
TABLE OF CONTENTS

PAPERS

1. APPLICATIONS

- Characterizing the Spatial Variability: examples from the Earth and Mars... 1
Luis Samaniego and András Bárdossy
- Zur Nutzung von 3D-Stadtmodellen für mobile Navigationssysteme 17
Michael Bauer, Volker Coors, Thorsten Schulz and Alexander Zipf
- Virtual signposts for location-based story-telling..... 41
Dirk Ahlers, Susanne Boll and Daniel Wichmann
- Absperrung eines Gefahrengebietes 57
*Roland König, Ralf Neugebauer, Jürgen Biermann, Theodor Gervens,
Marcus Bertling and Daniel Kümper*

2. GEOSPATIAL WEB SERVICES (WPS) 1

- WPS Application Profiles for Generic and Specialised Processes 69
Edward Nash
- Towards a Quality Aware Web Processing Service 81
Andreas Donaubauer, Tatjana Kutzner and Florian Straub
- Towards a Transactional Web Processing Service (WPS-T) 91
Bastian Schäffer

3. GEOSENSOR NETWORKS

- Humans as Sensors: Assessing the quality of information from the public for
rapid flood loss estimation 117
Kathrin Poser, Heidi Kreibich and Doris Dransch

| | |
|--|-----|
| On GeoSensor Network optimization using a model-based approach..... | 123 |
| <i>Alexander C. Walkowski</i> | |
| The Interoperability of Wireless Sensor Networks..... | 131 |
| <i>Daniela Ballari, Miguel Angel Manso-Callejo and Monica Wachowicz</i> | |
| 4. SEMANTIC INTEROPERABILITY AND WEB 2.0 | |
| A Classification of Generalisation Operators Formalised in OCL..... | 141 |
| <i>Theodor Foerster, Javier Morales and Jantien Stoter</i> | |
| An ontology-based model for representing evolution of both data and semantic in GIS..... | 157 |
| <i>Chamseddine Zaki, Myriam Servières and Guillaume Moreau</i> | |
| Integration of remote sensed images and semantic based Descriptors for Hazards and risks management..... | 165 |
| <i>Daniele Casciello, Francisco Rivas and Åke Sivertun</i> | |
| Approximation of Vague Regions Using Collaborative Tagging Systems..... | 179 |
| <i>Fabian Wilske</i> | |
| 5. GEOSTATISTICAL APPLICATIONS AND REAL-TIME GEOSTATISTICS | |
| Optimizing monitoring networks for contaminant dispersion..... | 189 |
| <i>S.J. Melles, J. Beekhuizen, S. de Bruin, G.B.M. Heuvelink, A. van Dijk and C.J.W. Twenhofel</i> | |
| Web-based geostatistics using WPS..... | 199 |
| <i>Jorge de Jesus, Paul Hiemstra and Grégoire Dubois</i> | |
| Visualizing self-organizing maps with GIS..... | 219 |
| <i>Tonio Fincke, Victor Lobo and Fernando Bação</i> | |
| Automatic detection and correction of heterogeneities between networks..... | 235 |
| <i>Jon O. Skoien, Olivier Baume, Edzer J. Pebesma and Gerard B. M. Heuvelink</i> | |

6. GEOSPATIAL WEB SERVICES (WPS) 2

- Grid Computing Enabled Web Processing Service.....243
Bastian Baranski
- Providing GRASS with a Web Processing Service Interface257
Johannes Brauner
- Personalised and Adaptive Information-Sharable Spatial Map for Mobile
 Users.....267
Zekeng Liang, Stefan Poslad and Dejian Meng

7. SPATIAL DATA INFRASTRUCTURES

- Interoperable Data Processing by Mobile Geospatial Applications275
Thomas Brinkhoff, Christof Lindenbeck and Jürgen Weitkämper
- Design and Implementation of a Service Oriented Geospatial Portal for
 Disaster Risk Management297
Farhad Samadzadegan, Amin Alvand and Sara Saeedi
- Is there a Future for Spatial Data Infrastructures?.....305
Ulrich Boes and Raina Pavlova

POSTER ABSTRACTS

- Development of a WEB GIS Based on Tourism Information System317
Xiaoyang Gao and Åke Sivertun
- OGC Raster Processes Services: Standardization and Implementation319
Peter Baumann
- An approach to sensor fusion using geostatistics321
Ben Ingram and Dan Cornford
- Conceptual model for uncertainty323
Matthew Williams, Dan Cornford, Lucy Bastin and Ben Ingram

| | |
|--|-----|
| NAVIKI – The Navigation Wiki..... | 325 |
| <i>Sven Luzar and Gernot Bauer</i> | |
| Combining positional data and real-time environmental modelling techniques for personal exposure estimation | 327 |
| <i>Lydia E. Gerharz, Edzer J. Pebesma and Antonio Krüger</i> | |
| SAFE: A Sensor-Actuator-based Early-warning System for Extreme Weather Conditions | 329 |
| <i>Michael Klafft, Tobias Krüntzer, Ulrich Meissen and Agnès Voisard</i> | |
| User-driven Provision and Profile-/Context-aware Consumption of Mobile Geo Widgets | 331 |
| <i>Matthias Böhmer, Gernot Bauer and Wolfgang Wicht</i> | |
| Privacy in the social semantic web: a tag-sharing network | 333 |
| <i>Jan Torben Heuer</i> | |
| The IMEDEA Geoportal Approach..... | 335 |
| <i>Miguel González Calleja</i> | |

KEYNOTE ABSTRACT

| | |
|---|-----|
| Uncertainty: the key to interoperable geospatial processing?..... | 341 |
| <i>Dan Cornford</i> | |
