Lacrimal gland, tear film, and dry eye syndromes 2: basic science and clinical relevance / edited by David A. Sullivan, Darlene A. Dartt, and Michele A. Meneray.

p. cm. -- (Advances in experimental medicine and biology ; v. 438.)

Includes bibliographical references and index.

ISBN 0-306-45812-8

Series.

Proceedings of the Second International Conference on the Lacrimal Gland, Tear Film, and Dry Eye Syndromes, held November 16–19, 1996, at the Southampton Princess Resort, Bermuda

ISBN 0-306-45812-8

CONTENTS

Conference Address

1. A Clinician Looks at the Tearfilm ........................................... 1
   J. Daniel Nelson

Lacrimal Gland: Cellular and Molecular Biology

2. Influence of Gender, Sex Steroid Hormones, and the Hypothalamic-Pituitary
   Axis on the Structure and Function of the Lacrimal Gland .............. 11
   David A. Sullivan, L. Alexandra Wickham, Eduardo M. Rocha,
   Robin S. Kelleher, Lilai Aikawa da Silveira, and Ikuko Toda

3. Androgen-Regulated Transcription in the Epithelium of the Rat Lacrimal Gland
   .......................................................... 43
   F. Claessens, H. Vanaken, I. Vercaeren, G. Verrijdt, A. Haelens,
   E. Schoenmakers, P. Alen, A. Devos, B. Peeters, G. Verhoeven,
   W. Rombauts, and W. Heyns

4. Gene Cloning of BM180, a Lacrimal Gland Enriched Basement Membrane
   Protein with a Role in Stimulated Secretion .......................... 49
   Anil C. Asrani, Angela J. Lumsden, Rajesh Kumar, and Gordon W. Laurie

5. Sensory Denervation Leads to Deregulated Protein Synthesis in the Lacrimal
   Gland ......................................................... 55
   Doan H. Nguyen, Roger W. Beuerman, Michele A. Meneray, and
   Dmitri Maitchouk

   Interactions with Both T Cells and B Cells .......................... 63
   Austin K. Mircheff, Tao Yang, Jian Zhang, Hongtao Zeng, J. Peter Gierow,
   Dwight W. Warren, and Richard L. Wood

7. Tissue Expression of Tear Lipocalin in Humans ......................... 69
   Catherine Ressot, Hervé Lassagne, Jean-Louis Kemeny, and
   Anne-Marie Françoise Gachon
33. Soluble Mucin and the Physical Properties of Tears ........................................ 229
   John M. Tiffany, Jyotin C. Pandit, and Anthony J. Bron

34. Characterization and Origin of Major High-Molecular-Weight Tear Sialoglycoproteins .................................................. 235
   Robert A. Sack, Bruce Bogart, Sonal Sathe, Ann Beaton, and George Lew

35. Detection and Quantification of Conjunctival Mucins ...................................... 239
   James E. Jumblatt and Marcia M. Jumblatt

36. Mucous Contribution to Rat Tear-Film Thickness Measured with a Microelectrode Technique .................................................. 247
   Philip Anderton and Sophia Tragoulias

37. Structural Analysis of Secreted Ocular Mucins in Canine Dry Eye ..................... 253
   Stephen D. Carrington, Sally J. Hicks, Anthony P. Corfield, Renee L. Kaswan, Nicki Packer, Shirley Bolis, and Carol A. Morris

38. Corneal Epithelial Tight Junctions and the Localization of Surface Mucin ........... 265
   Henry F. Edelhauser, David E. Rudnick, and Ramzy G. Azar

39. Breakup and Dewetting of the Corneal Mucus Layer: An Update ....................... 273
   Ashutosh Sharma

40. The Meibomian Glands and Tear Film Lipids: Structure, Function, and Control .. 281
   Anthony J. Bron and John M. Tiffany

41. Tear Film Interferometry as a Diagnostic Tool for Evaluating Normal and Dry-Eye Tear Film .................................................. 297
   Marshall G. Doane and M. Estella Lee

42. Human and Rabbit Lipid Layer and Interference Pattern Observations .............. 305
   Donald R. Korb, Jack V. Greiner, Thomas Glonek, Amy Whalen, Stacey L. Hearn, Jan E. Esway, and Charles D. Leahy

43. Abnormal Lipid Layers: Observation, Differential Diagnosis, and Classification ... 309
   Jean-Pierre Guillon

44. Association of Tear Lipid Layer Interference Patterns with Superficial Punctate Keratopathy .................................................. 315
   Aoi Komuro, Norihiko Yokoi, Yoko Takehisa, and Shigeru Kinoshita

45. Meibomian Secretions in Chronic Blepharitis .................................................. 319
   James P. McCulley and Ward E. Shine
46. Androgen Regulation of the Meibomian Gland .................. 327
   David A. Sullivan, Eduardo M. Rocha, M. David Ullman,
   Kathleen L. Krenzer, Jianping Gao, Ikuko Toda,
   M. Reza Dana, Dorothy Bazzinotti, Lilia Aikawa da Silveira, and
   L. Alexandra Wickham

47. Delivery of Meibomian Oil Using the Clinical Meibometer® ........ 333
   John M. Tiffany, Anthony J. Bron, Federico Mossa, and Shabtay Dikstein

   Jack V. Greiner, Thomas Glonek, Donald R. Korb, Amy C. Whalen,
   Eric Hebert, Stacey L. Hearn, Jan E. Esway, and Charles D. Leahy

49. Effect of Meibomian Gland Occlusion on Tear Film Lipid Layer Thickness .... 345
   Jack V. Greiner, Thomas Glonek, Donald R. Korb, Stacey L. Hearn,
   Amy C. Whalen, Jan E. Esway, and Charles D. Leahy

Tear Film Stability, Evaporation, and Biophysics

50. Meibomian Gland Lipids, Evaporation, and Tear Film Stability .......... 349
    William D. Mathers and James A. Lane

51. Surface–Chemical Pathways of the Tear Film Breakup: Does Corneal Mucus Have a Role? 361
    Ashutosh Sharma

52. The Biophysical Role in Tear Regulation .................................. 371
    Alan Tomlinson, Jennifer P. Craig, and Gerald E. Lowther

53. Longitudinal Analysis of Precorneal Tear Film Rupture Patterns ....... 381
    Etty Bitton and John V. Lovasik

54. The Role of Tear Proteins in Tear Film Stability in the Dry Eye Patient and in the Rabbit 391
    Ronald D. Schoenwald, Sangeeta Vidvauns, Dale Eric Wurster, and
    Charles F. Barfknecht

55. Relationship between Pre-Ocular Tear Film Structure and Stability ...... 401
    Michel Guillon, Cecile Maissa, and Elaine Styles

56. Association of Precorneal and Preconjunctival Tear Film ................ 407
    Yoko Takehisa, Norihiko Yokoi, Aoi Komuro, and Shigeru Kinoshita

57. Age and Gender Effects on the Normal Tear Film .......................... 411
    Jennifer P. Craig and Alan Tomlinson

58. The Kinetics of Lid Motion and Its Effects on the Tear Film ............ 417
    A. Berke and S. Mueller

59. Hydrodynamics of Meniscus-Induced Thinning of the Tear Film .......... 425
    Ashutosh Sharma, Sanjay Tiwari, Rajesh Khanna, and John M. Tiffany
### Cytokines, Growth Factors, Proto-Oncogenes, and Apoptosis

</table>
71. The Distribution of FGF-2 and TGF-β within the Lacrimal Gland of Rabbits
   Joel Schechter, Dwight W. Warren, and Richard L. Wood

72. Tear Fluid Changes after Photorefractive Keratectomy
   Minna Vesaluoma and Timo Tervo

73. Time Course of Apoptosis in Lacrimal Gland after Rabbit Ovariectomy
   Ana Maria Azzarolo, Richard L. Wood, Austin K. Mircheff, Eric Olsen,
   Zuo Ming Huang, Ramin Zolfagari, and Dwight W. Warren

74. Co-Expression of BCL-2 and CD44S in Basal Layers of Human Ocular Surface
   Epithelia
   Andrew J. W. Huang, Cheng-Hui Li, You-Wei Chen, and
   Lilly Y. W. Bourguignon

75. Alterations of Ocular Surface Gene Expression in Sjögren’s Syndrome
   David T. Jones, Dagoberto Monroy, Zhongua Ji, and Stephen C. Pflugfelder

76. Growth Factor Interaction with Contact Lenses: Evidence for and Possible
   Effects of Storage of Basic FGF in Contact Lenses: Preliminary Results
   G.-B. van Setten and N. Zengin

Inflammation and Immunity

77. Neural, Endocrine, and Immune System Interactions: Relevance for Health and
   Disease
   Jan A. Moynihan, Barbara Kruszewska, Gary J. Brenner, and Nicholas Cohen

78. Inductive Sites for Rat Tear IgA Antibody Responses
   Deanne M. Ridley Lathers, Randall F. Gill, Nancy L. O’Sullivan, and
   Paul C. Montgomery

79. Anatomy of Mammalian Conjunctival Lymphoepithelium
   James Chodosh, Robert E. Nordquist, and Ronald C. Kennedy

80. Binding of a Cytopathic or an Invasive Strain of P. aeruginosa to Cytoskeletal,
   Basement Membrane, or Matrix Proteins of Wounded Cornea Is Similar
   and Does Not Rely on Interaction with Actin Filaments
   Linda D. Hazlett and Sharon Masinick

81. Secretory IgA Responses on the Human Ocular Surface
   Aize Kijlstra

82. A Method to Study Induction of Autoimmunity in Vitro: Co-Culture of Lacrimal
   Cells and Autologous Immune System Cells
   Harvey R. Kaslow, Zhijun Guo, Dwight W. Warren, Richard L. Wood, and
   Austin K. Mircheff

83. Rat Lacrimal Glands Contain Activated and Resting Mature T Cells, Recent
   Thymic Emigrants, and Possibly Extrathymic Populations
   Nancy L. O’Sullivan, Cheryl A. Skandera, and Paul C. Montgomery
84. Immunohistochemical Examination of Lacrimal Gland Tissue from Patients with Ocular Sarcoidosis
   Janine A. Smith, Chi-Chao Chan, Charles E. Egwuagu, and Scott M. Whitcup

85. Immunoglobulin Levels in the Tears of Patients with Corneal Grafts and Transplant Rejection
   András Berta and Zsolt Lampé

Tear Film Components and Influence on the Ocular Surface

86. Tear Fluid Influence on the Ocular Surface
   Stephen C. Pflugfelder

87. Effects of Lacrimal Gland Removal on Squirrel Monkey Cornea
   Dmitri Y. Maitchouk, Roger W. Beuerman, Ray J. Varnell, and Lia Pedroza-Schmidt

88. Lacrimal Gland Growth Factors and Receptors: Lacrimal Fibroblastic Cells Are a Source of Tear HGF

89. Clusterin May Be Essential for Maintaining Ocular Surface Epithelium as a Non-Keratinizing Epithelium
   Kohji Nishida, Satoshi Kawasaki, and Shigeru Kinoshita

90. Effects of Chronic Hypertonic Stress on Regulatory Volume Increase and Na-K-2Cl Cotransporter Expression in Cultured Corneal Epithelial Cells
   Victor N. Bildin, Hua Yang, Jorge Fischbarg, and Peter S. Reinach

91. A Unified Theory of the Role of the Ocular Surface in Dry Eye
   Michael E. Stern, Roger W. Beuerman, Robert I. Fox, Jianping Gao, Austin K. Mircheff, and Stephen C. Pflugfelder

92. Human Tear Film Components Bind Pseudomonas aeruginosa
   Nancy A. McNamara and Suzanne M. J. Fleiszig

93. Small-Volume Analysis of Rabbit Tears and Effects of a Corneal Wound on Tear Protein Spectra
   Ray J. Varnell, Dmitri Y. Maitchouk, Roger W. Beuerman, James E. Carlton, and Anthony Haag

94. 31-27 kDa Caseinolytic Protease in Human Tears
   Miki Sakata, Ann R. Beaton, Sonal Sathe, and Robert A. Sack

95. Tear Protein Levels following Punctal Plugging
   E. Ian Pearce, Alan Tomlinson, Jennifer P. Craig, and Gerald E. Lowther

96. Characterization of Cells Shed from the Ocular Surface in Normal Eyes
   Carolyn G. Begley, Jie Zhou, and Graeme Wilson
97. Healing Effect of Sodium-Sucrose-Octasulfate and EGF on Epithelial Corneal Abrasions in Rabbits ......................................................... 683
   Sven Johansen, Steffen Heegaard, Kirsten Bjerrum, and Jan Ulrik Prause

98. A Novel Approach to Resolve Cellular Volume Responses to an Anisotonic Challenge .......................................................... 687
   Pavel Iserovich, Peter S. Reinach, Hua Yang, and Jorge Fischbarg

 Artificial Tears and Contact Lenses: Impact on the Tear Film and Ocular Surface

99. Classification of Artificial Tears: I: Composition and Properties ............. 693
   J. Murube, Paterson, and E. Murube

100. Classification of Artificial Tears: II: Additives and Commercial Formulas ..... 705
    J. Murube, A. Murube, and Chen Zhuo

101. The Ocular Surface, the Tear Film, and the Wettability of Contact Lenses .... 717
    Carol A. Morris, Brien A. Holden, Eric Papas, Hans J. Griesser,
    Shirley Bolis, Philip Anderton, and Fiona Carney

102. Conjunctival Permeability and Ultrastructure: Effects of Benzalkonium Chloride and Artificial Tears ............................................. 723
    John L. Ubels, Eric M. Woo, William J. Watts, Lisa K. Smith, Uko Zylstra,
    Jonnell Beaird, and Mitchell D. McCartney

103. Preservative Effect on Epithelial Barrier Function Measured with a Novel Technique ................................................................. 731
    Jerry R. Paugh, Alan Sasai, and Abhay Joshi

104. Video Biomicroscopy of the Tear Film ................................................ 737
    P. Noel Dilly, Michel Guillon, and Lucia McGrogan

105. Patient-Dependent and Material-Dependent Factors in Contact Lens Deposition Processes ............................................................ 745
    Brian J. Tighe, Lyndon Jones, Kathryn Evans, and Valerie Franklin

106. Effectiveness of Bion Tears, Cellufresh, Aquasite, and Refresh Plus for Moderate to Severe Dry Eye .............................................. 753
    Peter C. Donshik, J. Daniel Nelson, Mark Abelson, James P. McCulley,
    Cliff Beasley, and Robert A. Laibovitz

107. Ocular Residence Time of Carboxymethylcellulose Solutions ..................... 761
    Jerry R. Paugh, Ronald C. Chatelier, and Joseph W. Huff

108. Vitronectin Adsorption in Contact Lens Surfaces during Wear: Locus and Significance ............................................................. 769
    Brian J. Tighe, Valerie Franklin, Christopher Graham, Aisling Mann, and Michel Guillon
109. Effect of Tears and Tear Residues on Worn Etafilcon and Polymacon Disposable Contact Lenses on the Adhesion of Pseudomonas aeruginosa .......... 775
    Miguel F. Refojo, Fee-Lai Leong, and Marta Portolés

110. Hyaluronan in Dry Eye and Contact Lens Wearers ..................... 785
    Monica Berry, William K. Pastis, Roger B. Ellingham, Louise Frost,
    Anthony P. Corfield, and David L. Easty

Classification, Diagnosis, Clinical Features, and Epidemiology of Dry Eye Syndromes

111. Epidemiology and Classification of Dry Eye .......................... 791
    Michael A. Lemp

112. CANDEES: The Canadian Dry Eye Epidemiology Study ................. 805
    Barbara E. Caffery, Doris Richter, Trefford Simpson, Desmond Fonn,
    Michael Doughty, and Keith Gordon

113. Sensitivity and Specificity of a Screening Questionnaire for Dry Eye ........ 807
    Neal L. Oden, David E. Lilienfeld, Michael A. Lemp, J. Daniel Nelson, and
    Fred Ederer

114. Use of a Questionnaire for the Diagnosis of Tear Film-Related Ocular Surface Disease ................................................. 821
    Maurizio Rolando, Angelo Macri, Trillo Carlandrea, and Giovanni Calabria

115. Importance of Conjunctival Epithelial Evaluation in the Diagnostic
    Differentiation of Dry Eye from Drug-Induced Epithelial Keratopathy ... 827
    Norihiko Yokoi and Shigeru Kinoshita

116. The Size of Corneal Epithelial Cells Collected by Contact Lens Cytology from Dry Eyes ..................................................... 831
    Graeme Wilson and John Laurent

117. Optimum Dry Eye Classification Using Questionnaire Responses ........ 835
    Charles McMonnies, Arthur Ho, and Denis Wakefield

118. Diagnostic Value of Tear Film Abnormalities in a New Syndrome Affecting the Neuroendocrine and Immune Systems ...................... 839
    Janos Feher

119. Low-Tech Detection of Tear Film-Related Diseases of the Ocular Surface .... 845
    Maurizio Rolando, Salvatore Alongi, Angelo Macri, Marco Schenone, and
    Giovanni Calabria

120. Using LIPCOF (Lid-Parallel Conjunctival Fold) for Assessing the Degree of Dry Eye, It Is Essential to Observe the Exact Position of That Specific Fold ............................................. 853
    Frank Schirra, Helmut Höh, Christina Kienecker, and Klaus W. Ruprecht
Contents

121. Use of the Tearscope Plus and Attachments in the Routine Examination of the Marginal Dry Eye Contact Lens Patient .................. Jean-Pierre Guillon 859
122. Evaluation of Schirmer Tests by Two Types of Tear Clearance Tests .......... Masafumi Ono, Yukiko Yagi, Eiki Goto, Hao-Yung Yang, and Kazuo Tsubota 869
123. Fluorescein Dye Concentration as a Factor in Tear Film Fluorescence ........ Victor M. Finnemore, Donald R. Korb, Jack V. Greiner, Thomas Glonek, and John P. Herman 875
124. A New Method for Measuring Human Basic Tear Fluid Osmolality .......... Pierre L. Emond and Christopher J. Corbett 879
125. Micropachometric Quantification of Tear Assessment Tests ................. Hans W. Roth and Rolf Marquardt 883
126. Use of Corneal Thickness Changes to Compare the Efficacy of Conventional Eye Drops with Supracutaneous Treatment of Dry Eye ............ Hans W. Roth 887

Pathogenesis of Dry Eye Syndromes

127. Sjögren’s Syndrome: Pathogenesis and New Approaches to Therapy ......... Robert I. Fox 891
128. Reflex Tearing in Dry Eye Not Associated with Sjögren’s Syndrome ........ Kazuo Tsubota 903
129. Cytokine mRNA Expression in Labial Salivary Glands and Cytokine Secretion in Parotid Saliva in Sjögren’s Syndrome ...................... Philip C. Fox, Margaret M. Grisius, Debra K. Bermudez, and Di Sun 909
130. Age-Related Decrease in Innervation Density of the Lacrimal Gland in Mouse Models of Sjögren’s Syndrome .......................... Benjamin Walcott, Nidia Claros, Alpa Patel, and Peter R. Brink 917
131. Aberrant Expression and Potential Function for Parotid Secretory Protein (PSP) in the NOD (Non-Obese Diabetic) Mouse ................. Christopher P. Robinson, Denise I. Bounous, Connie E. Alford, Ammon B. Peck, and Michael G. Humphreys-Beher 925
132. Survey of Canine Tear Deficiency in Veterinary Practice ............... Renee Kaswan, Christopher Pappas, Jr., Keith Wall, and Susan G. Hirsh 931
133. Lacrimation and Salivation Are Not Related to Lymphocytic Infiltration in Lacrimal and Salivary Glands in MRL lpr/lpr Mice ............ Hiromi Fujita, Tsutomu Fujihara, Tsutomu Takeuchi, Ichiro Saito, and Kazuo Tsubota 941
134. The Sjögren Syndrome and Tear Function Profile .......................... 949
   O. Paul van Bijsterveld

Management and Therapy of Dry Eye Syndromes

135. Cytokines May Prove Useful in the Treatment of Sjögrens Syndrome (SS) Dry
   Eye .................................................. 953
   Norman Talal, Toru Nakabayashi, John J. Letterio, Liping Kong,
   Andrew G. Geiser, and Howard Dang

136. The Now and Future Therapy of the Non-Sjögren's Dry Eye .................. 959
   Gary N. Foulks

137. Dry Eye Treatment with Eye Drops that Stimulate Mucin Production .......... 965
   Takashi Hamano

138. A Dose-Ranging Clinical Trial to Assess the Safety and Efficacy of
   Cyclosporine Ophthalmic Emulsion in Patients with Keratoconjunctivitis
   Sicca .................................................. 969
   Joseph Tauber, for the Cyclosporine Study Group

139. Oral Pilocarpine for Symptomatic Relief of Dry Mouth and Dry Eyes in Patients
   with Sjögrens Syndrome ........................................ 973
   A. S. Papas, M. M. Fernandez, R. A. Castano, S. C. Gallagher, M. Trivedi,
   and R. C. Shrotriya

140. Oral Pilocarpine for Symptomatic Relief of Keratoconjunctivitis Sicca in
   Patients with Sjögren’s Syndrome ........................................ 979
   J. D. Nelson, M. Friedlaender, R. P. Yeatts, R. Yee, M. McDermott, S. Orlin,
   S. C. Gallagher, R. C. Shrotriya, and the MGI PHARMA Sjögren’s
   Syndrome Study Group

141. Supracutaneous Treatment of Dry Eye Patients with Calcium Carbonate ...... 985
   Donald L. MacKeen, Hans Walter Roth, Marshall G. Doane, and
   Patricia D. MacKeen

142. Preclinical Safety Studies of Cyclosporine Ophthalmic Emulsion .............. 991
   O. Angelov, A. Wiese, Y. Yuan, J. Andersen, A. Acheampong, and B. Brar

143. Conjunctival Impression Cytology from Dogs with Keratoconjunctivitis Sicca:
   Pre- and Post-Treatment with Topical Cyclosporine ................................ 997
   Denise I. Bounous, Kathleen L. Krenzer, Renee L. Kaswan, and
   Susan G. Hirsh

144. Cyclosporine Distribution into the Conjunctiva, Cornea, Lacrimal Gland, and
   Systemic Blood following Topical Dosing of Cyclosporine to Rabbit,
   Dog, and Human Eyes ............................................. 1001
   Andrew Acheampong, Martha Shackleton, Steve Lam, Patrick Rudewicz,
   and Diane Tang-Liu
145. Estrogen Therapy in Keratoconjunctivitis Sicca .......................... 1005
   Jinus Akramian, Andreas Wedrich, Johannes Nepp, and Michael Sator

146. Dry Eye Treatment with Acupuncture: A Prospective, Randomized,
   Double-Masked Study ............................................. 1011
   J. Nepp, A. Wedrich, J. Akramian, A. Derbolav, C. Mudrich, E. Ries, and
   J. Schauersberger

147. Punctal Occlusion for the Treatment of Dry Eye ......................... 1017
   Mitchell H. Friedlaender and Robert I. Fox

148. Keratoprosthesis in Pemphigoid and Stevens-Johnson Syndrome ...... 1021
   Claes H. Dohlman and Hisao Terada

149. Portable Device for Programmable, Automatic, or On-Demand Delivery of
   Artificial Tears .................................................. 1027
   Vo Van Toi and P. A. Grounauer

Contributors ............................................................. 1033

Index ................................................................. 1037
