Preface xi

CHAPTER ONE  
Guanine Nucleotide-binding Proteins in Health and Disease: an Overview  
G. Milligan  
1 Preamble 1  
2 Characteristics of G-protein-regulated transmembrane signalling cascades 2  
3 The structure of G-proteins 4  
4 Genetic diversity of G-proteins 6  
5 Identified G-protein mutations: what do they tell us about the regulatory domains of G-proteins? 11  
6 Hormonal regulation of G-protein levels 15  
7 Hormonal regulation of G-protein activity 23  
8 Perspectives 24  
References 25

CHAPTER TWO  
Mutations within the Gene Encoding the Stimulatory G-protein of Adenylyl Cyclase as the Basis for Albright Hereditary Osteodystrophy  
A. Miric and M.A. Levine  
1 Introduction 29  
2 Clinical features: signs and symptoms of parathyroid hormone resistance 30  
3 Albright hereditary osteodystrophy 31  
4 Pathogenesis of hormone resistance in PHP 33
CHAPTER THREE
GTP-binding Proteins and Cardiovascular Disease
K. Urasawa and P.A. Insel

1 Introduction 47
2 Signalling abnormalities in cardiovascular diseases 50
3 Signalling abnormalities induced by drug treatment 69
4 Overview and future prospects 75
References 77

CHAPTER FOUR
Alterations in G-protein-mediated Cell Signalling in Diabetes Mellitus
C.J. Lynch and J.H. Exton

1 Introduction 87
2 Evidence of disorders of G-protein signalling systems in diabetes mellitus 89
3 Changes in G-protein-mediated signalling in diabetes mellitus 91
4 General conclusions 100
References 101

CHAPTER FIVE
Adrenal Dysfunction and G-protein-mediated pathways
J.R. Hadcock and C.C. Malbon

1 Introduction 109
2 Adipose tissue 110
3 Brain 114
4 Heart 117
CHAPTER SIX

G-proteins in Obesity
N. Bégin-Heick and N. McFarlane-Anderson

1 Introduction 129
2 Obesity 129
3 Adipose tissue G-protein in animal models of obesity 131
4 The identification and quantification of G-proteins in tissues of non-obese animals 132
5 G-protein levels in adipocytes of obese animals 134
6 Liver 137
7 Other tissues 139
8 Factors likely to affect G-protein levels in obesity states 142
9 Growth and differentiation 148
10 Genetic aspects 149
References 150

CHAPTER SEVEN

Thyroid Disorders
D. Saggerson

1 Introduction 157
2 Adipose tissue 158
3 The central nervous system 175
4 The heart 179
5 The liver 183
6 Reticulocytes 184
7 Conclusion 185
References 185
CHAPTER EIGHT

Alcoholism: a Possible G-protein Disorder
A.S. Gordon, D. Mochly-Rosen and L Diamond

1 Clinical aspects 191
2 Cellular models of ethanol intoxication, tolerance, and physical dependence 194
3 Summary 212
   References 213

CHAPTER NINE

The Role of G-proteins in the Regulation of Myeloid Haemopoietic Cell Proliferation and Transformation
P. Musk, C.M. Heyworth, S.J. Vallance and A.D. Whetton

1 Haemopoiesis 217
2 Biological effects of myeloid growth factors and the role of G-proteins in their action 220
3 Myeloid leukaemias 229
4 Ras genes in the acute leukaemias and myelodysplasias 230
5 Leukaemia and the Philadelphia chromosome 233
   References 237
