MYOBLAST TRANSFER THERAPY

Edited by
Robert C. Griggs
University of Rochester
Rochester, New York

and
George Karpati
McGill University
Montreal, Quebec, Canada

PLENUM PRESS • NEW YORK AND LONDON
Proceedings of a Muscular Dystrophy Association International
Conference on Myoblast Transfer Therapy, held June 10-12, 1989,
in New York, New York

A Division of Plenum Publishing Corporation
233 Spring Street, New York, N.Y. 10013

CONTENTS

1 MOLECULAR BIOLOGY OF MYOGENESIS AND REGENERATION

MyoD: A Regulatory Gene of Skeletal Myogenesis............ 3
S.J. Tapscott, R.L. Davis, A.B. Lassar
and H. Weintraub

Myoblasts, Satellite Cells, and Myoblast Transfer........... 7
F.E. Stockdale, E.J. Hager, S.E. Fernyak
and J.X. DiMario

Regeneration of Skeletal Muscle Fibers after Necrosis...... 13
S. Carpenter

Detection of Truncated Dystrophin in Fetal DMD Myotubes... 17
I.B. Ginjaar, E. Bakker, J.T. den Dunnen,
A. Wessels, M.M.B. van Paassen, M.D. Kloosterman,
E.E. Zubiya-Gaarn, K.H. Fischbeck,
A.F.M. Moorman and G.-J.B. van Ommen

General Discussion........................................... 25

2 MYOBLAST/SATELLITE CELL ANTIGENICITY

Immunological Aspects of Histoincompatible Myoblast
Transfer into Non-tolerant Hosts......................... 31
G. Karpati

A Comparison of Long-term Survival of Muscle Precursor
Cell Suspensions and Minced Muscle Allografts
in the Non-tolerant Mouse.............................. 35
D.J. Watt

N-CAM is a Target Cell Surface Antigen for the
Purification of Muscle Cells for
Myoblast Transfer Therapy.............................. 41
F.S. Walsh

Immuochemical Analyses of the Myoblast Membrane
and Lineage............................................. 47
S.J. Kaufman

General Discussion........................................... 57
3 PRACTICAL ASPECTS OF MYOBLAST IMPLANTATION

The Principles and Practice of Myoblast Transfer............ 69
G. Karpati

Myoblast Transfer Improves Muscle Genetics/Structure/
Function and Normalizes the Behavior and
Life Span of Dystrophic Mice......................... 75
P.K. Law, T.G. Goodwin, H.-J. Li, G. Ajamoughli
and M. Chen

Practical Aspects of Myoblast Implantation:
Investigations on Two Inherited Myopathies
in Animals........................................... 89
J.E. Morgan

Purification and Proliferation of Human Myoblasts
Isolated with Fluorescence Activated
Cell Sorting........................................... 97
H.M. Blau, C. Webster and G.K. Pavlath

The Proliferation and Fusion of Myoblasts In Vivo........101
M.D. Grounds

The DMD Gene Promoter: A Potential Role
in Gene Therapy.......................................107
P.N. Ray, H.J. Klamut and R.G. Worton

General Discussion.....................................113

4 IN SITU FUSION: NUCLEAR DOMAINS AND
mRNA/PROTEIN MIGRATION

Fibroblasts Fuse with Myotubes Developing in Culture......131
N. Chaudhari and K.G. Beam

Phenotypic and Functional Reversion of Muscular
Dysgenesis by Heterotypic Fibroblast-Myotube
Fusion In Vitro.......................................139
L.G. Garcia, P. Dreyfus, M. Pinçon-Raymond,
A. Villageois, O. Chassande, G. Romey,
M. Lazdunski and F. Rieger

Control of Satellite Cell Proliferation....................147
R. Bischoff

Regeneration of Skeletal Muscle Induced by Satellite
Cell Grafts...........................................159
H.S. Alameddine and M. Fardeau

Localization of Muscle Gene Products in Nuclear Domains:
Does this Constitute a Problem for Myoblast
Therapy? ............................................167
H.M. Blau, G.K. Pavlath, K. Rich and S.G. Webster

Mouse Chimeras and Genetic Rescue of Mosaic Muscle.......173
A. Peterson and D. Cross

General Discussion.....................................187
5 DEVELOPMENT OF MYOGENIC CELL CULTURES

Improved Media for Rapid Clonal Growth of Normal Human Skeletal Muscle Satellite Cells.............193
R.G. Ham, J.A. St. Clair and S.D. Meyer

Retroviral Lineage Markers for Assessing Myoblast Fate In Vivo ........................................201
H.M. Blau and S.M. Hughes

Myogenic Conversion of Human Non-muscle Cells for the Diagnosis and Therapy of Neuromuscular Diseases .................................................................205
A.F. Miranda, T. Mongini, E. Bonilla, A.D. Miller and W.E. Wright

General Discussion.................................................................211

6 MONITORING CLINICAL SUCCESS: PHENOTYPIC TRANSFORMATION

Genetic and Biochemical Determinations in the Pre-transplant Workup and in the Post-transplant Assessment Period ...............................219

Use of Quantitative Myometry in the Evaluation of Myoblast Transfer Therapy..........................227
T.L. Munsat

Clinical Issues in Myoblast Transfer........................................231
M. Brooke

Quantitation of Muscle Mass and Muscle Protein Synthesis Rate: Documenting a Response to Myoblast Transfer ......................................................235
R.C. Griggs

Plausible Structural/Functional/Behavioral/Biochemical Transformations Following Myoblast Transfer Therapy .................................................................241
P.K. Law, T.G. Goodwin, H.-J. Li and M. Chen

Mdx Mouse as Therapeutic Model System: Development and Implementation of Phenotypic Monitoring .................251
M.S. Hudecki and C.M. Pollina

Golden Retriever Muscular Dystrophy: Monitoring for Success ..................................................267

Molecular Markers for Myoblast Transplantation in GRMD .........................................................273

The Role of the Xmd Dog in the Assessment of Myoblast Transfer Therapy ....................................279
B.J. Cooper
The Dilemma of Manifesting Carriers in the Context of Myoblast Transplantation ................. 285
L.M. Kunkel

Immunosuppressive Therapy in Duchenne Muscular Dystrophy: Considerations for Myoblast Transfer Studies ...... 287
J.R. Mendell

General Discussion................................................. 297

7 IMPLEMENTATION OF HUMAN TRIALS

Synopsis of Proceedings of the Workshop on the Implementation of Myoblast Transfer in Humans .... 307

Participants .......................................................... 309

Index ................................................................. 311
