Contents

Foreword xiii
Preface xv
Acknowledgments xvii

Section I
Peptide/Protein Separation Methods and Analysis

1. Benefits of Automation in the Separation of Biomolecules by High Performance Capillary Electrophoresis 3
   G. McLaughlin, R. Palmieri, and K. Anderson

2. Two-Dimensional Electrophoresis of Proteins from Cultured Human Colonic Carcinoma Cells: Development of a Database of Amino Acid Sequences 21
   Larry D. Ward, Ji Hong, and Richard J. Simpson

3. Techniques for Improved Micropreparative Fraction Collection 31
   Yngve Hareland

4. Increased Sensitivity to Analyze Brain Tissue Constituents: Use of Capillary Electrophoresis Coupled to Fluorescence Microscopy 37
   Norberto A. Guzman, Maria A. Trebilcock, and Juan P. Advis

   Rick Feldhoff

6. A Non-Label Technology for Real-Time Biospecific Interaction Analysis 65
   Lars G. Fügerslam
Section II
Peptide Sequence Analysis

7. Chemistry and Sequencing of Covalently Immobilized Proteins and Peptides 75
   David W. Andrews, Mark Girardi, and Jonathan Mark

8. Real Time Monitoring of Synthetic Peptide Purifications Using Ultrafast Peptide Analysis 81
   Kerry D. Nugent, Kerry L. Spear, and Pia M. Johnson

9. Sequencing a Protein with an Irregularly Repeating DNP Pattern 95
   S. Hua, M. Vestling, C. Murphy, C. Fenselau, B. Spengler, Y. Pan, R. Wang, R. J. Cotter, J. Theibert, and J. H. Collins

10. Studies on Carboxyl Terminal Degradations 107
    David H. Hawke and Victoria L. Boyd

11. Carboxy-Terminal Sequencing: Automation and Application to the Solid-Phase 115
    Jerome M. Bailey and John E. Shively

12. Evaluation of Compact Protein Sequencer 131
    Jimmy Calaycay, Miro Rusnak, and John E. Shively

13. Amino Acid Analysis 1990: The Third Collaborative Study from the Association of Biomolecular Resource Facilities (ABRF) 139
    George E. Tarr, Raymond J. Paxton, Yu-Ching E. Pan, Lowell H. Ericsson, and John W. Crabb

14. Protein Sequencing from Polyvinylidenedifluoride Membranes: Design and Characterization of a Test Sample (ABRF-90SEQ) and Evaluation of Results 151
    K. Ümit Yüksel, Gregory A. Grant, Liane M. Mende-Mueller, Ronald L. Niece, Kenneth R. Williams, and David W. Speicher

15. Evaluation of Specific Proteases for Digestion of Membrane-Bound Proteins 163
    Wolfgang H. Fischer, Minkyu Park, Laura Lucero, and Wylie Vale
16. Study and Applications of the Effects of Detergents and Chaotropes on Enzymatic Proteolysis  
   Lise R. Riviere, Mark Fleming, Christopher Elicone, and Paul Tempst

   William H. Vensel and Donald D. Kasarda

18. Glycopeptidase F Treatment and Amino Acid Sequence Determination of Glycoproteins Immobilized on PVDF and Its Derivatives  
   Brian M. Martin and William K. Eliason

19. The Complete Primary Amino Acid Sequence of Soluble Bovine Dopamine β-Hydroxylase: Confirmation of N-Terminal, C-Terminal, and Internal Unassigned Regions of the Protein  
   James G. Robertson, Alok Kumar, Parimal Desai, and Joseph J. Villafranca

Section III
Peptide Synthesis Techniques

20. Comparison of Several Methods for Synthesis of a Difficult Test Peptide by BOC Strategy  
   Richard L. Stevens, Kirk L. Stevens, and Janis D. Young

21. Peptide Cyclization on Oxime Resin (PCOR)  
   George Ösapay, Marlène Bouvier, and John W. Taylor

22. Chemical Synthesis of Human Transforming Growth Factor-α  
   Kerry L. Spear and Mark X. Sliwkowski

23. Enhancement of Coupling Reaction in Peptide Synthesis by Microwave Irradiation  
   Kung-Tsung Wang, Shui-Tein Chen, and Shyh-Horng Chiou
Section IV
Protein Structure/Function Analysis

   T. J. Dudgeon, U. Hommel, R. M. Cooke, A. Fallon, and I. D. Campbell

25. Multiple Conformations of Staphylococcal Nuclease 263
   Roger A. Kautz and Robert O. Fox

   Stewart N. Loh, Charles W. Mc Nemar, and John L. Markley

27. Structure in a Partially Folded State of Ubiquitin as Determined by NMR 283
   D. N. Woolfson, M. M. Harding, P. A. Evans, and D. H. Williams

28. Stabilization of Barnase by an Interaction between Two Oppositely Charged Side Chains 295
   Daša Šali, Mark Bycroft, and Alan R. Fersht

29. Analysis of Disulfide Bonds within the Novel Apolipoprotein J Isolated from Human Plasma 305
   Gregory J. Kelso, Terence L. Kirley, and Judith A. K. Harmony

30. Surface Recognition Domains of Glutamine Synthetase for Adenylyltransferase 313
    Beth M. Cader, Jens Hemmingsen, and Joseph J. Villafranca

31. Structural Analysis of RNase T1 Native and Site-Directed Mutants by Capillary Electrophoresis 325
    John E. Wiktorowicz, Kenneth J. Wilson, and Bret A. Shirley

Section V
NMR/X-Ray Workshop

32. NMR/X-Ray Workshop: An Overview 337
    Juliette T. J. Lecomte
33. Molecular Replacement Structure Solution of Interleukin-8 Using the NMR Model
Eric T. Baldwin, Joel Sussman, Robert St. Charles, and Alexander Wlodawer

34. Is 2D-NOESY Back-Calculation Necessary for NMR-Based Structure Determination? A Systematic Study Involving a Retroviral-Type Zinc Finger Peptide
Paul R. Blake, Dennis R. Hare, and Michael F. Summers

35. Heteronuclear Three-Dimensional NMR: Towards the Structure Determination of Medium Sized Proteins in Solution

36. Structural Analysis of the Amino-Terminal Domain of apo-Calmodulin by 1H-Homonuclear 2D-NMR
Ross C. Hoffman and Rachel E. Klevit

37. The Three-Dimensional Solution Structure of Human Anaphylatoxin C3a
Matthew W. Kalnik, Walter J. Chazin, and Peter E. Wright

38. Three-Dimensional Solution Structure of Calbindin D₉k
Mikael Akke, Nicholas J. Skelton, Johan Kördel, and Walter J. Chazin

39. Isotopic Labeling of Specific Amino Acid Types as an Aid to NMR Spectrum Assignment of the Methionine Repressor Protein
David W. Hoffman and Leonard D. Spicer

Section VI
Mass Spectrometry Workshop

40. A Brief Overview of Mass Spectrometric Methods for the Analysis of Peptides and Proteins
Bradford W. Gibson

41. Mass Spectrometry Workshop: An Overview
John E. Shively
42. Sequencing of the Society Test Peptide IV by High Performance Tandem Mass Spectrometry 435
Katalin F. Medzihradszky, Stephen C. Hall, David A. Maltby, Wade M. Hines, and Alma L. Burlingame

43. Mass Spectrometric Methods for Protein and Peptide Sequence Analysis 441

44. Characterization of Symposium Test Peptide-4 455
Donald F. Hunt, Janice E. Alexander, Ashley L. McCormack, Paul A. Martino, Hanspeter Michel, and Jeffrey Shabanowitz

45. American Protein Society Symposium Test Peptide-4 (STP-4): Composition and Analytical Results 467
Terry D. Lee and Michael Ronk

46. Computer Aided Interpretation of Low Energy MS/MS Mass Spectra of Peptides 477
John R. Yates III, Patrick R. Griffin, Leroy E. Hood, and Joe X. Zhou

47. Electrospray Ionization Mass Spectrometry and Tandem Mass Spectrometry for the Characterization of Proteins and Proteolytic Digests 487
Charles G. Edmonds, Joseph A. Loo, Rachel R. Ogorzalek Loo, and Richard D. Smith

48. Sequence-Ordered Peptide Mapping by Time-Course Analysis of Protease Digests Using Laser Desorption Mass Spectrometry 497
Richard M. Caprioli, Brenda Whaley, Kuldip K. Mock, and John S. Cottrell

49. Monitoring Peptide Synthesis Stepwise by Mass Spectrometry 511
William T. Moore and Richard M. Caprioli

50. Mass Spectrometry Analysis for Detecting Side Products in Peptide Synthesis 529
Conway C. Chang, Primo A. Babayan, Ling Chen, and Anita L. Hong
