Contents

Evolutionary Significance of the Hormone Recognition Capacity in Unicellular Organisms.		
Development of Hormone Receptors		1
G. CSABA		
1	Introduction	1
2	Receptor Memory: Hormonal Imprinting	2
3	Problems of the Specificity of Imprinting	3
4	Time, Concentration, and Downregulation	8
5	Sugars of the Receptors	10
6	Cell Aging and Imprinting	11
7	Imprinting by Amino Acids and Oligopeptides	11
8	Receptors of the Nuclear Envelope	13
9	Possible Mechanisms of Imprinting	15
10	The Other Component: Hormones in Protozoa	19
11	Evolutionary Conclusions	
	Based on the Unicellular Model	20
	References	23
Studies on the Opioid Mechanism in <i>Tetrahymena</i>		29
F.L. RENAUD, R. CHIESA, F. RODRÍGUEZ, N. TOMASSINI, and M. MARINO		
1	Introduction to Opioid Mechanisms	29
1.1	Opioid Mechanisms in Invertebrate Metazoa	29
1.2	Opioid Mechanisms in Unicellular Organisms	30
2	The Opioid Mechanism in <i>Tetrahymena</i>	31
2.1	Pharmacological Characterization of the Endogenous Opioid	31
2.2	Pharmacological Characterization of the Opioid Receptor	33
2.3	Biochemical Characterization of the Signal Transduction Pathway	37
3	Conclusions	38
	References	38

Adenylate and Guanylate Cyclases in <i>Tetrahymena</i>	40
S. UMEKI and Y. NOZAWA	
1 Introduction	40
2 Cyclic Nucleotide Metabolism in <i>Tetrahymena</i>	40
2.1 Cell Growth- and Cycle-Associated Changes	40
2.2 Involvement in Biological Regulation	44
3 Cyclases Involved in Cell Metabolism and Functions	45
4 Regulatory Mechanisms of Cyclases	46
4.1 Adenylate Cyclase	46
4.2 Guanylate Cyclase	48
5 Structure and Intracellular Distribution of Calmodulin	52
6 Conclusion	56
References	57
Signal Peptide-Induced Sensory Behavior in Free Ciliates: Bioassays and Cellular Mechanisms	61
V. LEICK, M. GRAVE, and P. HELLUNG-LARSEN	
1 Introduction	61
2 Peptide Signals in Ciliates	62
2.1 Signal Peptides Found Intracellularly	62
2.2 Signal Peptides Having Sensory Effects	63
2.2.1 Physiological Effects of Insulin on <i>Tetrahymena</i>	63
3 Bioassays Measuring Peptide-Induced Changes of Cell Behavior and Ciliary Activity	67
3.1 Population Assays for Chemoattraction	67
3.2 Single Cell Assays for Chemoattraction	70
3.3 Assays of Ciliary Activity	71
4 Cellular Mechanisms Related to Peptide Action on Individual Cell Behavior	72
4.1 Adaptation	72
4.2 Persistence	74
5 Concluding Remarks	75
References	76
Ciliate Pheromones	80
P. LUPORINI, C. MICELI, C. ORTENZI, and A. VALLESI	
1 Introduction	80
2 Background	80
3 Pheromone Notation and Origin	83
4 Pheromone Secretion and Purification	84
5 Pheromone Structure	86

8.1	Sponges	134
8.2	Cnidaria: <i>Hydra</i>	136
8.3	Tripoblasts	136
8.3.1	Pseudocoelatomates: <i>Caenorhabditis elegans</i>	136
8.4	Insects	139
8.5	Deuterostomes	144
8.5.1	Fertilization in Sea Urchins	144
9	Conclusions	145
10	Characteristics of Cell Adhesion Proteins	145
10.1	Modules	145
10.2	Cell Surface Association	146
10.3	Role of Ca^{2+}	147
10.4	Binding Characteristics	147
11	Extracellular Matrix Interactions	148
12	Role of Lectins and Carbohydrates	148
13	Signal Transduction and Cytoplasmic Domains	148
