NUTRITION AND BIOTECHNOLOGY IN HEART DISEASE AND CANCER

Edited by
John B. Longenecker
University of North Carolina
Chapel Hill, North Carolina

David Kritchevsky
Wistar Institute of Anatomy and Biology
Philadelphia, Pennsylvania

and
Marc K. Drezner
Duke University Medical Center
Durham, North Carolina

PLENUM PRESS • NEW YORK AND LONDON
Proceedings of a conference on Nutrition and Biotechnology in Heart Disease and Cancer, held December 5–7, 1993, in Research Triangle Park, North Carolina

A Division of Plenum Publishing Corporation
233 Spring Street, New York, N. Y. 10013

CONTENTS

HEART DISEASE

Historical Review of Research on Atherosclerosis .................................................. 1
Gardner C. McMillan

Nutrition and Coronary Heart Disease Epidemiology ................................................. 7
Herman Tyroler

Obesity, Fat Patterning and Cardiovascular Risk ..................................................... 21
June Stevens

The Role of Lipoproteins in Atherogenesis ............................................................... 29
John R. Guyton

Role of Oxidized LDL and Antioxidants in Atherosclerosis ..................................... 39
Daniel Steinberg

Signal Transduction in Atherosclerosis: Second Messengers and Regulation of
Cellular Cholesterol Trafficking ................................................................................. 49
Kenneth B. Pomerantz, Andrew C. Nicholson and David P. Hajjar

Genetic Determinants of Myocardial Infarction ......................................................... 65
Jan L. Breslow and Marilyn Dammerman

Gene Therapy in Heart Disease .................................................................................. 79
Louis C. Smith, Randy C. Eisensmith and Savio L.C. Woo

Possible Role of Viruses in Atherosclerosis ............................................................. 89
Jason C. Shih and Donald W. Kelemen

Impact of Biotechnology in the Diagnostic and Therapeutic Management of
Cardiovascular Disorders ......................................................................................... 99
Jawed Fareed, Debra Hoppensteadt, Lalitha Iyer, Michael Koza,
Jeannie M. Walenga and Edward Bermes, Jr.

CANCER

Nutrition and Carcinogenesis: Historical Highlights and Future Prospects ............... 111
R. K. Boutwell
Epidemiology of Anticarcinogens in Food
Lenore Kohlmeier

Dietary Effects on DNA Methylation: Do They Account for the Hepatocarcinogenic Properties of Lipotrope Deficient Diets?
Judith K. Christman

Cholesterol, Cholesterogenesis and Cancer
Marvin D. Siperstein

Inhibition of the Induction of Cancer by Antioxidants
Tom J. Slaga

Nutrients, Signal Transduction and Carcinogenesis
Steven H. Zeisel

Nutrition, Immunology and Cancer: An Overview
Bob G. Sanders and Kimberly Kline

Anemia of Malignancy
Rodger L. Bick

HEART DISEASE AND CANCER

Diet in Heart Disease and Cancer
David Kritchevsky

Carcinogens in Foods: Heterocyclic Amines and Cancer and Heart Disease
Richard H. Adamson and Unnur P. Thorgeirsson

Genetic Engineering of Foods to Reduce the Risk of Heart Disease and Cancer
Vic C. Knauf and Daniel Facciotti

NIH INITIATIVE

New Directions in Dietary Studies in Cancer: The National Cancer Institute
Peter Greenwald, Carolyn Clifford, Susan Pilch, Jerianne Heimendinger and Gary Kelloff

New Directions in Dietary Studies and Heart Disease; The National Heart, Lung and Blood Institute Sponsored Multicenter Study of Diet Effects on Lipoproteins and Thrombogenic Activity
Henry N. Ginsberg

APPENDIX

Abstracts of Poster Sessions

Index
