THE LIMITS OF REDUCTIONISM IN BIOLOGY
Contents

Editors: Gregory R. Bock (Organizer) and Jamie A. Goode

This symposium was based on a proposal made by Lewis Wolpert and Ken Holmes

L. Wolpert  Introduction  1

T. Nagel  Reductionism and antireductionism  3
Discussion  10

R. J. P. Williams  Reductionism in physical sciences  15
Discussion  24

R. Henderson  Macromolecular structure and self-assembly  36
Discussion  52

D. Noble  Reduction and integration in understanding the heart  56
Discussion  68

General discussion  Is all science reductionist?  73

K. C. Holmes  Muscle contraction  76
Discussion  89

P. Nurse  Reductionism and explanation in cell biology  93
Discussion  102

S. Brenner  Biological computation  106
Discussion  111

W. G. Quinn  Reductionism in learning and memory  117
Discussion  122

J. F. Ashmore  Hearing  133
Discussion  139
CONTENTS

H. B. Barlow  The nested networks of brains and minds  142
Discussion  155

P. Bateson  Genes, environment and the development of behaviour  160
Discussion  170

S. Rose  What is wrong with reductionist explanations of behaviour?  176
Discussion  186

R. May  Levels of organization in ecological systems  193
Discussion  198

J. Maynard Smith  The units of selection  203
Discussion  211

Final discussion  What are the limits of reductionism?  218
