# Contents

Author Affiliations ........................................................................................................ xi

Preface ......................................................................................................................... xiii

Part I. A View of the Codependence of Chemistry and Computers

Chapter 1. Beyond Lecture—A Vision of the Computer in the Modern Chemistry Classroom .......................................................... 3
  *Theresa Julia Zielinski and Mary L. Swift*

Chapter 2. The Evolution of Computers in Chemistry ................................................. 25
  *Peter Lykos*

Chapter 3. Training the Practicing Chemist ................................................................. 45
  *Robert Megargle*

Chapter 4. Industrial Considerations—Information Technology and Its Effect on Corporate Culture ........................................... 61
  *Nancy Woo*

Chapter 5. Computing & Communications in Chemistry Education ..................... 73
  *Martin S. Ewing*

Part II. Accessing Chemical Information

Chapter 6. Information Retrieval in Chemistry Across the Internet ......................... 93
  *F. S. Varveri*

Chapter 7. Coping with the Transformation of Chemical Information ................... 109
  *Carol Carr and Arleen N. Somerville*

Part III. Fundamental Computer Skills in Modern Chemical Practice

Chapter 8. Beyond the Basics: What Chemistry Students Need to Know About Computing ................................................................. 135
  *Peter C. Jurs*

Chapter 9. Spreadsheets for Doing and Teaching Chemistry .................................... 143
  *Daniel E. Atkinson*

Chapter 10. Software for Teaching and Using Numerical Methods in Physical Chemistry ........................................................................... 163
  *Sidney H. Young, Jeffrey D. Madura, and Frank Rioux*

  *Kenneth L. Ratzlaff*

Chapter 12. Statistical Methods in Chemistry: What and How They Should Be Integrated into the Curriculum ................................... 205
  *Karen D. Rappaport*

Chapter 13. Visualization for Chemists .................................................................... 227
  *John P. Ranck*
Part IV. Computational Chemistry in the Curriculum

Chapter 14. *Ab Initio* Techniques in Chemistry: Interpretation and Visualization .................................................. 243
   James B. Foresman

   Warren Hehre

Chapter 16. Molecular Graphics and Simulation of Proteins and Nucleic Acids.......................................................... 283
   Scott H. Northrup

Chapter 17. Molecular Modeling and Drug Design ............................. 309
   Alexander Tropsha and J. Philip Bowen

Part V. Teaching Chemistry with Computers

   Carolyn Sweeney Judd and Robert G. Ford

   Stephen K. Lower
