Historical notes / 278	

<b>12</b>	<b>Information Theory and Statistics</b>	<b>279</b>
12.1	The method of types / 279	
12.2	The law of large numbers / 286	
12.3	Universal source coding / 288	
12.4	Large deviation theory / 291	
12.5	Examples of Sanov's theorem / 294	
12.6	The conditional limit theorem / 297	
12.7	Hypothesis testing / 304	
12.8	Stein's lemma / 309	
12.9	Chernoff bound / 312	
12.10	Lempel-Ziv coding / 319	
12.11	Fisher information and the Cramér-Rao inequality / 326	
	Summary of Chapter 12 / 331	
	Problems for Chapter 12 / 333	
	Historical notes / 335	
<b>13</b>	<b>Rate Distortion Theory</b>	<b>336</b>
13.1	Quantization / 337	
13.2	Definitions / 338	
13.3	Calculation of the rate distortion function / 342	
13.4	Converse to the rate distortion theorem / 349	
13.5	Achievability of the rate distortion function / 351	
13.6	Strongly typical sequences and rate distortion / 358	
13.7	Characterization of the rate distortion function / 362	
13.8	Computation of channel capacity and the rate distortion function / 364	
	Summary of Chapter 13 / 367	
	Problems for Chapter 13 / 368	
	Historical notes / 372	
<b>14</b>	<b>Network Information Theory</b>	<b>374</b>
14.1	Gaussian multiple user channels / 377	
14.2	Jointly typical sequences / 384	
14.3	The multiple access channel / 388	
14.4	Encoding of correlated sources / 407	
14.5	Duality between Slepian-Wolf encoding and multiple access channels / 416	
14.6	The broadcast channel / 418	
14.7	The relay channel / 428	

14.8	Source coding with side information / 432	
14.9	Rate distortion with side information / 438	
14.10	General multiterminal networks / 444	
	Summary of Chapter 14 / 450	
	Problems for Chapter 14 / 452	
	Historical notes / 457	
<b>15</b>	<b>Information Theory and the Stock Market</b>	<b>459</b>
15.1	The stock market: some definitions / 459	
15.2	Kuhn-Tucker characterization of the log-optimal portfolio / 462	
15.3	Asymptotic optimality of the log-optimal portfolio / 465	
15.4	Side information and the doubling rate / 467	
15.5	Investment in stationary markets / 469	
15.6	Competitive optimality of the log-optimal portfolio / 471	
15.7	The Shannon-McMillan-Breiman theorem / 474	
	Summary of Chapter 15 / 479	
	Problems for Chapter 15 / 480	
	Historical notes / 481	
<b>16</b>	<b>Inequalities in Information Theory</b>	<b>482</b>
16.1	Basic inequalities of information theory / 482	
16.2	Differential entropy / 485	
16.3	Bounds on entropy and relative entropy / 488	
16.4	Inequalities for types / 490	
16.5	Entropy rates of subsets / 490	
16.6	Entropy and Fisher information / 494	
16.7	The entropy power inequality and the Brunn-Minkowski inequality / 497	
16.8	Inequalities for determinants / 501	
16.9	Inequalities for ratios of determinants / 505	
	Overall Summary / 508	
	Problems for Chapter 16 / 509	
	Historical notes / 509	
	<b>Bibliography</b>	<b>510</b>
	<b>List of Symbols</b>	<b>526</b>
	<b>Index</b>	<b>529</b>
