THE  
PHONOLOGY  
OF  
CATALAN

---

*Max W. Wheeler*

OXFORD  
UNIVERSITY PRESS

# CONTENTS

<i>Preface</i>	x
<b>1 INTRODUCTION</b>	<b>1</b>
1.1 The Catalan language: its varieties and standard(s)	1
1.2 Theoretical assumptions and framework	3
1.3 Outline of contents	5
1.4 Guidance notes	6
1.4.1 Orthography	6
1.4.2 Transcriptions and glosses	8
1.4.3 Abbreviations in glosses	8
1.4.4 A note on Catalan surnames	8
<b>2 PHONOLOGICAL PRIMITIVES AND SEGMENT INVENTORIES</b>	<b>10</b>
2.1 Consonant inventory and contrasts	10
2.1.1 Plosives	10
2.1.2 Affricates	11
2.1.3 Fricatives	13
2.1.3.1 <i>Labiodental fricative</i>	13
2.1.3.2 <i>Alveolo-palatal fricatives</i>	13
2.1.3.3 <i>Relation between alveolo-palatal fricatives and affricates</i>	15
2.1.3.4 <i>Interpretations of [ʃ]</i>	22
2.1.3.5 <i>Dorso-palatal fricative [ç]</i>	22
2.1.3.6 <i>Varieties without voiced strident phonemes</i>	23
2.1.4 Nasals	24
2.1.5 Glides (semivowels)	24
2.1.6 Rhotics	24
2.1.6.1 <i>Distribution of rhotic types</i>	24
2.1.6.2 <i>Interpretations of rhotic distribution</i>	26
2.1.7 Laterals	34
2.1.7.1 <i>Alveolar lateral</i>	34
2.1.7.2 <i>Alveolo-palatal lateral</i>	34
2.1.8 Place in coronals	36
2.1.9 Contrasting geminate consonants	36

2.2	Vowel inventory	37
2.2.1	Stressed vowel contrasts	37
2.2.1.1	<i>Gaps in the distribution of mid front vowels in central Catalan</i>	38
2.2.1.2	<i>Mascaró's law</i>	41
2.2.1.3	<i>Instability in the lexical incidence of half-close and half-open mid vowels</i>	45
2.3	Vowel reduction	52
2.3.1	Introduction	52
2.3.2	Vowel reduction in western Catalan	52
2.3.3	Vowel reduction in Majorcan	53
2.3.4	Vowel reduction in eastern Catalan, except Majorcan	54
2.3.5	The interpretation of Catalan vowel reduction	55
2.3.6	Excluding [ɛ, ɔ] from unstressed syllables	56
2.3.7	Basic vowel reduction in eastern Catalan	57
2.3.8	Basic vowel reduction in Majorcan	60
2.3.9	Exceptions to eastern Catalan vowel reduction, 1: * [ə' a], * [ ' aə], * [əə]	61
2.3.10	Exceptions to eastern Catalan vowel reduction, 2: adjacent mid vowels	65
2.3.11	Exceptions to eastern Catalan vowel reduction, 3: post-tonic [e], [o]	70
2.3.12	Further non-reduction of unstressed [e] in Majorca	73
3	SYLLABLE STRUCTURE	78
3.1	Onsets	78
3.1.1	Onset-driven resyllabification	84
3.2	The syllabification of vocoids	88
3.2.1	Introduction	88
3.2.2	Default syllabification of high vocoids within words	88
3.2.3	High vocoids following other vocoids	90
3.2.3.1	<i>Stressed vowel + high vowel hiatus</i>	91
3.2.3.2	<i>Hiatus before 'underlying' stress</i>	92
3.2.3.3	<i>Unstressed vowel followed by unstressed high vocoid</i>	96
3.2.4	High vocoids preceding other vocoids	99
3.2.4.1	<i>Labio-velar obstruents?</i>	100
3.2.4.2	<i>Other post-consonantal high vocoids followed by non-high vocoids</i>	102
3.2.4.3	<i>Vocoid sequences of rising sonority in relation to word stress</i>	103
3.2.4.4	<i>High vocoid followed by stressed non-high vocoid in initial syllable</i>	105
3.2.4.5	<i>Word-initial pretonic sequences of rising sonority</i>	109

3.2.4.6	<i>Initial pre-pretonic sequences of rising sonority</i>	109
3.2.4.7	<i>Non-initial sequences of rising sonority, with second element stressed</i>	110
3.2.4.8	<i>Pretonic non-initial sequences of rising sonority</i>	114
3.2.5	High vocoid sequences	120
3.2.5.1	<i>Adjacent dissimilar high vocoids</i>	120
3.2.5.2	<i>Adjacent similar high vocoids</i>	121
4	PHRASAL PHONOLOGY: VOWEL SANDHI	124
4.1	Introduction	124
4.2	Stressed vowel followed by unstressed vowel	125
4.2.1	Stressed vowel followed by an unstressed high vowel	125
4.2.2	Stressed vowel followed by an unstressed non-high vowel	129
4.3	Unstressed vowel followed by stressed vowel	132
4.4	Contact between unstressed vowels	135
4.5	Observations on multi-vocoid sequences	140
4.6	Summary of evidence for constraint rankings for vowel sandhi	144
5	CODA VOICING NEUTRALIZATION AND ASSIMILATION	145
5.1	Distribution of voiced and voiceless obstruents	145
5.2	'Incomplete' neutralization	149
5.3	Accounting for voicing neutralization and assimilation	151
5.4	Towards an OT account of voicing neutralization in Catalan	157
5.5	Word-final sibilants	162
5.6	Appendix: Steriade's 'P-map' approach to voicing neutralization	164
6	CODA PLACE AND MANNER ASSIMILATION AND NEUTRALIZATION	166
6.1	Introduction	166
6.2	Morpheme-internal coda-C clusters	168
6.2.1	Heterorganic nasal coda clusters	173
6.2.2	Heterorganic denti-alveolar-C clusters	173
6.2.3	Labial-alveolo-palatal cluster	174
6.2.4	Alveolo-palatal-C clusters	176
6.2.5	Velar-C clusters	177
6.2.6	Constraints for formal style	177
6.3	Nasal and lateral assimilation and associated assimilations in less formal style	179
6.4	Inter-word coda-C clusters	180
6.4.1	Inter-word coda-C clusters in less formal styles	183

6.4.2	Summary of style-reflecting place assimilations in inter-word consonantal contacts	185
6.4.3	Heterorganic major place inter-word contacts	185
6.5	Minor place assimilation	186
6.5.1	Survey of cluster realizations	190
6.5.2	Denti-alveolar contacts	192
6.5.3	Alveolo-palatal onsets	197
6.5.4	High DAC contacts	201
6.5.5	Conclusions and Summary	204
6.6	Consonantal contact in Majorcan: place and manner	207
6.6.1	Labial coda inputs	211
6.6.2	Alveolar coda inputs	214
6.6.3	Alveolo-palatal coda inputs	215
7	CLUSTER REDUCTION	220
7.1	Introduction	220
7.2	Cluster reduction in stems	221
7.3	Cluster reduction in stems with a consonantal suffix	227
7.4	Cluster reduction in uninflected stems followed by vowel-initial words	235
7.5	Cluster reduction in uninflected stems followed by consonant-initial words	237
7.6	Cluster reduction in inflected stems followed by vowel-initial words	240
7.7	Cluster reduction in inflected stems followed by consonant-initial words	244
7.8	Summary of constraint rankings relating to word-final clusters	249
8	EPENTHESIS AND OTHER SONORITY-RELATED PHENOMENA	250
8.1	Introduction	250
8.2	Non-edge epenthesis	252
8.3	Codas and epenthesis	257
8.4	Sibilants and epenthesis	263
8.5	Minimum sonority distance and voiced stop gemination	265
8.6	Balearic verb forms with coda clusters violating the sonority sequencing principle	269
9	STRESS, FEET, AND PHRASES	276
9.1	Word stress: introduction	276
9.2	Unstressed words	277

9.3	Compounds and complex words	279
9.3.1	Compounds	279
9.3.2	Complex words with affixes	282
9.4	Verb stress	284
9.5	Prosodic word constraints	288
9.6	Rhythmic constraints above the word: a provisional account	297
	Appendix: evaluation of alternative foot and colon parses for word types in (29–31)	306
10	WORD PHONOLOGY AND PHONOLOGICALLY CONDITIONED ALLOMORPHY	310
10.1	Coda/Onset alternations: lenition	310
10.1.1	Introduction	310
10.1.2	Fricatives or approximants	312
10.1.3	Lenition and the theory of effort	314
10.1.4	Lenition and the enhancement of contrast	316
10.1.5	Variation in Catalan lenition	317
10.1.6	Further interpretation of the hierarchy of leniting contexts in Catalan	324
10.1.7	Remaining issues	326
10.2	Consonant/zero alternations	327
10.2.1	N/zero alternation	327
10.2.2	R/zero alternation	333
10.3	Alternations involving stem-final labials	338
11	THE SYLLABIFICATION OF PRONOMINAL CLITICS	341
11.1	Introduction	341
11.2	Single clitics	342
11.3	Clitic clusters	345
11.4	Syllabification constraints affecting clitics and clitic clusters	348
11.4.1	Epenthesis	348
11.4.2	Deletion of consonants and other issues in the syllabification of pronominal clitics	355
11.4.3	Non-edge epenthesis in verb–clitic sequences	363
11.5	Epenthesis in clitic clusters to avoid geminate sibilants	366
11.6	Summary of constraint ranking	369
