TAURINE IN HEALTH AND DISEASE

Edited by
Ryan J. Huxtable
University of Arizona
College of Medicine
Tucson, Arizona

and

Dietrich Michalk
University of Cologne
Cologne, Germany

PLENUM PRESS • NEW YORK AND LONDON
Proceedings of an International Symposium on Taurine in Health and Disease, held August 29–September 1, 1993, in Cologne, Germany

A Division of Plenum Publishing Corporation
233 Spring Street, New York, N. Y. 10013

CONTENTS

Part I: Chemistry, Biochemistry and Metabolism of Taurine

Possible Relationships Between Taurine Derivatives and Products of the Metabolism of Ketimines ................................................. 1
S. Duprè, F. Pinnen, M. Fontana, R. Coccia, L. Pecci, and D. Cavallini

The Inhibitory Effects of Taurine on Protein Phosphorylations: Comparison of Various Characteristics of the Taurine-Affected Phosphoproteins Present in Rat Retina, Brain and Heart ........................................... 9
J. B. Lombardini

Effect of Photolytically Generated Riboflavin Radicals and Oxygen on Hypotaurine Antioxidant Free Radical Scavenging Activity ............. 19
T. R. Green and J. H. Fellman

Taurine Protects Against Oxidant-Induced Lung Injury: Possible Mechanism(s) of Action ................................................................. 31
G. Schuller-Levis, M. R. Quinn, C. Wright, and E. Park

Sulphur Amino Acids and the Metabolic Response to Cytokines .............. 41
R. F. Grimble

Expression and Regulation of the Taurine Transporter in Cultured Cell Lines of Human Origin ......................................................... 51
V. Ganapathy and F. H. Leibach

Dietary Taurine Requirement of Cats Is Determined by Microbial Degradation of Taurine in the Gut .............................................. 59
J. G. Morris, Q. R. Rogers, S. W. Kim, and R. C. Backus

Reactivity of Taurine with Aldehydes and its Physiological Role ............. 71
M. Ogasawara, T. Nakamura, I. Koyama, M. Nemoto, and T. Yoshida
Part II: Taurine and the Liver

Hepatic Regulation of Cysteine Utilization for Taurine Synthesis .......... 79
M. H. Stipanuk, P. J. Bagley, Y.-C. Hou, D. L. Bella, M. F. Banks, and L. L. Hirschberger

Immunohistochemical Localization of Taurine-Conjugated Bile Acids in the Liver of Mouse, Rat, Monkey and Human ............. 91
W. G. Ding, I. Tooyama, H. Kimura, and K. Kuriyama

Effects of Taurine on Microsomal Enzyme Activities Involved in Liver Lipid Metabolism of Wistar Rats ......................... 99
A. Cantafora, C. C. Yan, Y. Sun, and R. Masella

Part III: Taurine and the Kidney

Inhibitors of Anion Exchanger Activity Reduce Sodium Chloride-Dependent Taurine Transport by Brush Border Vesicles ........... 111
R. W. Chesney and A. M. Budreau

Expression of Taurine Transporter and its Regulation by Diet in Xenopus laevis Oocytes Following Injection of Rat Kidney Cortex mRNA .......... 121
X. Han and R. W. Chesney

Regulation of Taurine Transport by External Taurine Concentration and Medium Osmolality in Renal Tubular Cells in Culture ............... 131
D. P. Jones, B. Jiang, and R. W. Chesney

Role of Taurine in the Kidney: Osmoregulatory Taurine Accumulation in Renal Medulla .................................... 139
T. Nakanishi, Y. Takamitsu, and M. Sugita

Taurine and Experimental Kidney Disease ................................ 149
H. Trachtman and J. A. Sturman

Protecting Effect of Taurine Against Hypoxic Cell Damage in Renal Tubular Cells Cultured in Different Transplant Preservation Solutions ........ 159

Part IV: Taurine in Muscle and the Cardiovascular System

Mechanisms Underlying Physiological and Pharmacological Actions of Taurine on Myocardial Calcium Transport ................. 171
S. W. Schaffer, C. Ballard, and J. Azuma

Cardioprotective Actions of Taurine Against Intracellular and Extracellular Calcium-Induced Effects ............................. 181
H. Satoh

viii
Part V: Taurine and the Nervous System

New Data on the Regulation of Taurine Uptake in Cultured Nervous Cells
G. Rebel, V. Petegnief, P.-L. Lieu, R. C. Gupta, P. Guérin, and J. Bourguignon

Changes in the Localization of Taurine-Like Immunoreactivity During Development and Regeneration in the Rat Brain
K. R. Magnusson

Transmitter and Electrical Stimulation of [3H]Taurine Release from Rat Sympathetic Ganglia
R. A. Waniewski, J. S. Carp, and D. L. Martin

Cysteine Sulfinate Decarboxylase in Brain: Identification, Characterization and Immunocytochemical Localization in Astrocytes
M. Tappaz, K. Almarghini, and K. Do

Relations of Taurine Release and Influx to Cell Volumes in Cerebral Cortical Slices
S. S. Oja and P. Saransaaari

Taurine Release from Mouse Hippocampal Slices: Effects of Glutamergic Substances and Hypoxia
P. Saransaari and S. S. Oja

Taurine Neurons in Rat Hippocampal Formation Are Relatively Inert to Cerebral Ischemia

Calcium and Taurine Interaction in Mammalian Brain Metabolism
G. Sgaragli, M. Frosini, M. Palmi, L. Bianchi, and L. Delle Corte

Regulation of Protein Kinase C Activity by Taurine and β-Alanine during Excitotoxicity in Cat and Mouse Cerebellar Culture
E. Trenkner, D. Liu, C. Harris, and J. Sturman

Volume Regulation in Cultured Neurons: Pivotal Role of Taurine
H. Pasantes-Morales, E. Chacón, R. Sánchez-Olea, and J. Moran
Taurine as an Organic Osmolyte in the Intact Brain: Immunocytochemical and Biochemical Studies .................................................. 325
E. A. Nagelhus, M. Amiry-Moghaddam, A. Lehmann, and O. P. Ottersen

Part VI: Taurine Deficiency

Alterations of Ventricular Contractility and Myofibril Loss in Taurine-Deficient Hearts ...................................................... 335
N. Lake

Developmental Effects of Taurine Depletion on Synaptosomal Phospholipids in the Rat .......................................................... 343
R. J. Huxtable, J. Murphy, and P.-L. Lleu

Taurine Depletion and Synaptosomal Phospholipid Content in Cat Brain ................................................................. 355
P.-L. Lleu, R. J. Bowers, A. Gargano, J. Sturman, and R. J. Huxtable

Cell Volume Regulation in Taurine Deficient Cultured Astrocytes ................................................................. 361
J. Morán, T. Maar, and H. Pasantes-Morales

Feline Maternal Taurine Deficiency: Effects on Visual Cortex of the Offspring. A Morphometric and Immunohistochemical Study .................................................. 369
J. A. Sturman, P. Lu, Y.-X. Xu, and H. Imaki

Effects of Postnatal Taurine Deprivation on Visual Cortex Development in Rhesus Monkeys Through One Year of Age .................................................. 385
M. Neuringer, T. Palackal, J. A. Sturman, and H. Imaki

The Role of Taurine in Mammalian Hearing .................................................. 393
W. E. Davies, N. J. Harding, I. S. Kay, and P. C. Hopkins

Part VII: Taurine - Clinical Studies

The Plasma Concentration and Renal Handling of Taurine in Healthy Children and in Pediatric Patients with Disturbed Sulfur Metabolism .................................................. 399
D. Rödenbeck. D. J. Byrd, and J. Brodehl

Breast Milk Taurine and Its Possible Influence on the Development of Breast Milk Induced Jaundice in the Neonate - A Hypothesis .................................................. 405
M. Demirkol and H. Böhles

Taurine in the Newborn and Infant Undergoing Surgery .................................................. 411
C. Stratmann, H. J. Goebel, M. Abel, and J. Holzki

Taurine and the Lung: Pharmacological Intervention by Aerosol Route .................................................. 413
J. Covarrubias
Taurine Levels in Plasma and Platelets in Insulin-Dependent and Non-Insulin-Dependent Diabetes Mellitus: Correlation with Platelet Aggregation .......... 419
F. Franconi, F. Bennardini, A. Mattana, M. Miceli, M. Ciuti, M. Milan, A. Gironi, G. Bartomomei, R. Anichini, and G. Seghieri

Long-Term Effect of Taurine in Congestive Heart Failure: Preliminary Report .......... 425
J. Azuma and the Heart Failure Research with Taurine Group

Neuroactive Amino Acids in Synaptosomes from Focal and Nonfocal Temporal Lobe Tissue of Patients with Intractable Complex Partial Seizures .......... 435
P.-L. Lleu, D. Labiner, M. Weinand, and R. J. Huxtable

Participants ................................................................. 445

Index ................................................................. 449
