CONTENTS

Tobacco Smoking and Atherosclerosis: Overview .................. 1
John N. Diana

EPIEMIOLOGIC STUDIES LINKING
SMOKING AND ATHEROSCLEROSIS

Smoking and the Pathogenesis of Atherosclerosis ................. 9
Henry G. McGill, Jr.

Smoking as a Predictor of Atherosclerosis in the
Honolulu Heart Program ........................................ 17
Dwayne Reed, Ellen Marcus, and Takuji Hayashi

Cigarette Smoking as a Risk Factor for Coronary
Artery Disease .................................................. 27
William S. Weintraub

Cigarette Smoking and Extracranial Carotid Atherosclerosis .... 39
Grethe S. Tell, George Howard, Gregory W. Evans,
Michael L. Smith, William M. McKinney, and James F. Toole

EFFECT OF CIGARETTE SMOKING
ON VASCULAR ENDOTHELIAL CELLS

Smoking, Catecholamines and their Effects on
Endothelial Cell Integrity ..................................... 51
Göran Bondjers, Göran Hansson, Gun Olsson, and
Knut Pettersson

Cigarette Smoking and Endothelial Injury:
A Review ....................................................... 61
R. Michael Pittilo

The Effects of Nicotine on Aortic Endothelial Cell Turnover
and Ultrastructure ............................................. 79
Matthew Zimmerman and John K. McGeachie

Ultrastructural Events Associated with Endothelial Cell
Changes During the Initiation and Early Progression
of Atherosclerosis ............................................ 89
Richard G. Taylor, W. Gray Jerome, and Jon C. Lewis
The Effect of Cigarette Smoke, Nicotine and Carbon Monoxide on Arterial Wall Permeability and Arterial Wall Uptake of 125I Fibrinogen .......................... 95
D.R. Allen and N.L. Browse

Some Acute Effects of Smoking on Endothelial Cells and Platelets .......................... 107
James W. Davis

EFFECT OF CIGARETTE SMOKING ON PLATELETS, VASCULAR TISSUE AND EICOSANOIDS

Platelets in the Pathogenesis of Atherosclerosis ................................................. 119
Wolfgang Siess

Smoking, Platelet Reactivity and Fibrinogen ....................................................... 129
Jack Kutti

Vascular and Platelet Eicosanoids, Smoking and Atherosclerosis ............................ 135
J.Y. Jeremy and D.P. Mikhailidis

Macrophage Influence on Smooth Muscle Phenotype in Atherogenesis .................... 147
Gordon R. Campbell and Julie H. Campbell

Cigarette Smoking and Platelet Function: Relation to Nicotine, Carbon Monoxide and Saturated Fat ................................................................. 161
Serge Renaud

Atherosclerosis Alters the Response to Activated Platelets and Leukocytes ............ 173
Donald D. Heistad, J. Antonio Lopez and Mark L. Armstrong

Platelets in Chronic Smokers Show a Hyperactive Response In Vitro to a Foreign Surface ................................................................. 181
Paul D. Stein, Jan Rival and Jeanne M. Riddle

Platelet-Vessel Wall Interactions in Individuals Who Smoke Cigarettes ................. 189
John J. Murray, Jacek Nowak, John A. Oates and Carret A. FitzGerald

Acute Platelet Activation Induced by Smoking Cigarettes: In Vivo and Ex Vivo Studies in Humans ................................................................. 199
Kai G. Schmidt, Jens W. Rasmussen, and Vagn Bonnevie-Nielsen

Alterations of Arachidonate Metabolism in Cardiovascular System by Cigarette Smoking ................................................................. 211
Hsin-Hsiung Tai, Wen-Chang Chang, Ying Liu, and Shoshi Fukuda

Effect of Nicotine and Carbon Monoxide on Prostacyclin Production by the Rabbit Heart ................................................................. 225
David James Effeney
EFFECT OF CIGARETTE SMOKING ON DIET, CHOLESTEROL/LIPOPROTEINS

Relations Between Smoking, Food Intake and Plasma Lipoproteins .......................... 237
Anders G. Olsson and Jörgen Molgaard

Lipoproteins and Diet in the Pathogenesis of Atherosclerosis .............................. 245
James W. Anderson and Tammy L. Floore

Apolipoprotein Profiles in Randomly Selected Smokers and Matched Controls ........... 259
Jörgen Molgaard and Anders G. Olsson

Normalization of High Density Lipoprotein Cholesterol Following Cessation from Cigarette Smoking .................................................. 267
Robert J. Moffatt

CIGARETTE SMOKING, HEMODYNAMICS AND HEMORHEOLOGY

Cigarette Smoking Causes Acute Changes in Arterial Wall Mechanics and the Pattern of Arterial Blood Flow in Healthy Subjects: Possible Insight into Mechanisms of Atherogenesis ................................................................. 273
Colin G. Caro

How Does the Arterial Endothelium Sense Flow? Hemodynamic Forces and Signal Transduction ................................................................. 281
Peter F. Davies and Randal O. Dull

Smoking and Blood Rheology .................................................................................. 295
Edzard Ernst and Wolfgang Koenig

CIGARETTE SMOKING AND CORONARY ARTERY ATHEROSCLEROSIS

Effects of Cigarette Smoking on Coronary Vascular Dynamics: Relationship to Coronary Atherosclerosis ......................................................... 301
Lloyd W. Klein and Annabelle S. Volgman

Cigarette Smoking and Coronary Artery Disease ..................................................... 311
Graham A. Colditz

Adrenal Release of Catecholamines in the Coronary and Myocardial Response to Nicotine ................................................................. 327
H. Fred Downey

Effects of Cigarette Smoke and Nicotine on Platelets and Experimental Coronary Artery Thrombosis ......................................................... 339
J.D. Folts, S.A. Gering, S.W. Laibly, B.G. Bertha, F.C. Bonebrake, and J. W. Keller
ATHEROSCLEROSIS AND THE CENTRAL NERVOUS SYSTEM

The Central Nervous System and Atherogenesis: Interrelationships
William H. Gutstein and Joseph M. Wu
